

# **Live Data Analytics – Unlock New Value and Insight**

# Today's Session

## *Key Topics*

- Live Connectivity for Analytics
- Live Data Gateway Overview
- Virtualized Connectivity
- Data Preparation
- Data Consumption
- Q&A – see webinar console

## *Today's Presenters*

**ALLAN PYM**

Chief Operating Officer  
APOS

**ALAN GOLDING**

Solution Consulting Manager  
APOS

## Who is APOS?

- Formed in 1992
- Enabling BI platform management, administration, migration, governance and compliance
- Simplifying, automating, extending SAP BusinessObjects and SAP Analytics Cloud
- Strategic SDK development and consulting
- Hundreds of customers globally

**APOS**

**SAP  
BusinessObjects**

**Hybrid BI**

**SAP  
Analytics Cloud**

**EXTEND**  
**SAP ANALYTICS**

we did in the  
survey

# Live Data Analytics

# Live Data Analytics

# Live Data Analytics

# Live Data Analytics

## Key Benefits:

- No unnecessary movement of data
- Only focused queries requested, only focused data returned
- Reduced data transaction costs
- Database security controls are retained
- No need to remodel data within analytics solution

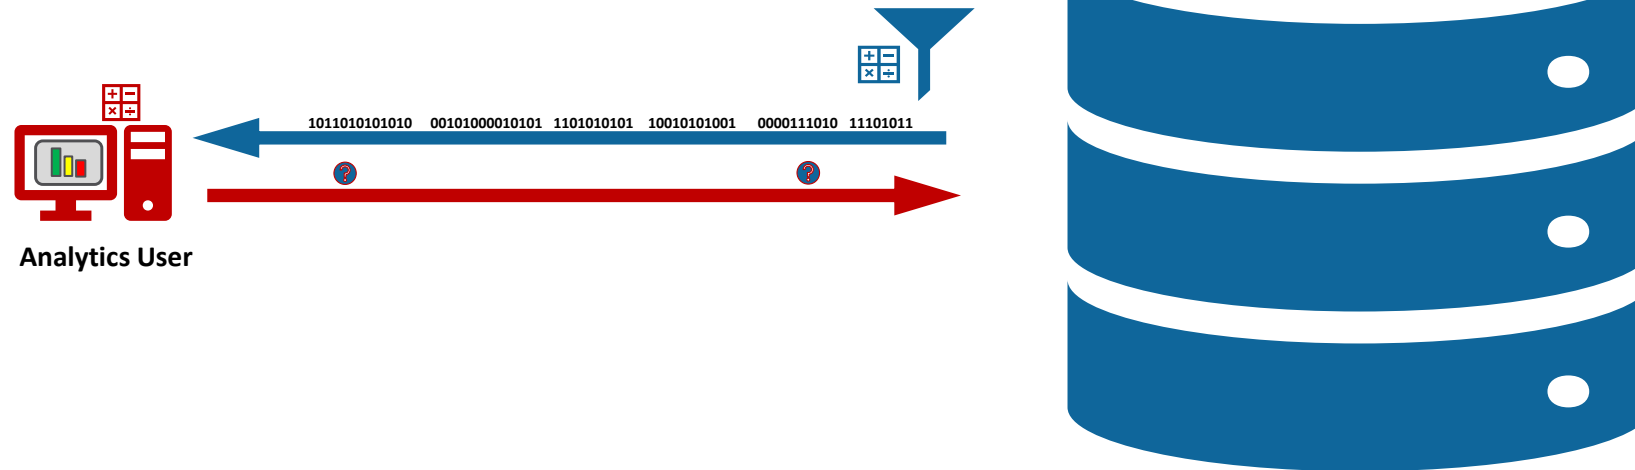

# Live Data Analytics – Growing Data

# Live Data Analytics – Growing Data

# Live Data Analytics – Growing Data

# Live Data Analytics – Important Factors

## Important Factors:

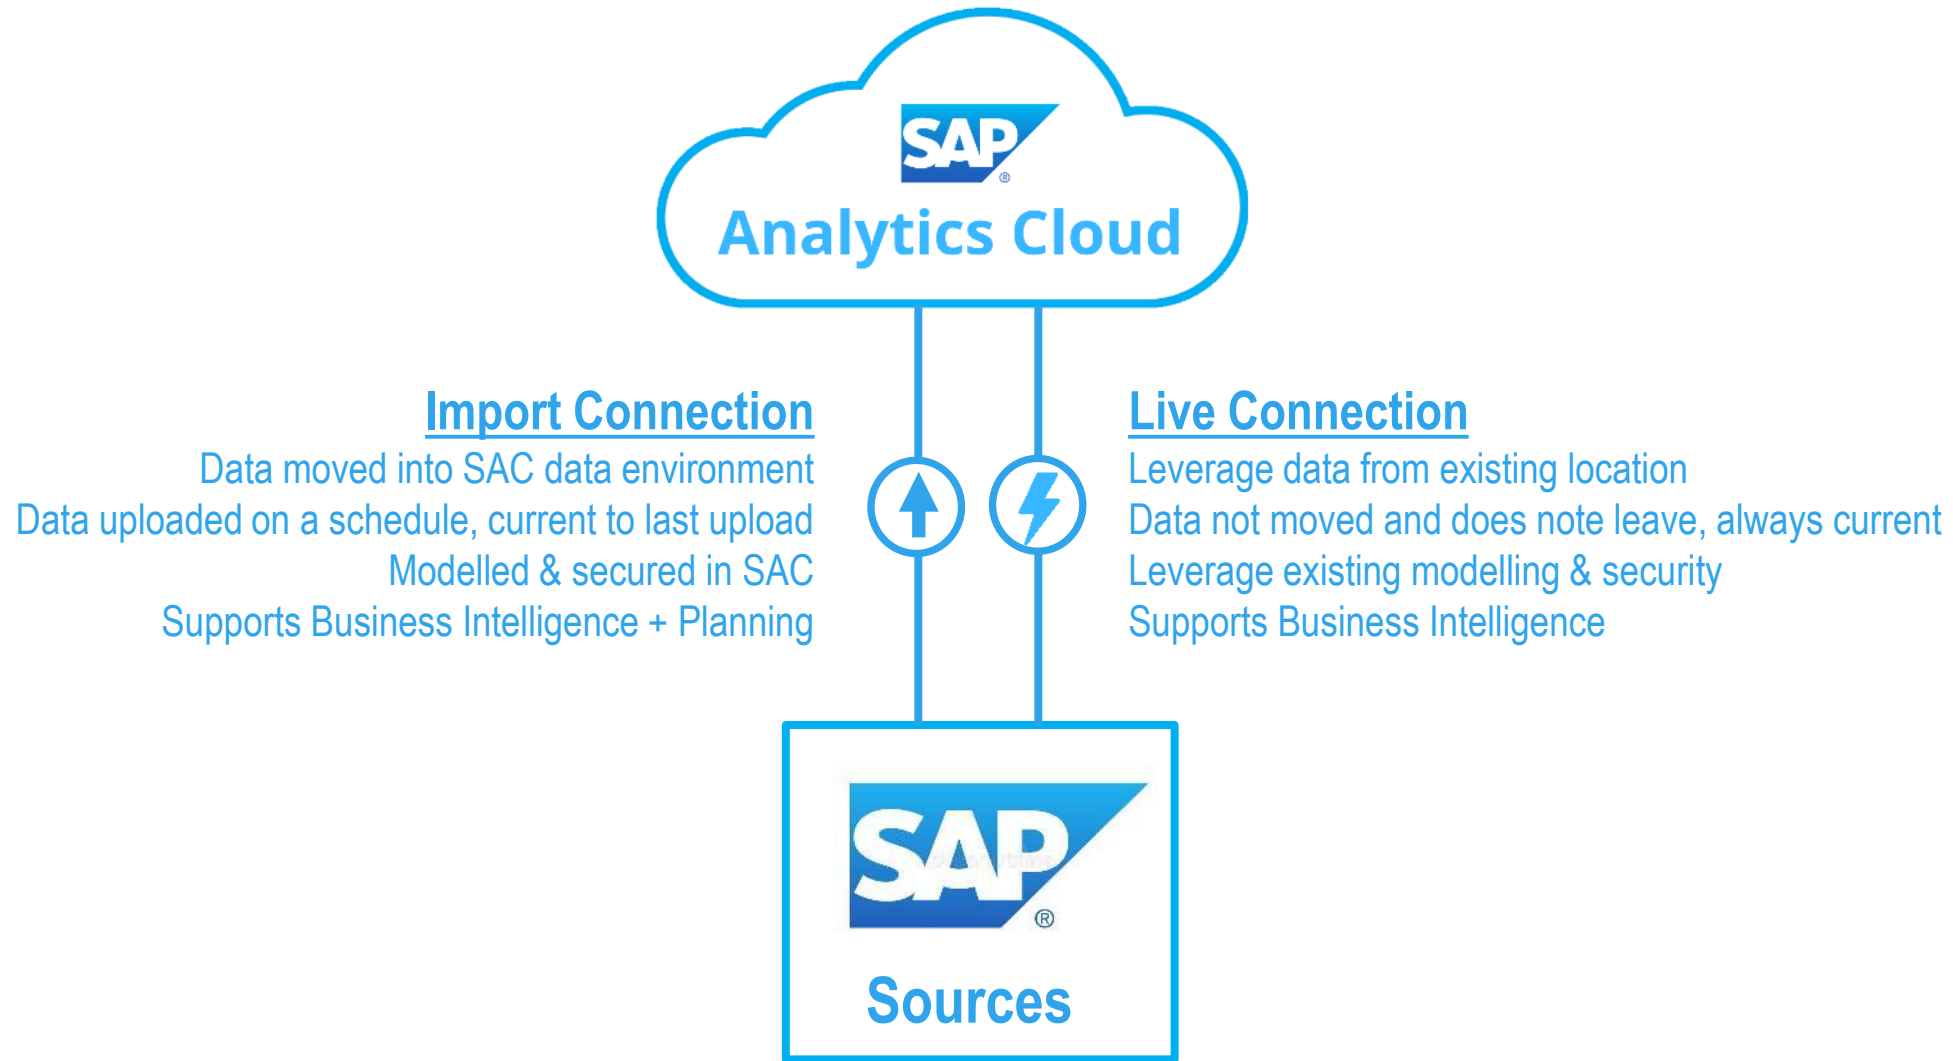

- Data volumes too large for data download or replication
- Significant changes in data technologies for high-performance
  - Cloud data platforms; In-memory platforms
  - Extremely fast & highly responsive
- Live connectivity now very viable with strong performance
- Live connectivity removes data latency
- Live connectivity can enable unified security

# SAC Connectivity

# Live & Import Connectivity

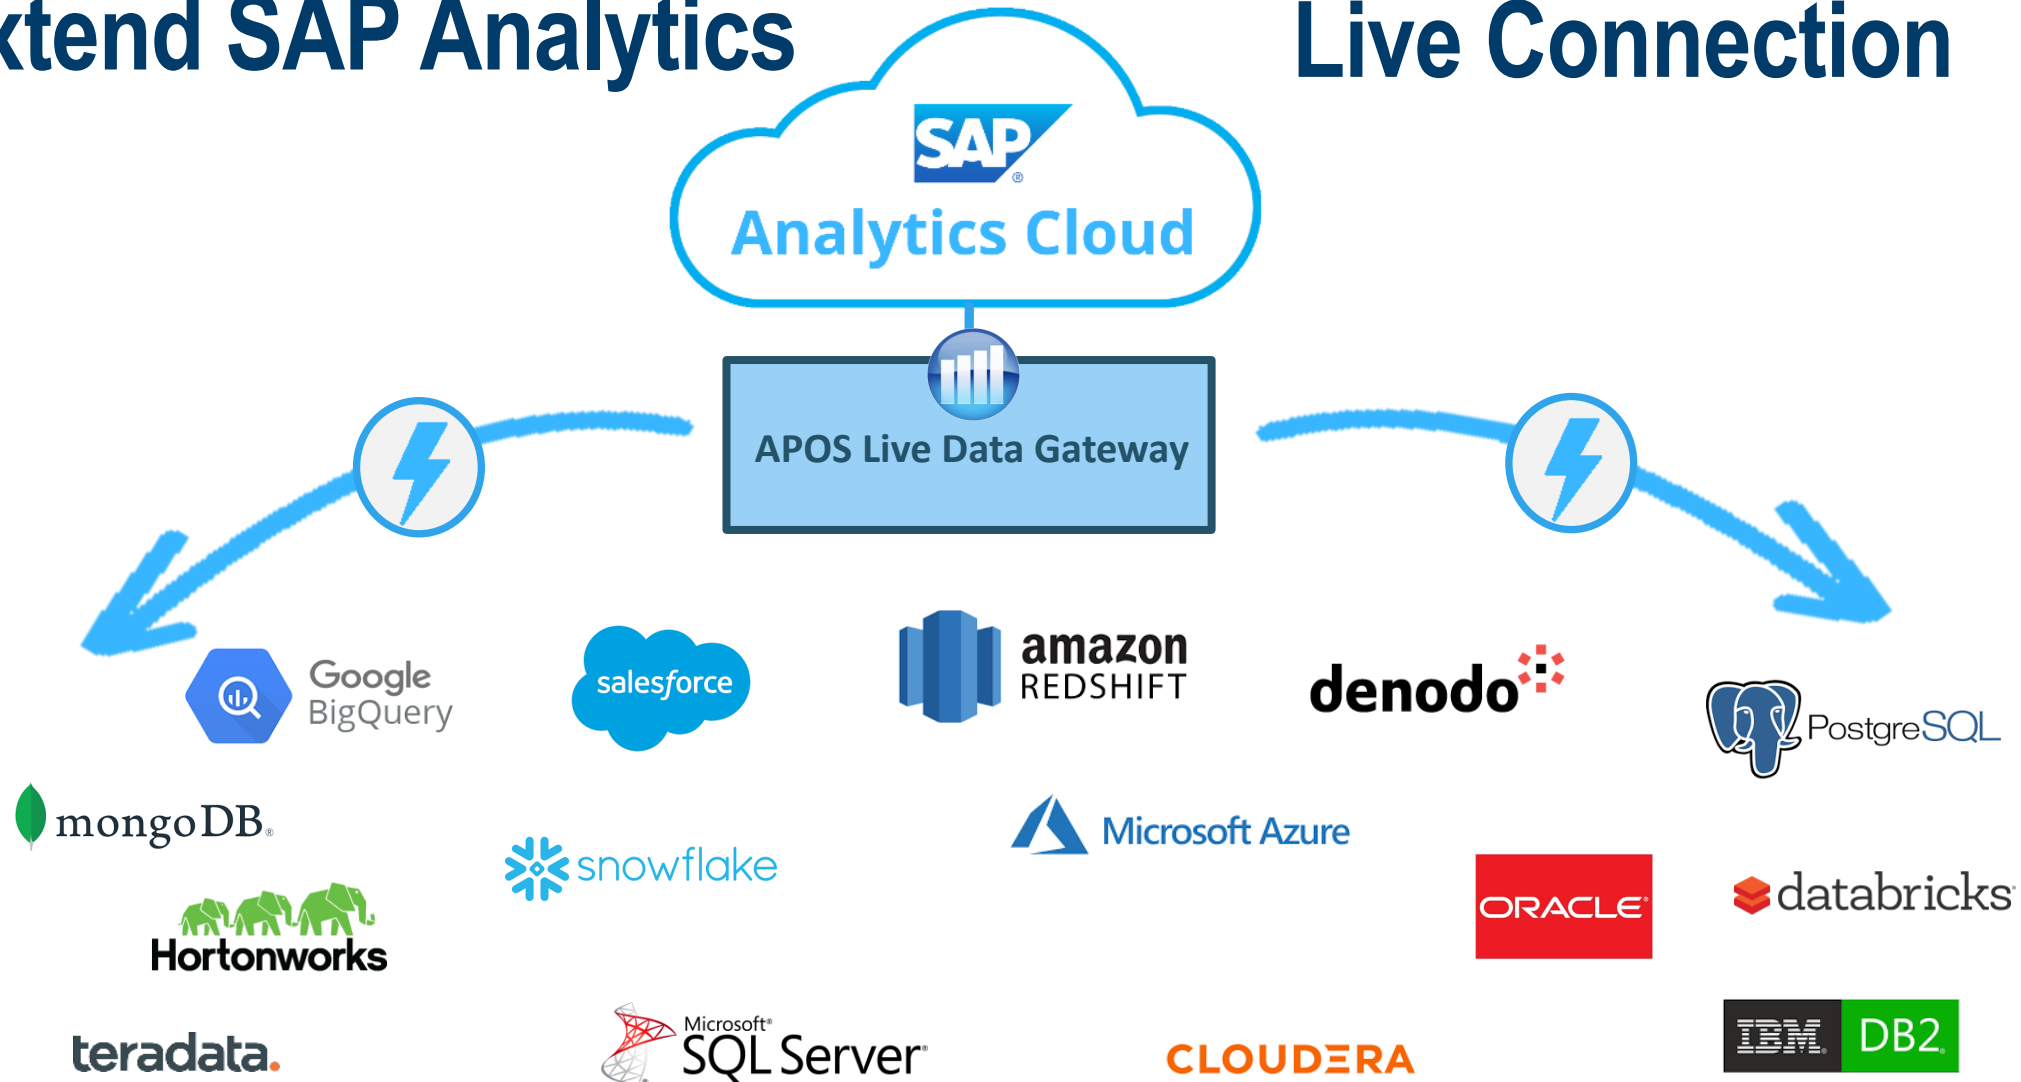

# SAC Connectivity to Non-SAP Sources - Import

# Extend SAP Analytics

# Live Connection

APOS

# APOS Live Data Gateway – Unlock Live Data

**APOS Live Data Gateway** is a middleware platform which provides virtualized data connection and data transformation to enable live data connectivity and expanded data source options for SAP Analytics Cloud, with a primary focus on **non-SAP data sources**.

Leverage data from its current location

No movement or importing of data

Leverage existing data modelling

Leverage existing security models

Data is always current

Data never leaves the firewall

No added data storage requirements

Reduce data bandwidth requirements

Available on  
**SAP Store**

# APOS Live Data Gateway

## Supported Data Sources

- Amazon Athena
- Amazon Aurora
- Amazon EMR
- Amazon Redshift / Redshift Spectrum
- Amazon S3
- Azure Analysis Services
- Azure Cosmos DB
- Azure Data Lake
- Azure SQL Database
- Azure SQL Data Warehouse
- Cloudera
- Databricks
- DB2
- Denodo
- Google BigQuery
- Google Cloud Platform
- Hortonworks
- Informix
- Microsoft SQL Server
- Microsoft Analysis Services
- Azure Blob
- Mongo DB, Mongo DB Atlas
- MySQL
- Netezza
- Oracle
- Oracle Essbase
- Oracle Exadata
- Postgres
- Presto
- Salesforce
- Snowflake
- Sybase IQ, Sybase SQL Anywhere
- Teradata
- SAP BusinessObjects Universes (UNV, UNX)
- SAP BW - version 7.3 and higher
- JDBC connectivity

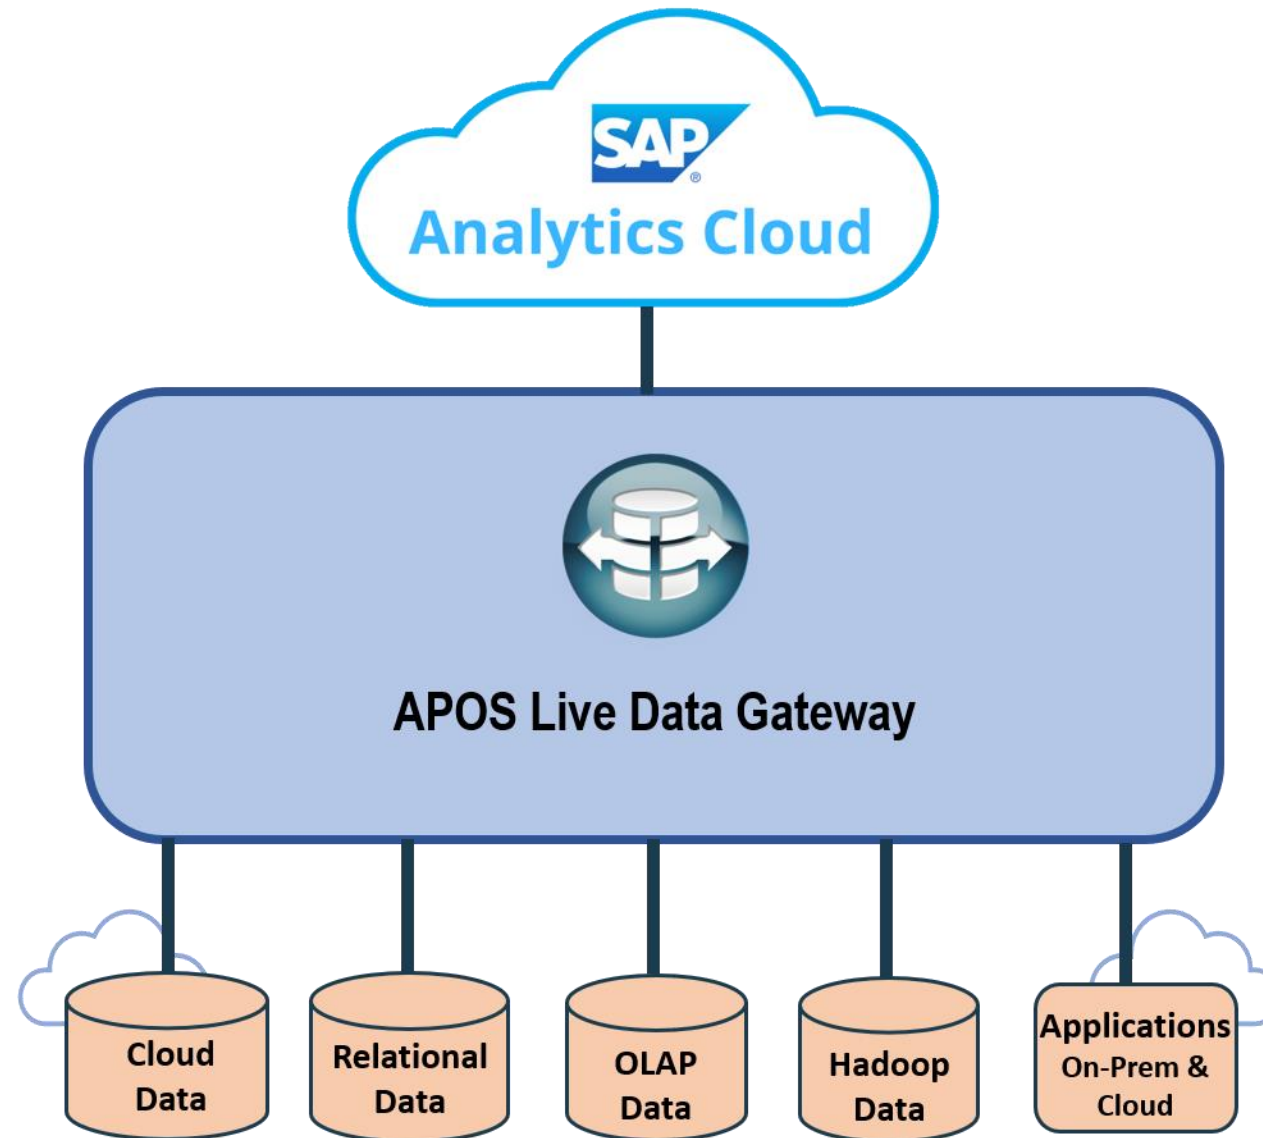

**Extended Data Sources:** 100+ Additional data source and application connection options

# Data Virtualization Layer

# Customer Success

Top-ranked global reinsurance organization utilizes Live Data Gateway to access MS SQL Server data bases and MS Analysis Services data cubes. Deployed as part of a finance transformation initiative, and complementing their S/4HANA system analytics.

Large equipment manufacturer utilizes Live Data Gateway to enable reporting via live connectivity to Salesforce data and Google Analytics data.

European-based mining corporation utilizes Live Data Gateway for live connectivity to their AWS Redshift data assets.

International soft drink manufacturer utilizes Live Data Gateway to leverage data from their Snowflake deployment, alongside their SAP BW instance.

# Live Data Gateway

## Data Preparation Layer

- Business layer / semantic layer
- Simplify data access for report builders
  - Self-service
- Control and govern access to data

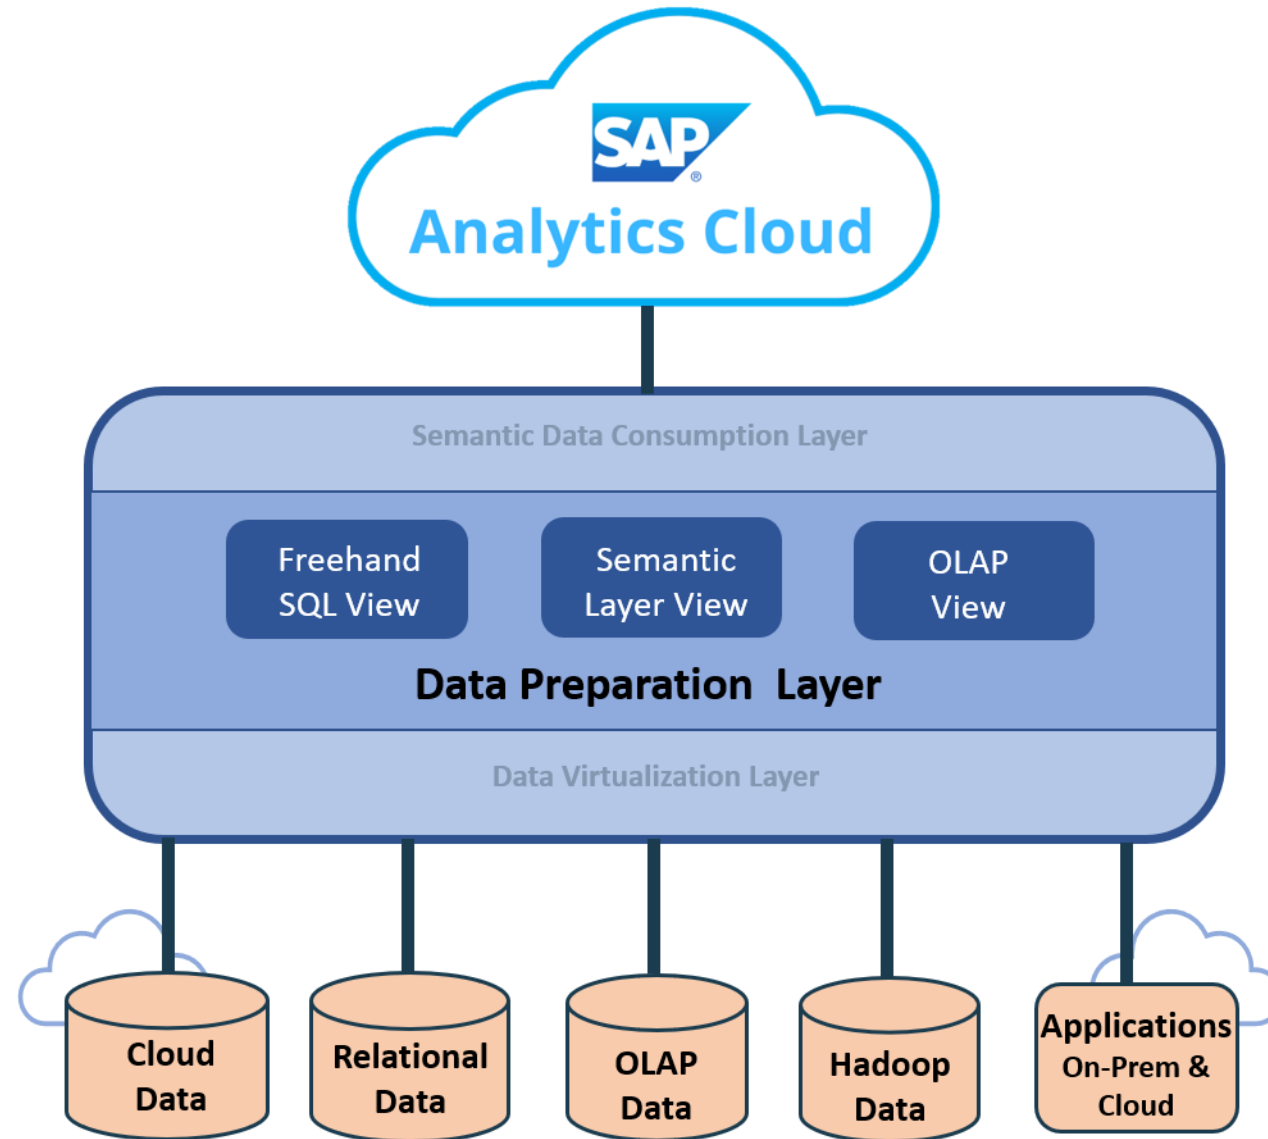

# Data Preparation Layer

## Data Preparation Layer

### Key Functions

- Define Measures and Dimensions
- Define what data fields are exposed
- Manage table links and joins
- Set meaningful field names

# Customer Success – Self-Service Analytics

International pharmaceutical company:

- Leverage the semantic layer in Live Data Gateway so that a smaller, centralized team can create the semantic layer views, and expose those views out to a broad range of analytics users.
- Analytics users are shielded from all complexities of data – connections, linking, field names, etc. Very simple connection to the needed data.
- Centralized control and governance over accessible data.

# Customer Success – Self-Service Modelling

Leading global corporation in the food production and agricultural commodities industry:

- They had deployed Live Data Gateway, but want a way for users to handle the creation of semantic layer views themselves rather than having to handle multiple requests themselves.
- APOS web-based semantic layer design interface allows broader range of users to create and maintain business relevant APOS Views.

# Live Data Gateway

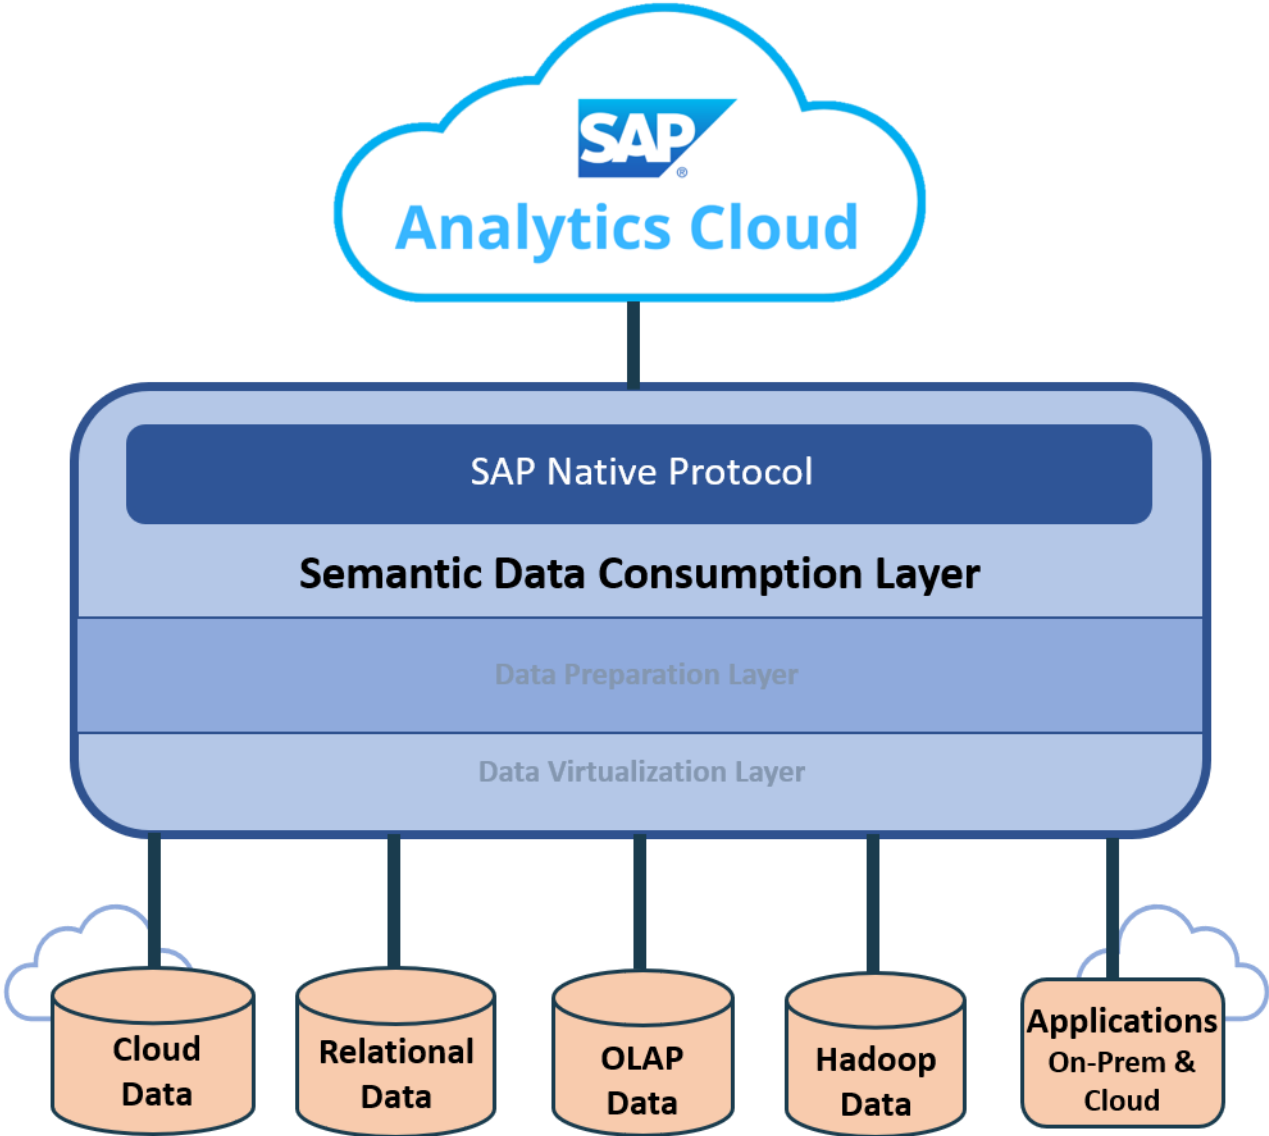

## Data Consumption Layer

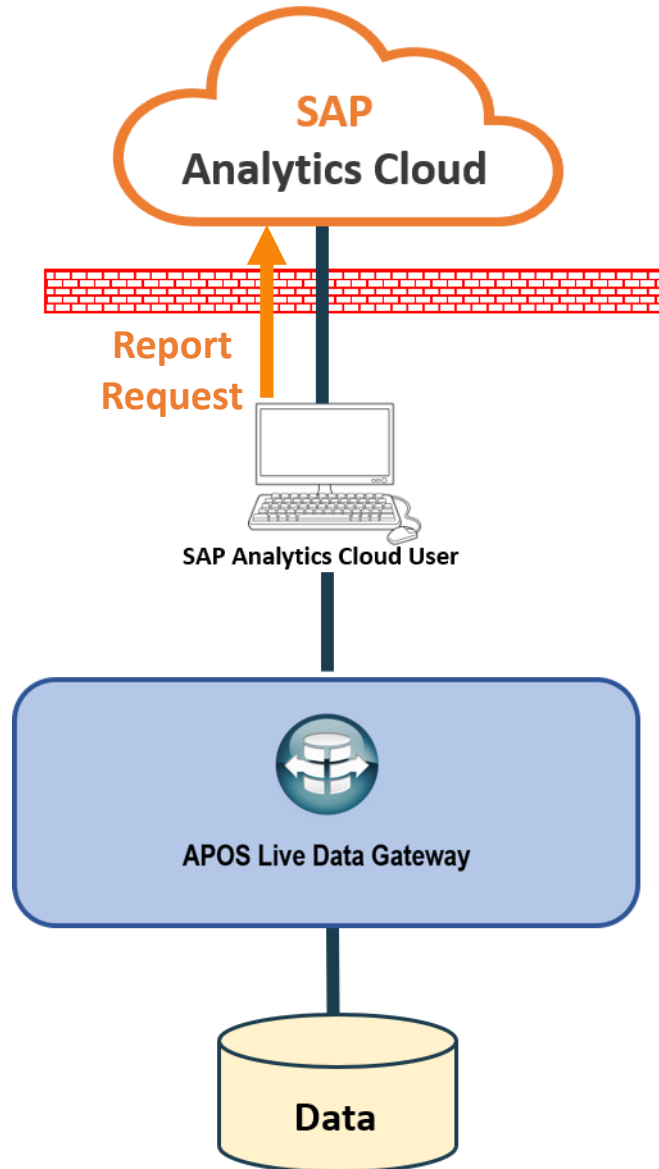

- Serve data to analytics consumer
  - Make needed translations for SAC consumption
  - Unified consumption layer for other consumers
- Secure communications

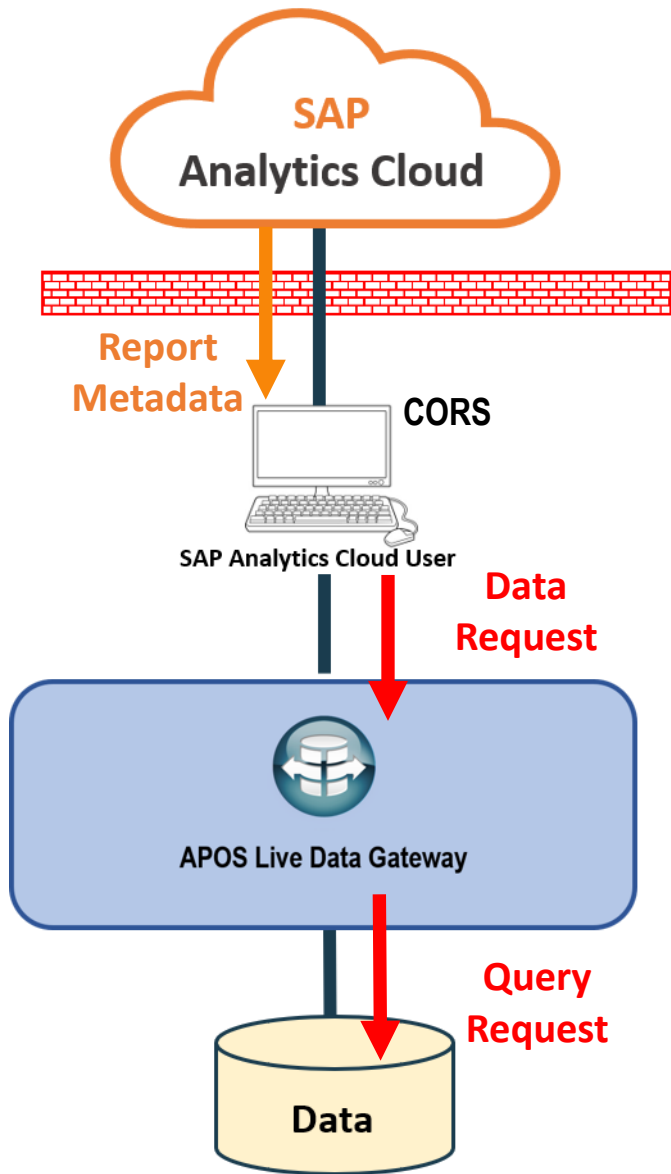

# Data Consumption Layer

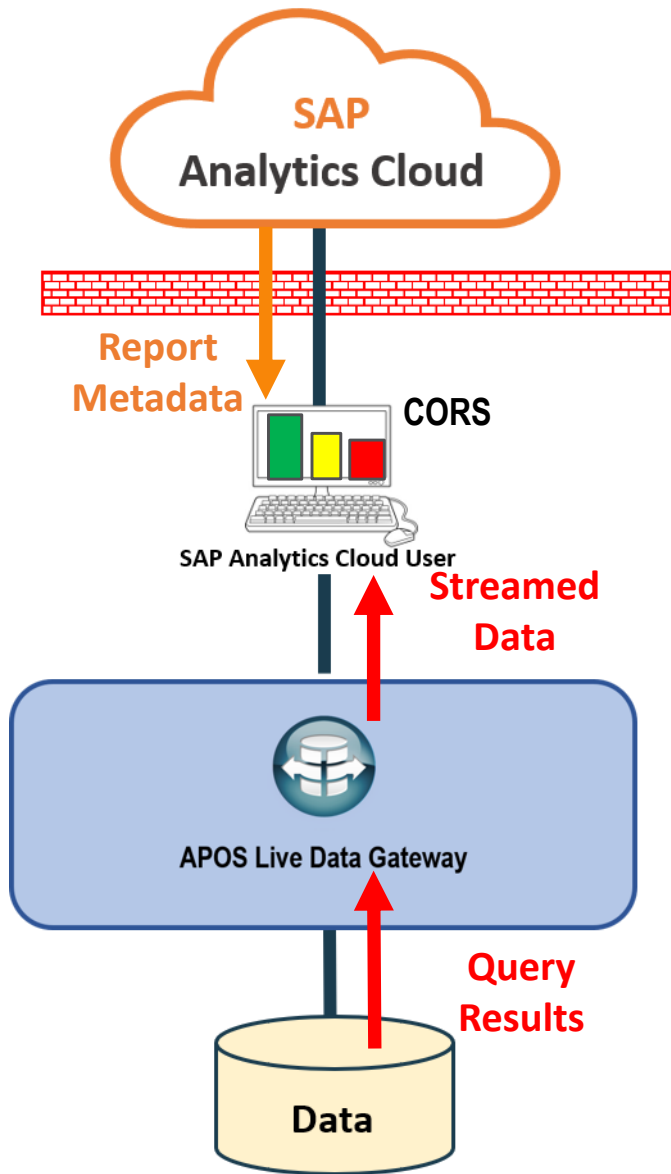

# Data Consumption Flow

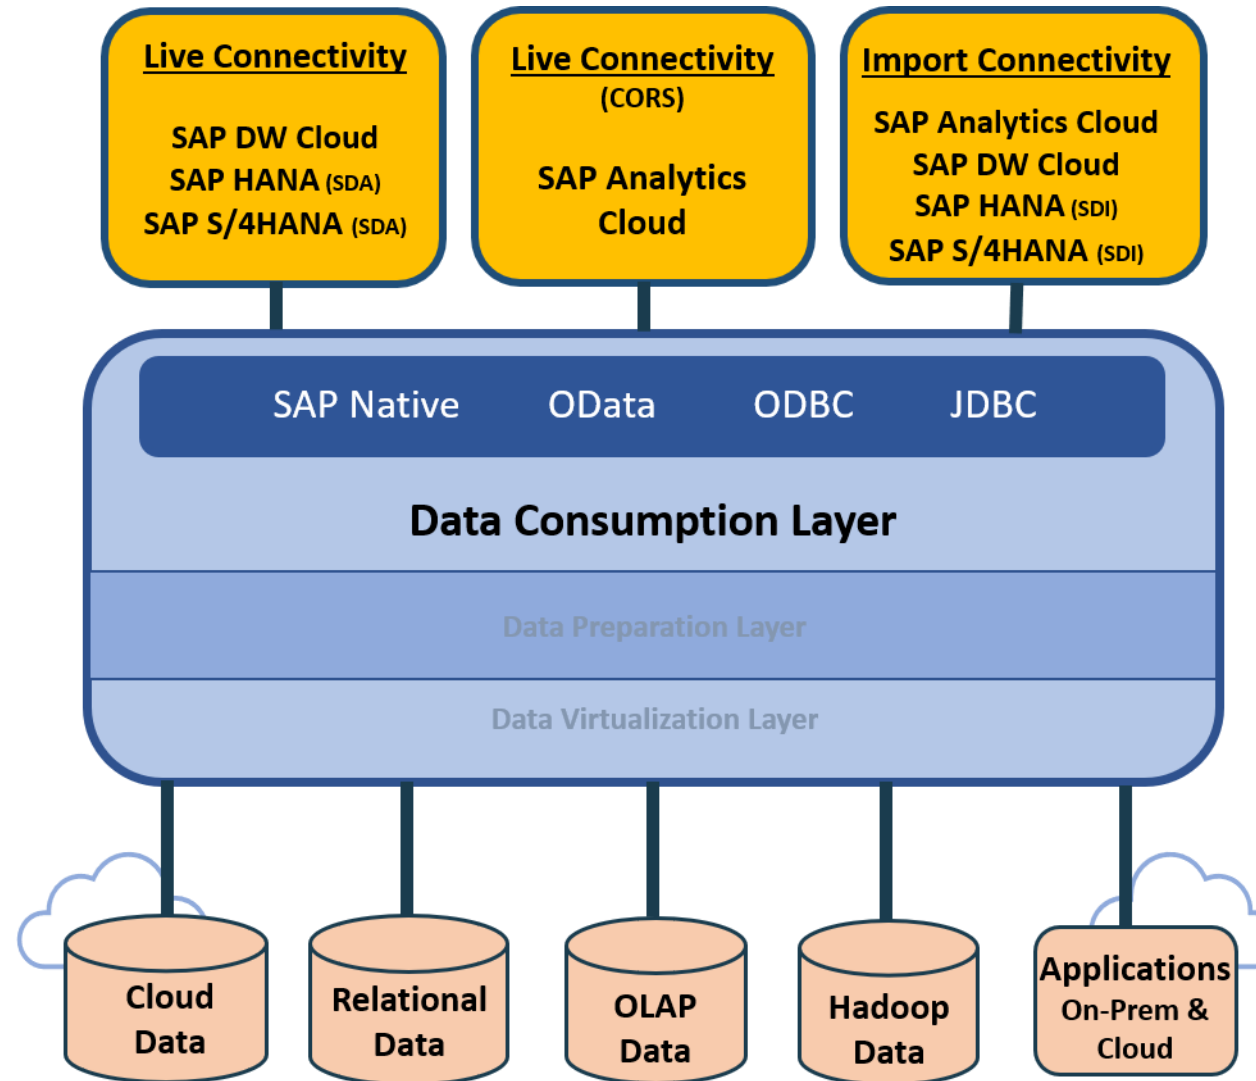

# Data Consumption Flow

# APOS Live Data Gateway – SAP Landscape Edition

# APOS Live Data Gateway – Unified Semantic Layer Edition

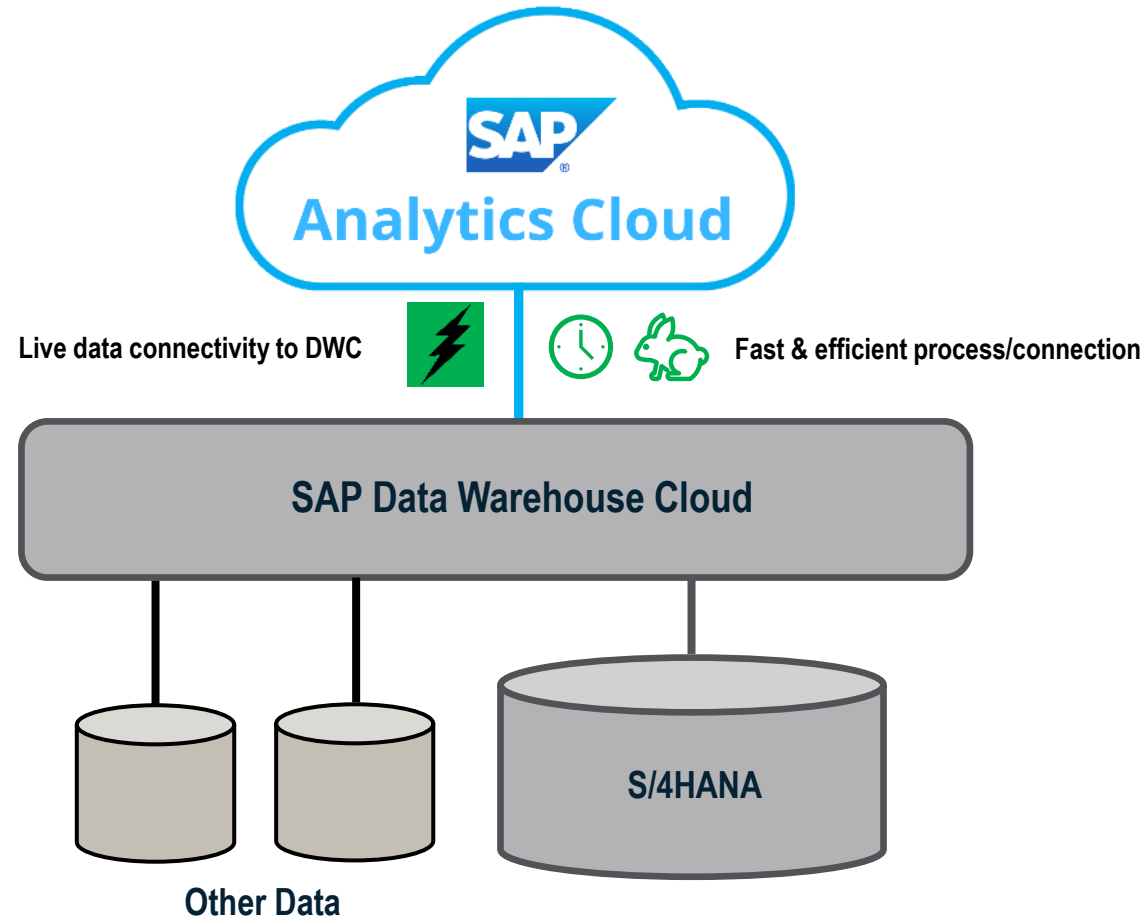

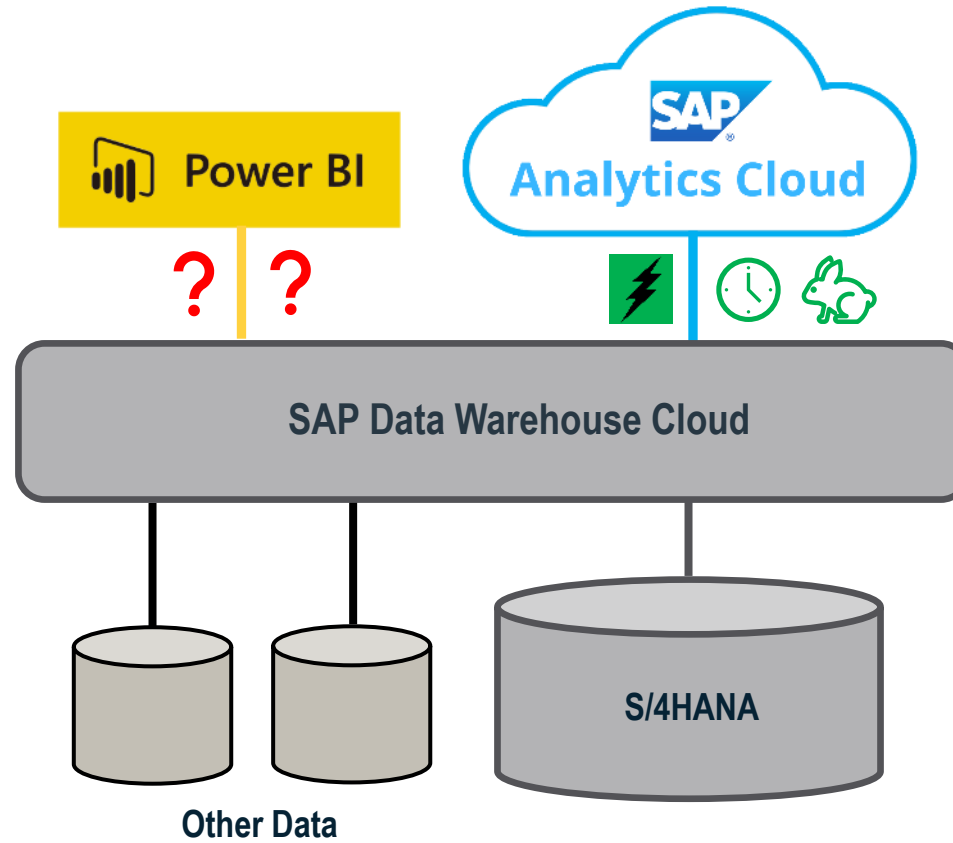

# Expanded Analytics Connectivity

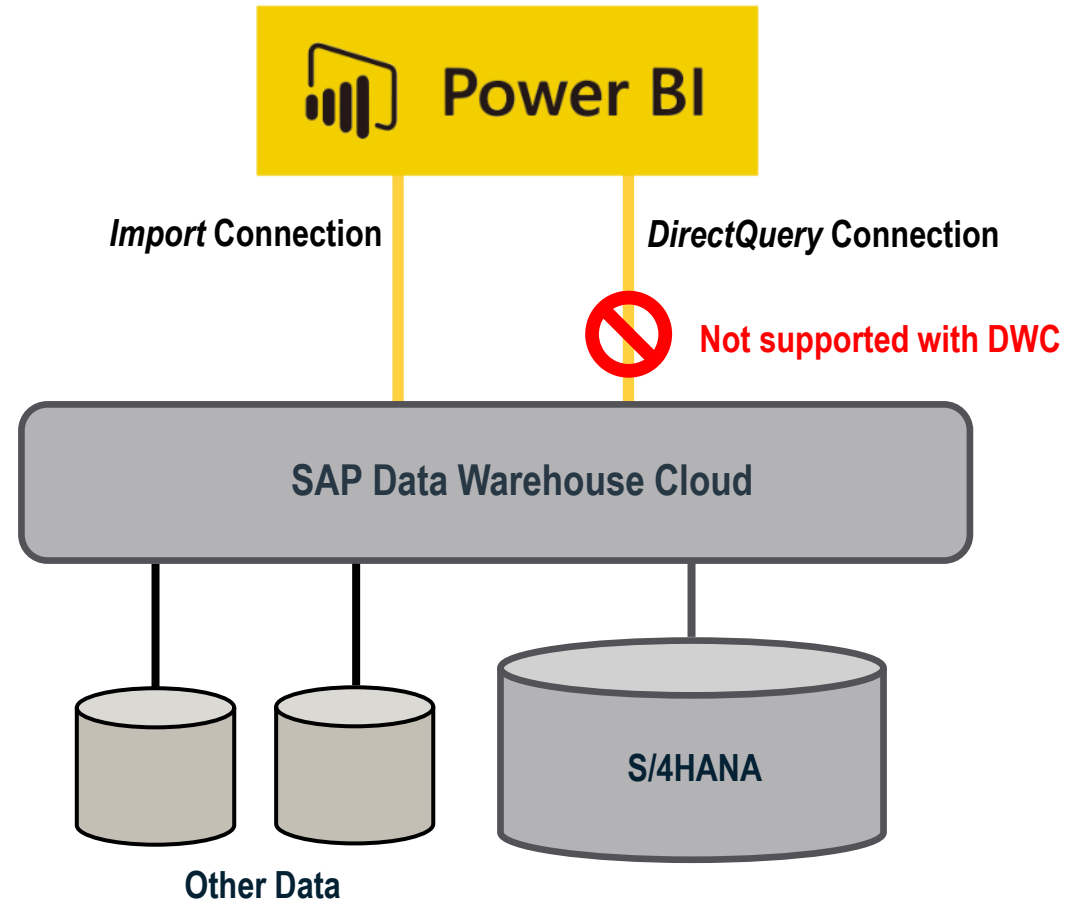

# Built-in Live Connectivity from SAC to DWC

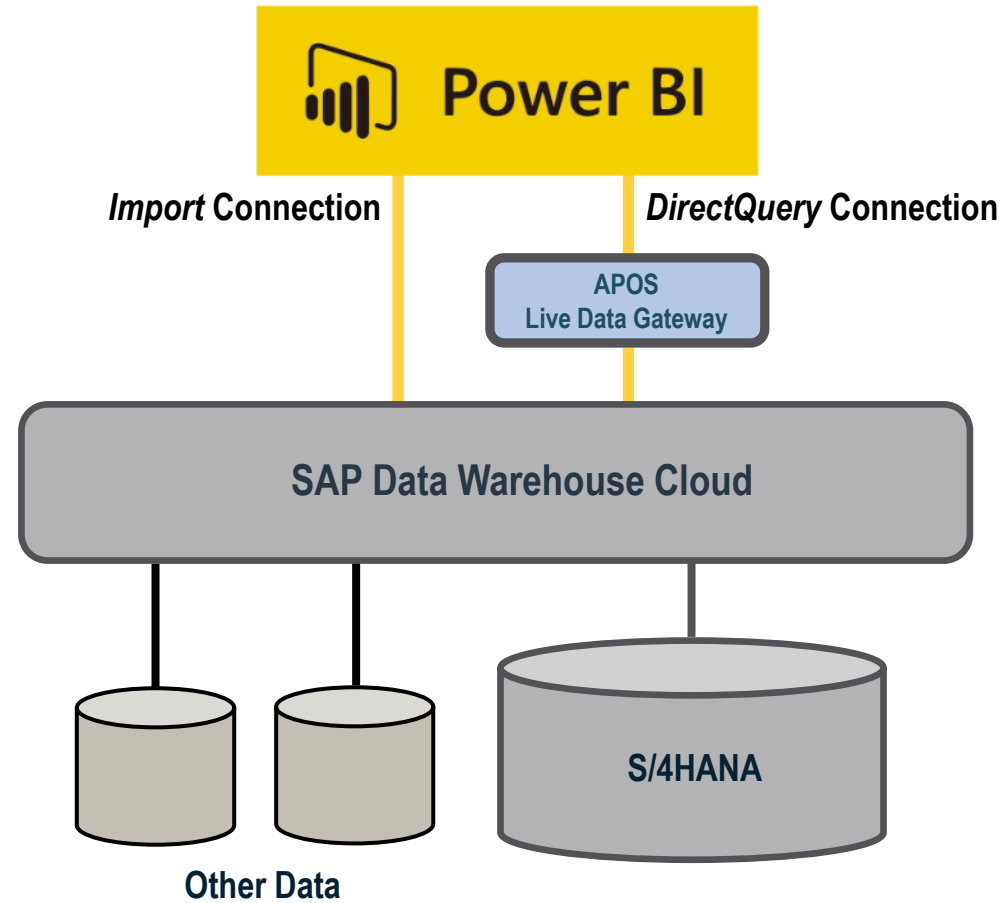

# Power BI Connectivity to DWC

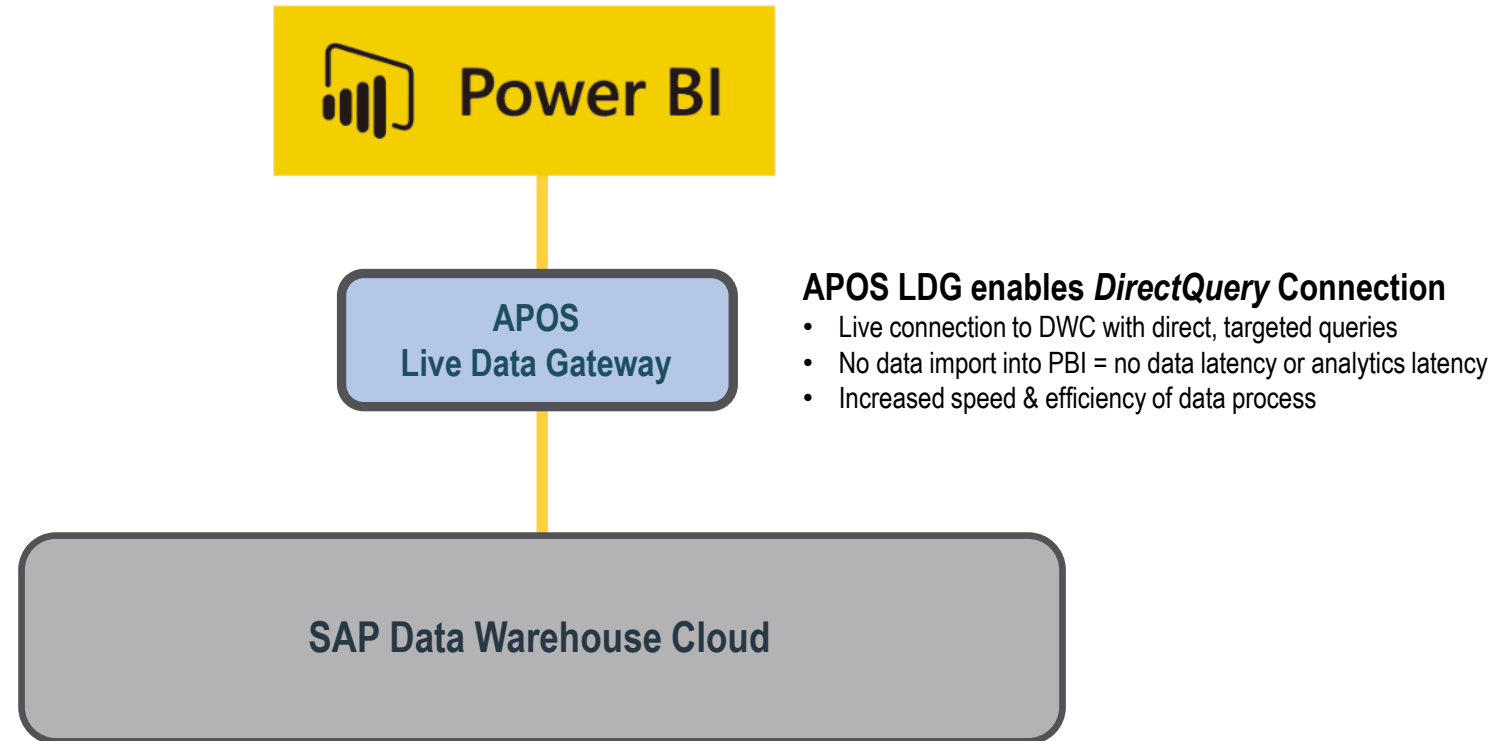

# Power BI DirectQuery to DWC

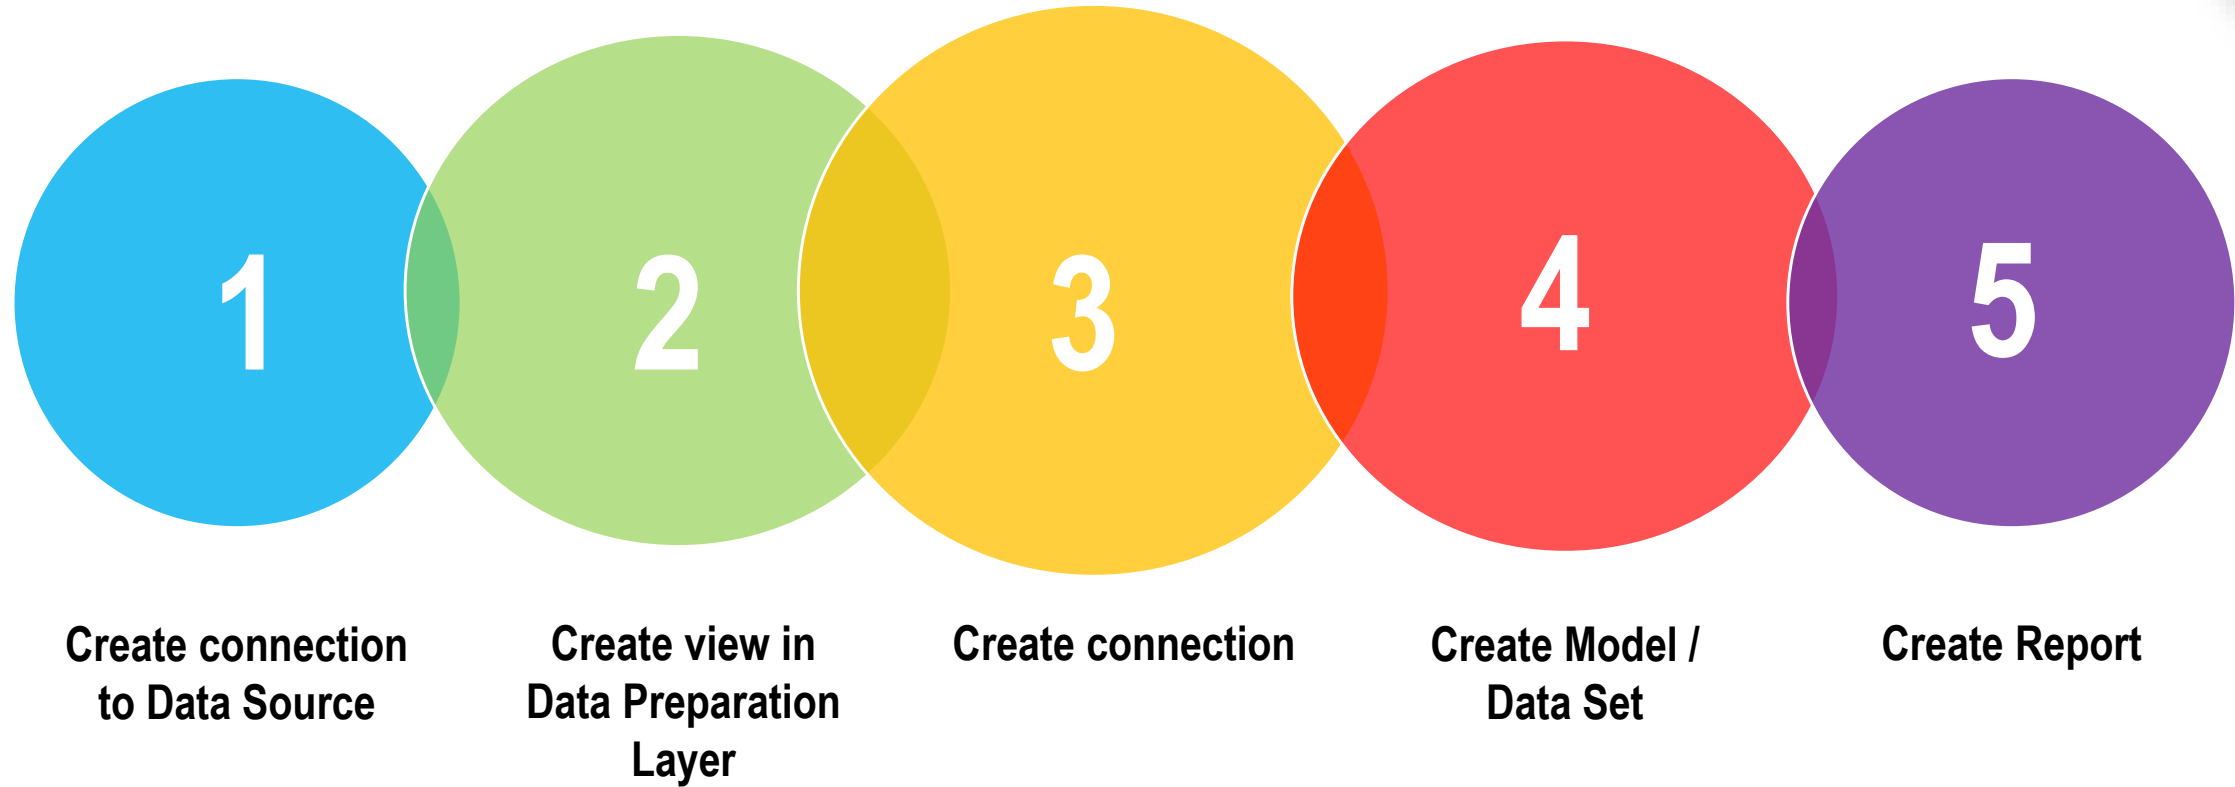

# DirectQuery to DWC with Live Data Gateway

# DirectQuery to DWC with Live Data Gateway

# 5 Simple Steps to Live Connectivity

# Notable Features of Live Data Gateway

**Multiple SSO  
options supported**

**Self Service BI  
Modelling**

**Scalable**

**High Availability  
support**

**GeoSpatial  
Support**

# APOS Solutions for SAP Analytics Cloud

## APOS Live Data Gateway

- High-performance live data connectivity
- Virtualized, governed, self-service connectivity
- Connect to Relational databases
- Connect to OLAP data sources
- Connect to Cloud data environments
- Connect to SAP Application data

## APOS Publisher for Cloud

- Automate secure information delivery
- Deliver timely information
- Create a flexible messaging environment
- Simplify administration
- Use multiple formats & destinations
- Burst stories with multiple filters
- Burst conditionally
- Collate stories
- Personalize PowerPoint bursting

## APOS Insight for Cloud

Monitor – tracking & alerting for:

- SAC story performance
- System response measures

Validation automated comparisons across SAC versions of:

- SAC story data
- SAC story performance
- SAC story structure

Impact analysis – granular auditing of SAC story structure metadata

## APOS Semantic Layer Migration

- Capture SAP BI Universe data connection and data modelling logic
- Project-based, wizard-driven interface
- Scan your SAP BI content for relevant data connections
- Harmonize SAP BI and HANA data modelling throughout Hybrid BI
- Translate SAP BusinessObjects modelling to SAP HANA Calculation Views
- Translate SAP BusinessObjects modelling to a unified semantic layer

# APOS Solutions for SAP BusinessObjects

## APOS Insight

### BI System Auditing

- System Inventory
- Security Analysis
- System Usage Analysis
- Report Impact Analysis

### BI Report Testing

- Automated Report Testing
- Regression Testing
- Validation of Report Data
- Report Performance Testing

### BI System Monitoring

- Advanced System Monitoring
- Operating Environment Monitoring
- Database Monitoring
- Process Monitoring

### BI Query Surveillance

- Real-time BI Query Monitoring
- Query Performance Alerting & Auditing
- Query Intervention; Remote Cancelling
- Sensitive Data Audit

## APOS Administrator

### Object Management

- Bulk Security Management
- Bulk Settings Management
- System Objects Promotion
- Connections Maintenance

### Schedule Management

- High-volume schedule management
- Multiple schedule properties editing
- Grid scheduling interface
- Repeatable scheduling templates

### Instance Management

- Manage entire instance inventory
- Granular instance search
- Stop, pause, release, reschedule
- Rapid recovery to failed schedules

### Web Intelligence Migration

- Bulk conversion of Universes from UNV to UNX
- High-Volume Repoint Web Intelligence reports
- Success validation
- Controlled, project-based workflow

## APOS Storage Center

- System Backup
- Content Archiving
- Content Versioning
- Selective Restoration
- Automated System Clean Up

## APOS Publisher

- Systematic Content Delivery
- Advanced Document Bursting
- Enhanced Content Distribution
- Security and Encryption
- Statement Generation

# Upcoming Events

## SAP BusinessObjects Report Query Management & Governance – Webinar

March 10, 2022 - 11am EST

In this session, you will learn how APOS Insight can help you:

- Gain visibility into the performance of your BI queries
- Manage and automate controls over long-running queries
- Audit the details of your BI queries, and understand who is executing the queries
- Track the usage of sensitive data
- Fulfill all the points above without reliance on your DBA team

**APOS Insight** is a comprehensive solution that gives you the knowledge you need for effective and efficient SAP BI system management, including detailed system metadata for thorough system auditing, system monitoring, query surveillance, and BI report testing. It provides the means to maintain the integrity, efficiency and security of your SAP BusinessObjects environment and infrastructure....and much more.
