

EXTEND BI& ANALYTICS

Streamline, simplify, safeguard, and accelerate the move to SAP BusinessObjects Private Cloud Edition (PCE)

Overview

Private Cloud Edition Adoption Kit by APOS bundles time-tested APOS technology to simplify migration from on-premise to SAP BusinessObjects PCE, providing vital automation to assist and simplify migration, and provide tools to strengthen controls and reduce costs for the PCE system ongoing.

The Private Cloud Edition Adoption Kit lays the foundation for migration by creating a deep understanding of the on-premise deployment, and "right-sizing" the system content to be migrated. Granular, automated controls ensure a smooth transition and augment SAP tools, with post-migration validation providing peace of mind with confirmation that the move is successful and fully tested. UNV universes can be automatically converted to UNX, and Web Intelligence reports automatically repointed.

Automation and tools accelerate and simplify the migration process, adding governance, validation, "right-sizing," and control.

Migration Preparation

PCE Migration Preparation

Build the foundation for a successful migration

Deep system audit and metadata capture for analysis

• Capture and leverage extensive system metadata for project planning, content prioritizing, and system sizing decisions

Comprehensive back-up of system content assets

• stabilize and secure entire system; protect and retain assets for targeted future imports - delta uploads, strategic restores

Automated, rules-driven clean-up of system content

• Systematic archival and removal of unnecessary content; 'Right-Size' the system; streamline content to be migrated

Automated transition of content assets for PCE compatibility

• Bulk conversion of universes to UNX format; update & repoint all report connections to the new universes

Migration Execution

Content Validation

Deployment Operations

PCE Deployment Operations

Strengthen controls and reduce costs for PCE system

Ongoing system visibility, audits and governance

• Continue with PCE system metadata capture and analysis for strong awareness and understanding of PCE system users, security, reports, universes, content usage patterns

Ongoing system clean-up & Right-Sizing

• Maintain optimal PCE system size with rules-driven automation to back-up and remove unused reports from the PCE system; systematic archive of strategic content offline from PCE system in neutral format (PDF, XLS, etc.) for long-term use

Ongoing report validation

• Ensure system and report accuracy for operational governance throughout report and universe change processes, as well as PCE system updates that happen

Ongoing streamlined content administration

 Leverage automation and high-volume management controls for fast and efficient administration and content management activities for the PCE system; reduce TCO and simplify PCE administration needs

Customer Success

Key functional elements of the **Private Cloud Edition Adoption Kit by APOS** are System Audit, System Back-up/Promotion, Content Upgrade/Validation, and Content Administration. These mature APOS technologies has been used by hundreds of organizations over the past two decades.

In addition to its virtualized data connectivity solutions, APOS provides a wide range of long-trusted technologies to simplify management and strengthen governance of SAP Analytics Cloud and SAP BusinessObjects deployments.

APOS Solutions for SAP Analytics Cloud

APOS Live Data Gateway

Live connectivity from SAC to a wide range of data sources – Editions for SAC, Ariba, S/4HANA, SAP Landscape, Premium Sources, Power BI

APOS Publisher for Cloud

Broadcasting and bursting SAC content – Editions for SAP Analytics Cloud and S/4HANA

APOS Insight for Cloud

Enhanced monitoring, auditing and validation of SAP Analytics Cloud

APOS Semantic Layer Migration

Automated translation of SAP BI Modelling to HANA and Live Data Gateway

APOS Solutions for SAP BusinessObjects

APOS Insight

- BI System Auditing
- BI System Monitoring
- BI Query Surveillance
- BI Report Testing

APOS Storage Center

- System Backup
- Content Archiving
- Content Versioning
- Automated System Clean Up

APOS Administrator

- Object Management
- Schedule Management
- Instance Management
- Web Intelligence Migration

info@apos.com

APOS Publisher

- Systematic Content Delivery
- Advanced Document Bursting
- Enhanced Content Distribution
- Security and Encryption
