

APOS Data Gateway for SAP Analytics Cloud

A Live Connection from SAP Analytics Cloud to a Wide Variety of Enterprise Data Sources

SAP Cloud offers great potential for BI deployments, and organizations looking to adopt it need efficient and cost-effective connectivity with their enterprise data sources.

Various sources of enterprise data will be migrated to the Cloud in the coming years, but organizations also need data connectivity to data sources which will remain on-premise. The APOS Data Gateway for SAP Analytics Cloud enables organizations to leverage the analytics content and platform of SAP Analytics Cloud, but doing so while connecting to their existing enterprise data assets, in their existing data location, behind their corporate firewall. With the data kept safely behind the firewall in its current location, there are no replication or upload requirements, and no need to re-create or duplicate data models or security models.

APOS Data Gateway for SAP Analytics Cloud

A Live Connection from SAP Analytics Cloud to a Wide Variety of Enterprise Data Sources

The APOS Data Gateway solution enables a live connection from SAP Analytics Cloud to these on premise data sources:

- SAP BW Connector
 - Connectivity to SAP BW version 7.3 and up
- Universe Connector
 - Connectivity to enterprise data through Universes in SAP BusinessObjects 4.1 SP6 and up
- Direct Data Connector
 - Connectivity to Relational data (MS SQL Server, Oracle)
 - Connectivity to OLAP data (MS Analysis Services, Essbase)

Key Benefits of the APOS Data Gateway for SAP Analytics Cloud:

The APOS Data Gateway lets you quickly realize the many benefits of Live Mode:

- You experience your data in real time - no acquisition or ETL processes, no costly synchronization of data, data models, and the security structure
- No need to define and maintain models and security in the Cloud for your on-premise data
- Enterprise data does not travel outside the enterprise firewall
- Leverages your investment in on-premise data appliances
- Shortens SAP Analytics Cloud implementation timelines

Formed in 1992, APOS Systems is a global provider of solutions which enable well managed business intelligence.

APOS solutions improve the return on your BI investment through enhanced BI platform management, providing: automated and simplified administration; detailed platform auditing and monitoring; robust archive, backup and restore capabilities; extended data connectivity; enhanced content publishing and distribution; detailed BI query awareness and controls; and targeted solutions to speed and streamline your platform migrations.

APOS solutions simplify, automate, complement and extend your BI platform management practices.
