SAP Analytics Cloud Solutions

APOS Live Data Gateway

Extended Data Connectivity for SAP Analytics Cloud

A data connection and data transformation solution that enables live data connectivity and expanded data source options for SAP Analytics Cloud, and also SAP Lumira and SAP Analysis Office. Provides live data connectivity to a wide range of industry-standard Relational, OLAP, Cloud and Hadoop data sources.

APOS Publisher for Cloud

Burst and Distribute SAP Analytics Cloud Stories

APOS Publisher automates processes for bursting personalized SAP Analytics Cloud stories to end users. Dynamic, security driven processes with strict filters help ensure users receive only the data to which they are entitled. APOS Publisher also automates scheduling and export operations, allowing individual users to send SAP Analytics Cloud stories to a variety of destinations in a variety of formats.

APOS Universe Modelling Migration Accelerator (UMMA)

Translate Your Universe Modelling to HANA Modelling

A wizard-based, project-based conversion application that enables organizations working with SAP BI and SAP Analytics Cloud to automate the translation of modelling from SAP BI universes to SAP HANA based modelling.

Hybrid SAP BI Solutions
