# APOS Administrator
Automated administration and system management

Objects

- Automate labor-intensive administrative tasks to liberate resources
- See and manage your entire object environment
- Work with high-volumes of objects simultaneously
- Manage users, groups and preferences
- Manage reports, universes, security
- Structure and streamline object promotion with secure package scheduling and delivery

Schedules

- Create and execute report schedules in high-volume
- Create and edit multiple schedule properties at once
- Update and repeat schedules with bulk schedule templates
- Draw schedule properties and security from external data sources

Instances

- See and manage your entire instance inventory
- Work with multiple instances simultaneously
- Perform granular search by properties (status, owner, Report ID)
- Stop, pause, release and reschedule high volumes of instances
- Respond rapidly and in bulk to report failure scenarios

APOS Administrator enables agile BI platform management for SAP BusinessObjects.

Whether you're managing or re-engineering business processes, establishing crisis management or disaster recovery procedures, or preparing for migration to a newer version of SAP BusinessObjects, APOS Administrator creates value through operational efficiencies.

Progressive BI Platform Management

APOS Administrator solves the administrative problems you have right now, and prepares you to solve problems you will experience as the demands of your information consumers grow. Go beyond a curative approach to BI platform management. Achieve well managed BI through agile administration and optimal BI platform management for SAP BusinessObjects.

Automated administration and system management

Component Architecture Diagram

Since its beginning in 1992, APOS Systems has evolved from a **custom business application** development shop to a global provider of solutions promoting well managed business intelligence. APOS solutions improve the return on your BI investment through:

BI platform management – automating and simplifying the administration, auditing and tracking of your BI platform, providing robust document instance and object archive and restore capabilities, enabling tightly controlled document production, publishing and distribution workflows, and promoting agile BI practices.

Location intelligence – full bi-directional integration between business intelligence and geospatial data, improving comprehension and communication, and enhancing decision-making workflows through advanced data visualization.

APOS solutions simplify, automate, enhance and extend BI practices, and focus BI processes for greater agility.

Simplify and Automate Administration
Streamline Platform Management

Use APOS Administrator to:

- Improve administrative efficiencies
- Streamline platform management, maintenance and migration processes
- Optimize content management, user and infrastructure processes
- Automate repetitive administrative tasks and use bulk operations to reduce human error
- Liberate highly skilled IT resources for high-ROI activities
- React quickly and decisively to unplanned system interruptions

APOS Administrator - A Solution for Enterprises of All Sizes
