APOS Storage Center for Migration to the Newest SAP® BusinessObjects™ BI Solutions Simplifies and Automates BI Deployment Migrations

Las Vegas - October 22, 2013 - APOS Systems Inc., a leading provider of well-managed business intelligence (BI) solutions for SAP® BusinessObjects™ BI solutions, announces the availability of its new APOS Storage Center for Migration. This product facilitates migration of large environments by letting users back up and archive objects on the source system and restore them to the target system running SAP BusinessObjects BI 4.1 solutions while avoiding interruption to either system. APOS Storage Center also lets users export instances to neutral formats such as PDF or XLS and restore that format to SAP BusinessObjects BI 4.1 solutions instead of, or in addition to, the original format. This is useful for converting report instances from the source system before restoring them in a format that can be viewed by all users in SAP BusinessObjects 4.1 solutions.

APOS Storage Center for Migration joins a set of migration-focused APOS Migration Accelerator products designed to simplify, automate and accelerate migration to the latest 4.0 and 4.1 releases of SAP BusinessObjects BI solutions.

"APOS Storage Center for Migration leverages our established enterprise Storage Center solution to provide robust migration functionality. It removes substantial uncertainties from migration planning, and streamlines the overall migration process significantly" said Ofir Gil, chief technical officer, APOS. "Now these organizations can move forward more rapidly with their migration plans and experience the many benefits delivered by the 4.0 and 4.1 releases of SAP BusinessObjects BI solutions."

For more information on APOS Storage Center for Migration and other APOS Migration Accelerator products, visit: http://www.apos.com/content/bi4-upgrade-resources. For more information, visit APOS Systems in booth 103 at SAP TechEd Las Vegas, being held Oct. 21-25.

About APOS Systems
Since its beginning in 1992, APOS Systems has evolved from a custom business application development shop to a global provider of solutions promoting well managed business intelligence. APOS focuses on providing BI Platform Management solutions that improve the return on your BI investment. APOS solutions simplify, automate, complement, enhance and extend BI practices, and focus BI processes for greater agility in your organization's decision-making capabilities.
