

APOS Distribution Server

Expanded Distribution Options for SAP BI

- **Enhanced**
 - Encryption
 - Destination Types
 - Security
 - Formats
 - Print Controls
- **Distribution Governance**
- **GDPR Compliance**
- **BI Launchpad Integration**

The APOS Distribution Server is a post-processing engine that leverages document metadata to fulfill complex SAP BI distribution requirements, expand distribution destination, encryption, security options, and provide smart integration with content management and other systems.

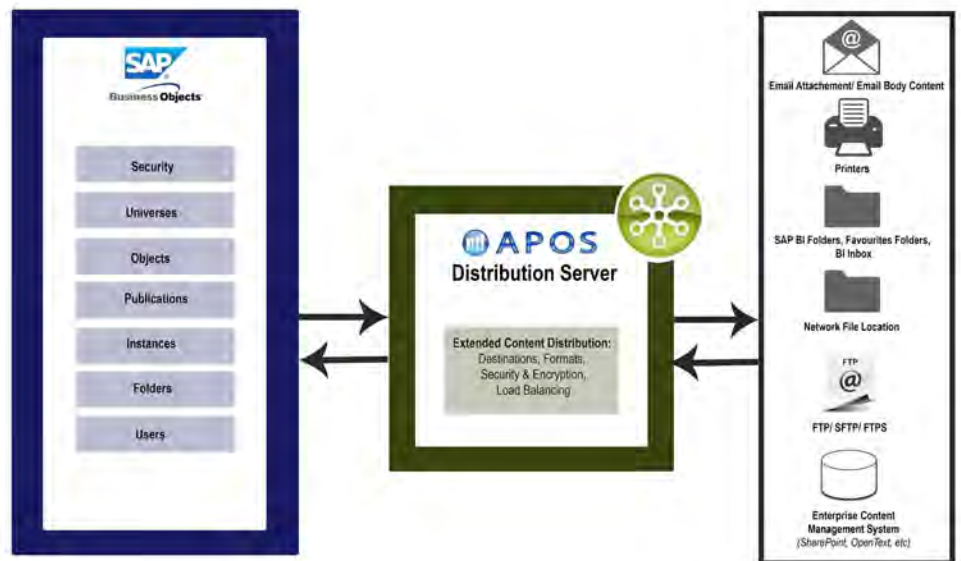

Fulfilling Complex SAP BI Distribution Requirements

APOS Distribution Server fulfills even the most complex distribution requirements push, pull, print, or place using:

- Enhanced destination types
- Enhanced encryption & security
- Greater variety of formats
- Enhanced print controls

Information Distribution Governance & GDPR Compliance

Information distribution is subject to internal governance and external regulatory compliance. With the implementation of the EU's General Data Protection Regulation (GDPR), your information distribution governance and compliance efforts need to follow Privacy by Design principles proactive and preventative, rather than reactive and remedial. APOS Distribution Server's user-centric distribution capabilities embed privacy in your distribution business processes

Well Managed BI

Enhanced Destination Types

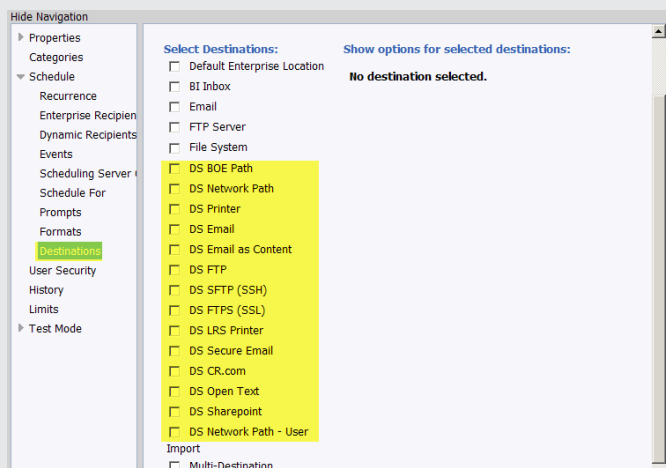

- Print to multiple printers.
- Send Web Intelligence reports to print.
- Send directly to SharePoint or any other content management system.
- Develop custom destinations using plug-ins designed to send to a particular destination, in a particular format, or using custom encryption.
- Use SAP BusinessObjects itself as a destination.

Enhanced Encryption & Security

- Standard - password-protected Zip files, PDF files with 128-bit encryption
- Enhanced - APIs for custom encryption
- Advanced - SSL Certificate based security
- More secure FTP options
- Specify destination types available to user groups

Enhanced Print Controls

- Send in multiple formats simultaneously.
- Asynchronous out-of-process printing -- print to printers regardless of whether the printer is currently available using spin-off processes.
- Determine which printers users can print to, ensuring that printed documents remain within the intended environment.

APOS Distribution Server Integration with SAP BI Launchpad

Complement the powerful information generation and delivery system that is SAP BusinessObjects with APOS Distribution Server. An APOS Distribution Server license lets you integrate Distribution Server directly with BI Launchpad, so that you can access a number of advanced Distribution Server features directly from the BI Launchpad interface.

APOS solutions improve the return on your BI investment through enhanced BI platform management, providing: automated and simplified administration; detailed platform auditing and monitoring; robust archive, backup and restore capabilities; automated report testing; enhanced content publishing and distribution; detailed BI query awareness and controls; simplified live enterprise data connectivity; and targeted solutions to speed and streamline your platform migrations.

APOS solutions simplify, automate, complement and extend your BI platform management practices.

Formed in 1992, APOS Systems is a global provider of solutions which enable well managed business intelligence.
