# Solution Update

## APOS Live Data Gateway

# Today's Session

## *Key Topics*

- Live Connectivity for Analytics
- Live Data Gateway Overview
- Solution Features Update
- Q&A – see webinar console

## Today's Presenters

**ALLAN PYM**

Chief Operating Officer  
APOS

**ALAN GOLDING**

Solution Consulting Manager  
APOS

## Who is APOS?

- Formed in 1992
- Enabling BI data connectivity, platform management, administration, migration, governance and compliance
- Simplifying, automating, extending SAP BusinessObjects and SAP Analytics Cloud
- Strategic SDK development and consulting
- Hundreds of customers globally

**APOS**

**SAP  
BusinessObjects**

**Hybrid BI**

**SAP  
Analytics Cloud**

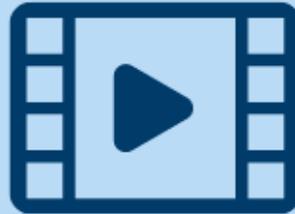

**EXTEND  
SAP ANALYTICS**

## HOUSEKEEPING

**You will have  
access to the  
slides via  
email**

**You will get  
the recording  
within 24  
hours**

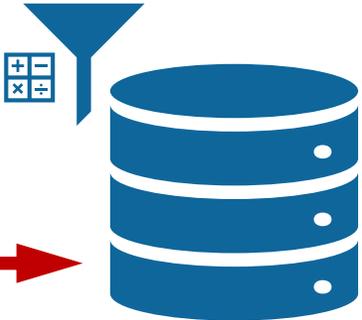

**Tell us how  
we did in the  
survey**

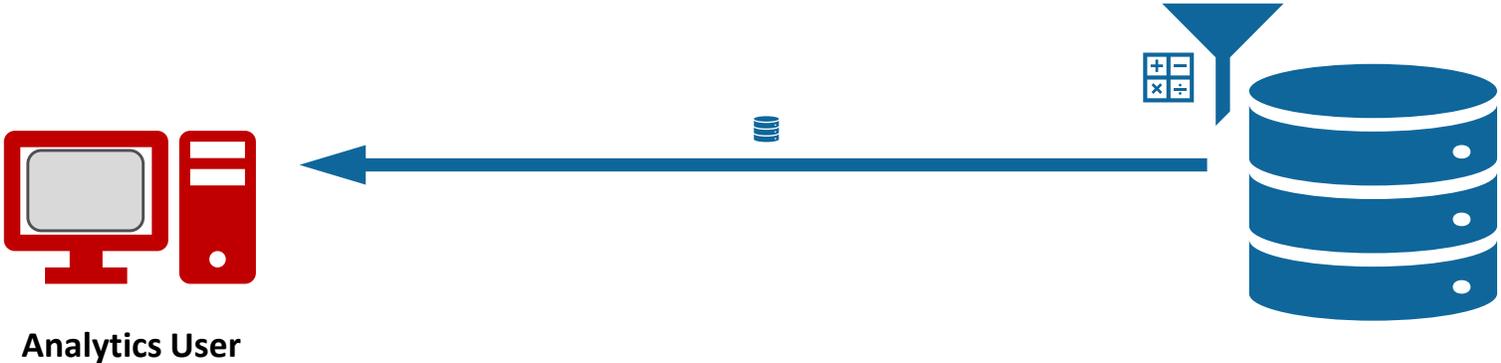

# Live Data Analytics

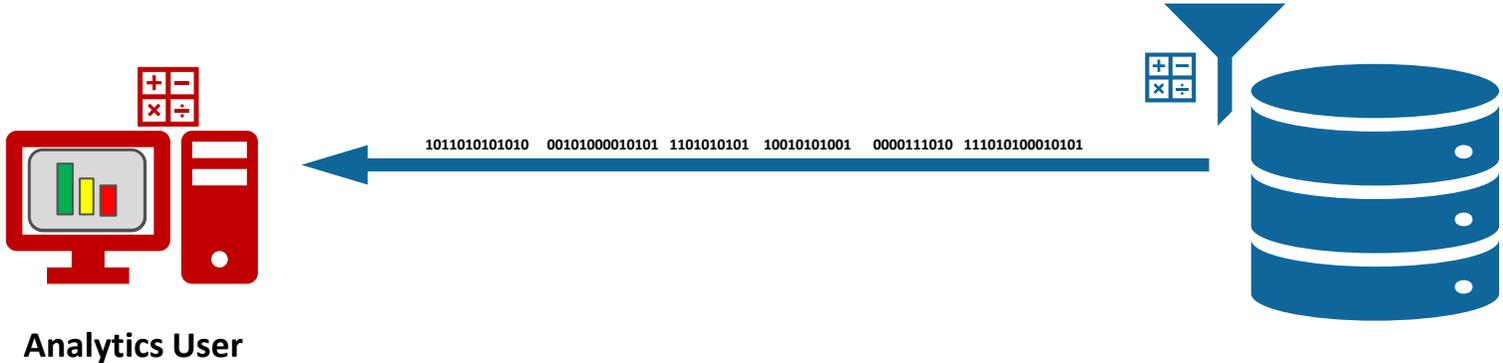

Analytics User

# Live Data Analytics

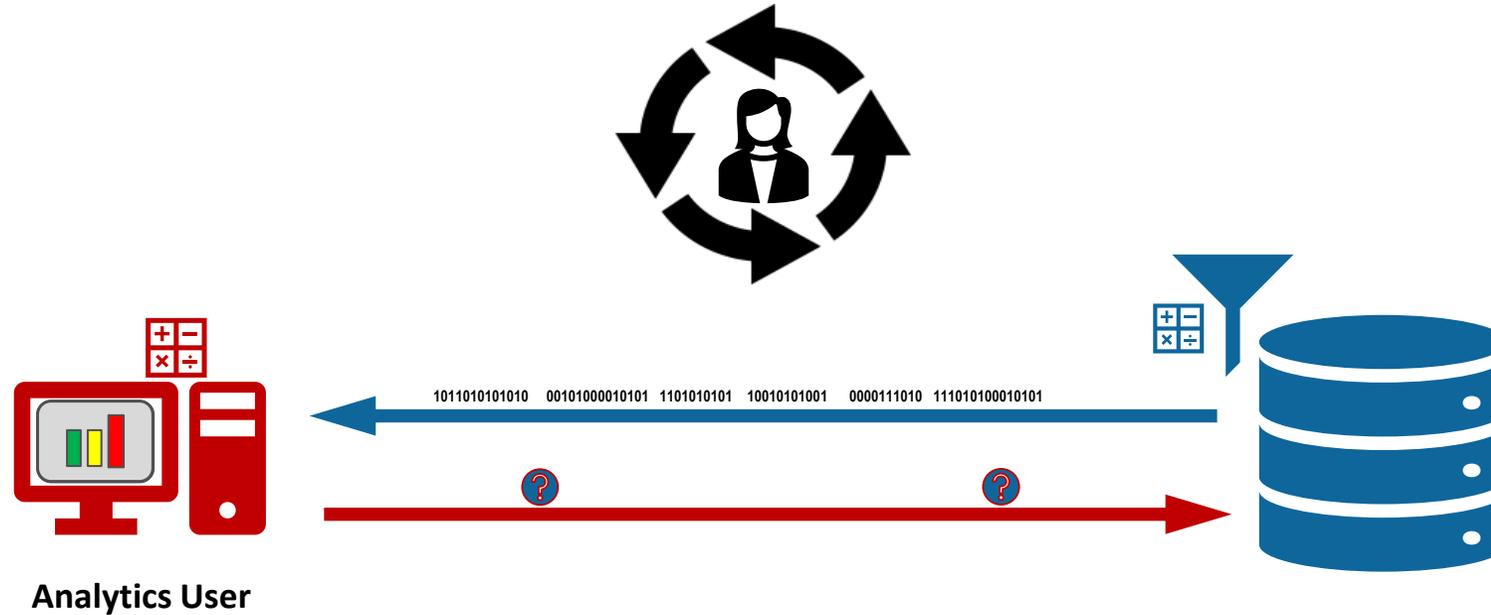

# Live Data Analytics

Analytics User

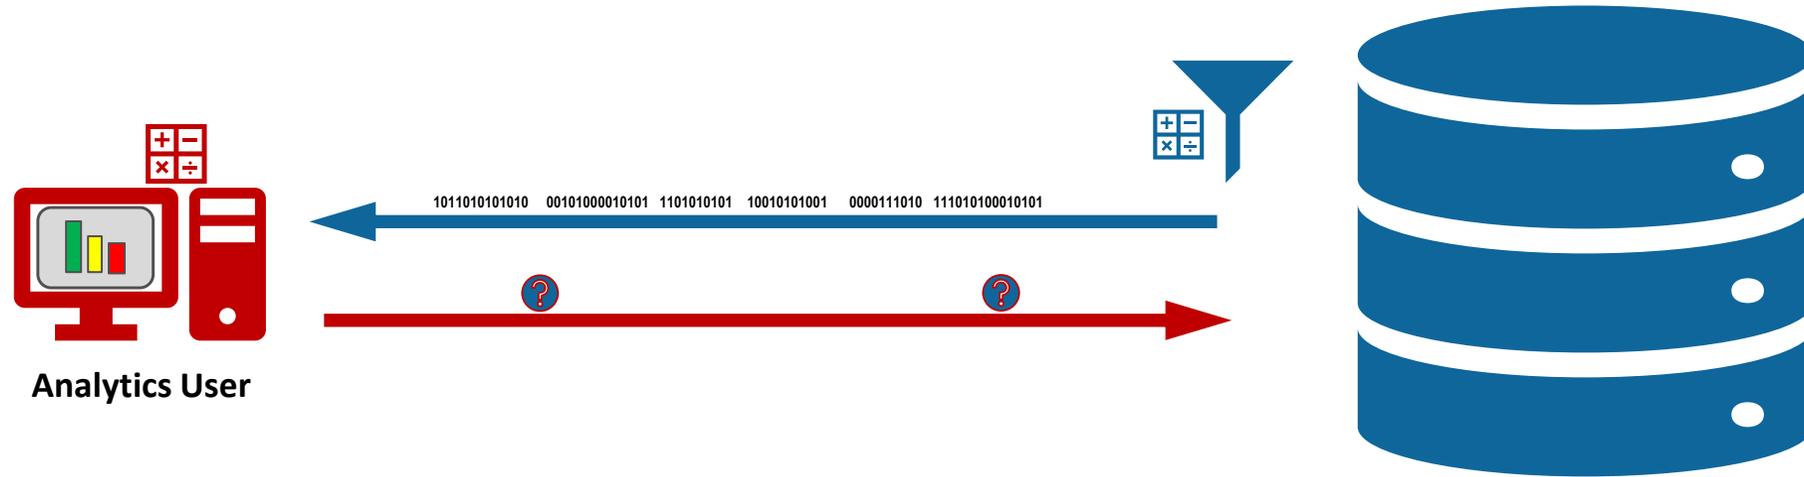

# Live Data Analytics

## Key Benefits:

- No unnecessary movement of data
- Only focused queries requested, only focused data returned
- Reduced data transaction costs
- Database security controls are retained
- No need to remodel data within analytics solution

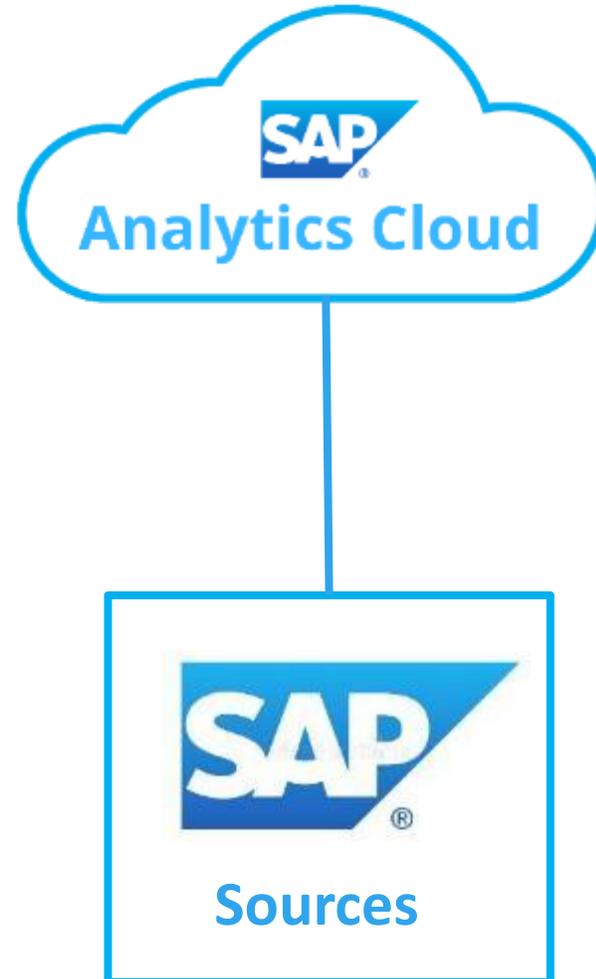

# Live Data Analytics – Important Factors

## Important Factors:

- Data volumes too large for data download or replication
- Significant changes in data technologies for high-performance
  - Cloud data platforms; In-memory platforms
  - Extremely fast & highly responsive
- Live connectivity now very viable with strong performance
- Live connectivity removes data latency
- Live connectivity can enable unified security

# SAC Connectivity

# Live & Import Connectivity

### Import Connection

Data moved into SAC data environment  
Data uploaded on a schedule, current to last upload  
Modelled & secured in SAC  
Supports Business Intelligence + Planning

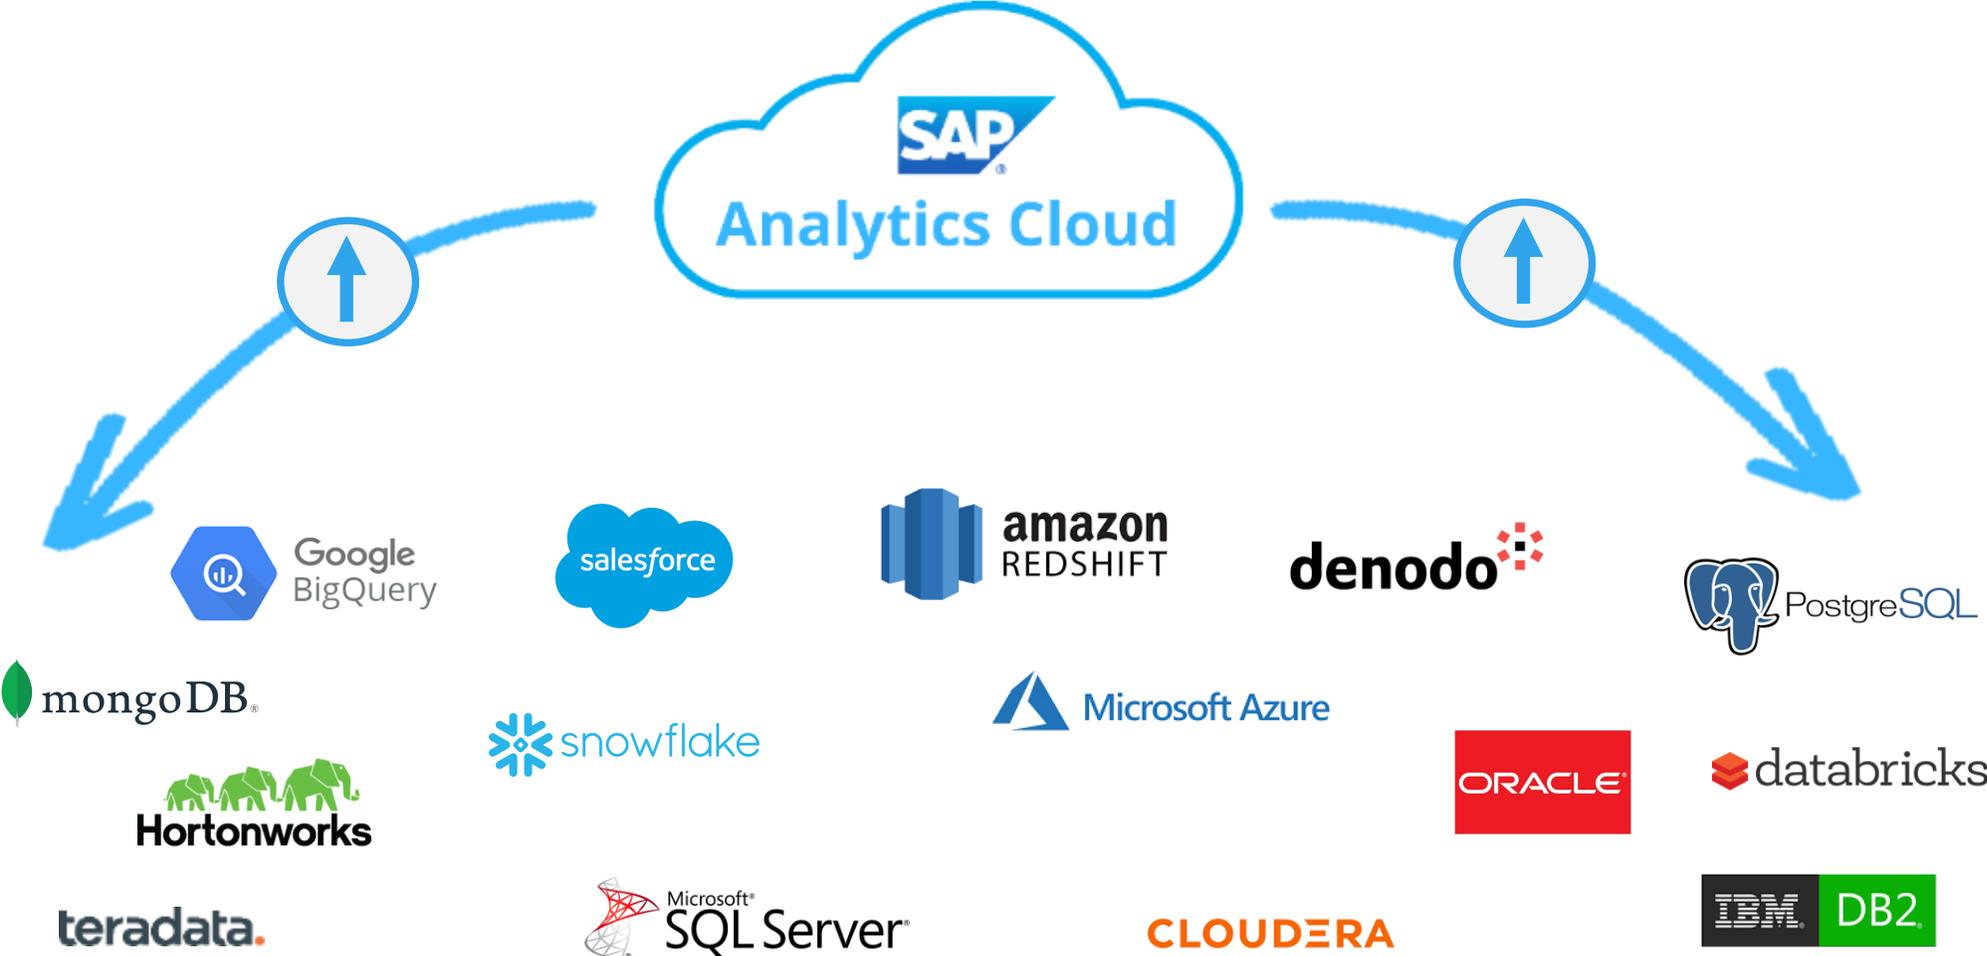

### Live Connection

Leverage data from existing location  
Data not moved and does not leave, always current  
Leverage existing modelling & security  
Supports Business Intelligence

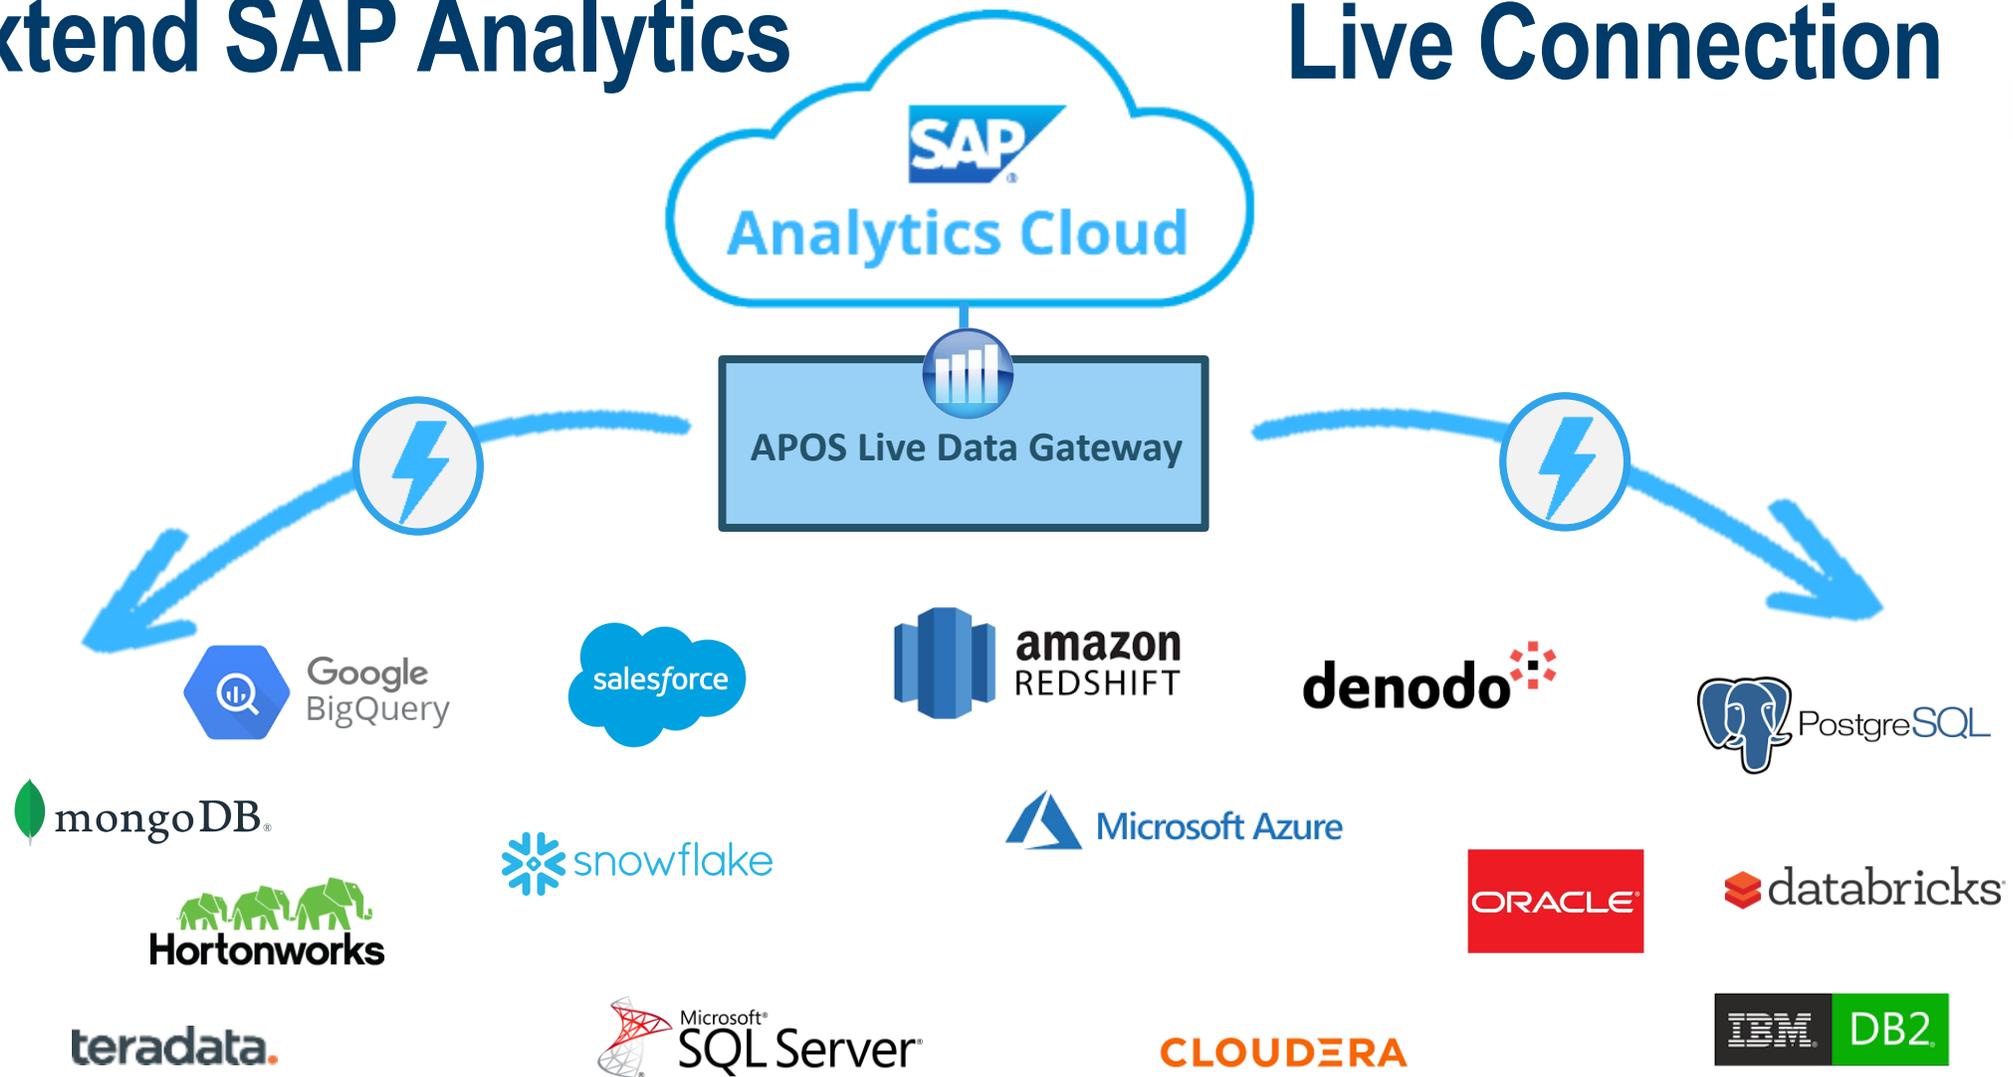

# SAC Connectivity to Non-SAP Sources - Import

# Extend SAP Analytics

# Live Connection

# APOS Live Data Gateway – Unlock Live Data

**APOS Live Data Gateway** is a middleware platform which provides virtualized data connection and data transformation to enable live data connectivity and expanded data source options for SAP Analytics Cloud, with a primary focus on **non-SAP data sources**.

Leverage data from its current location

No movement or importing of data

Leverage existing data modelling

Leverage existing security models

Data is always current

Data never leaves the firewall

No added data storage requirements

Reduce data bandwidth requirements

Available on  
**SAP Store**

# APOS Live Data Gateway

## Core Supported Data Sources

- Amazon Athena
- Amazon Aurora
- Amazon EMR
- Amazon Redshift / Redshift Spectrum
- Amazon S3
- Azure Analysis Services
- Azure Cosmos DB
- Azure Data Lake
- Azure SQL Database
- Azure SQL Data Warehouse
- Cloudera
- Databricks
- DB2
- Denodo
- Google BigQuery
- Google Cloud Platform
- Hortonworks
- Informix
- Microsoft SQL Server
- Microsoft Analysis Services
- Azure Blob
- Mongo DB, Mongo DB Atlas
- MySQL
- Netezza
- Oracle
- Oracle Essbase
- Oracle Exadata
- Postgres
- Presto
- Salesforce
- Snowflake
- Sybase IQ, Sybase SQL Anywhere
- Teradata
- SAP BusinessObjects Universes (UNV, UNX)
- SAP BW - version 7.3 and higher
- JDBC connectivity

**Extended Data Sources:** 100+ Additional data source and application connection options

**Alan Golding**  
Solution Consulting Manager  
APOS

# APOS Live Data Gateway

# APOS Live Data Gateway

# Live Data Gateway

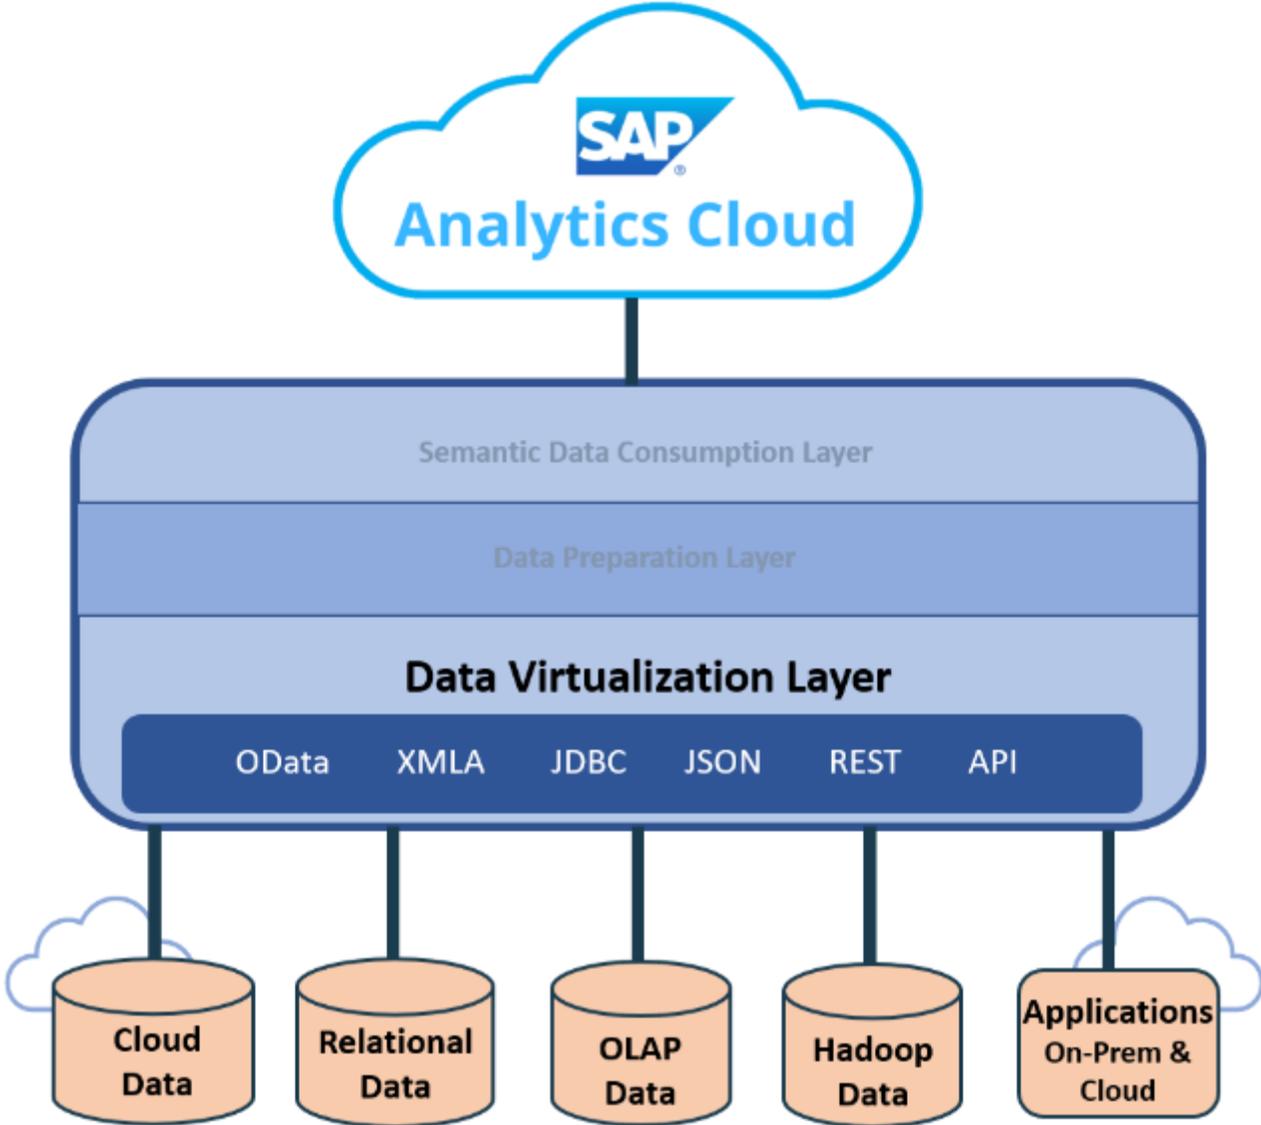

## Data Virtualization Layer

- Server level connectivity
  - Single point of connection to data sources
- Connect to wide range of sources + unique sources
- Data security
  - Respecting database security
  - Integrated SSO

# Data Virtualization Layer

# Live Data Gateway

## Data Preparation Layer

- Business layer / semantic layer
- Simplify data access for report builders
  - Self-service
- Control and govern access to data

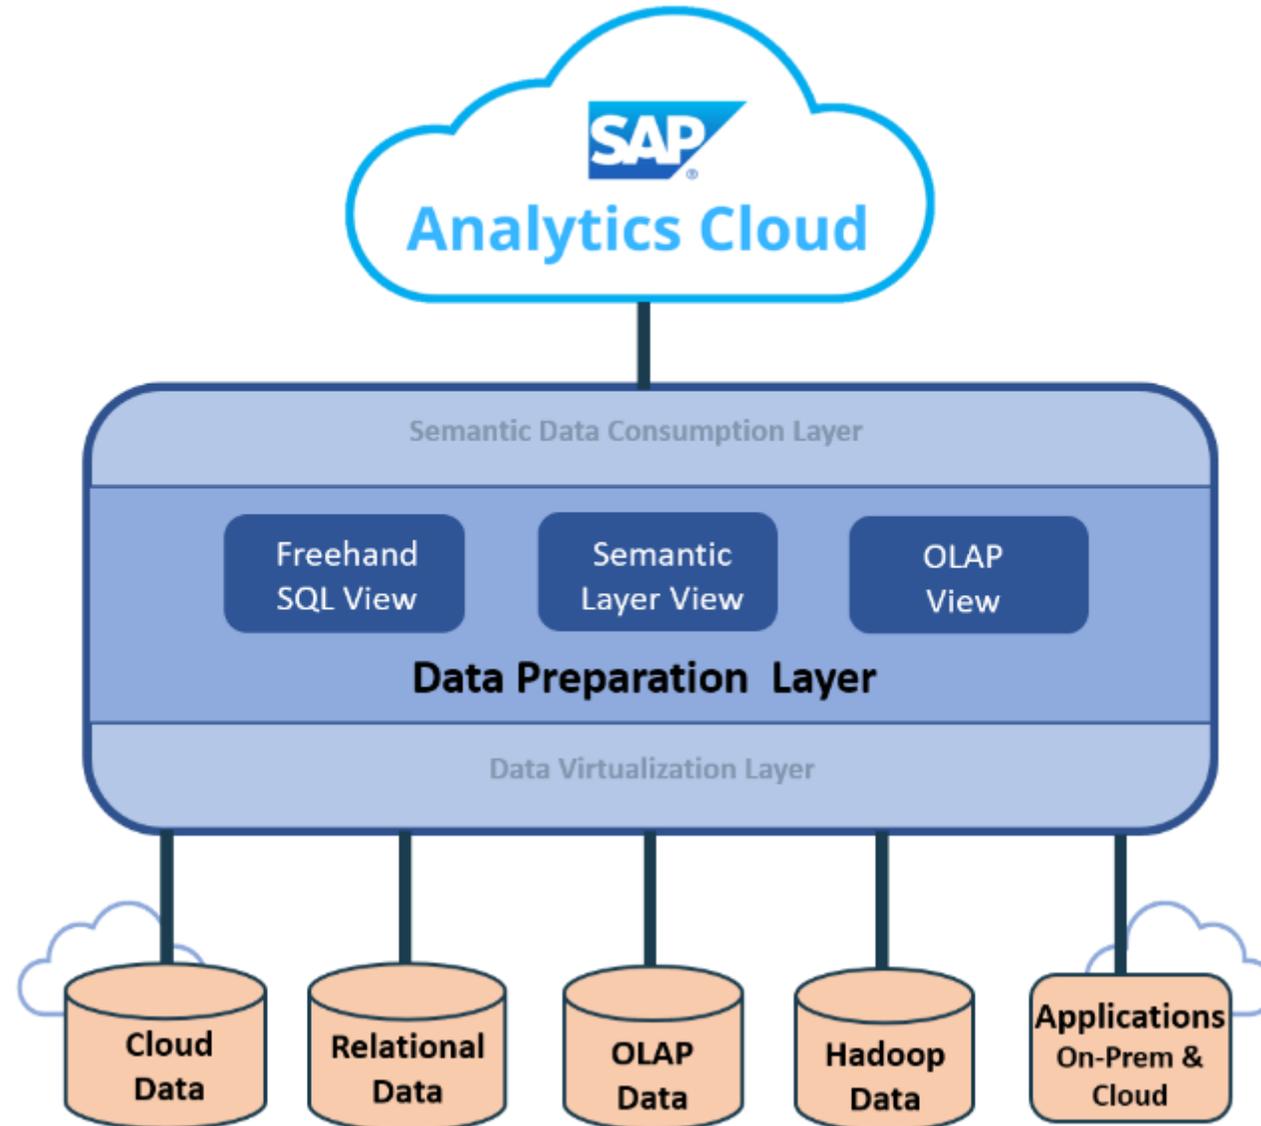

# Data Preparation Layer

## Data Preparation Layer Key Functions

- Define Measures and Dimensions
- Define what data fields are exposed
- Manage table links and joins
- Set meaningful field names

# Live Data Gateway

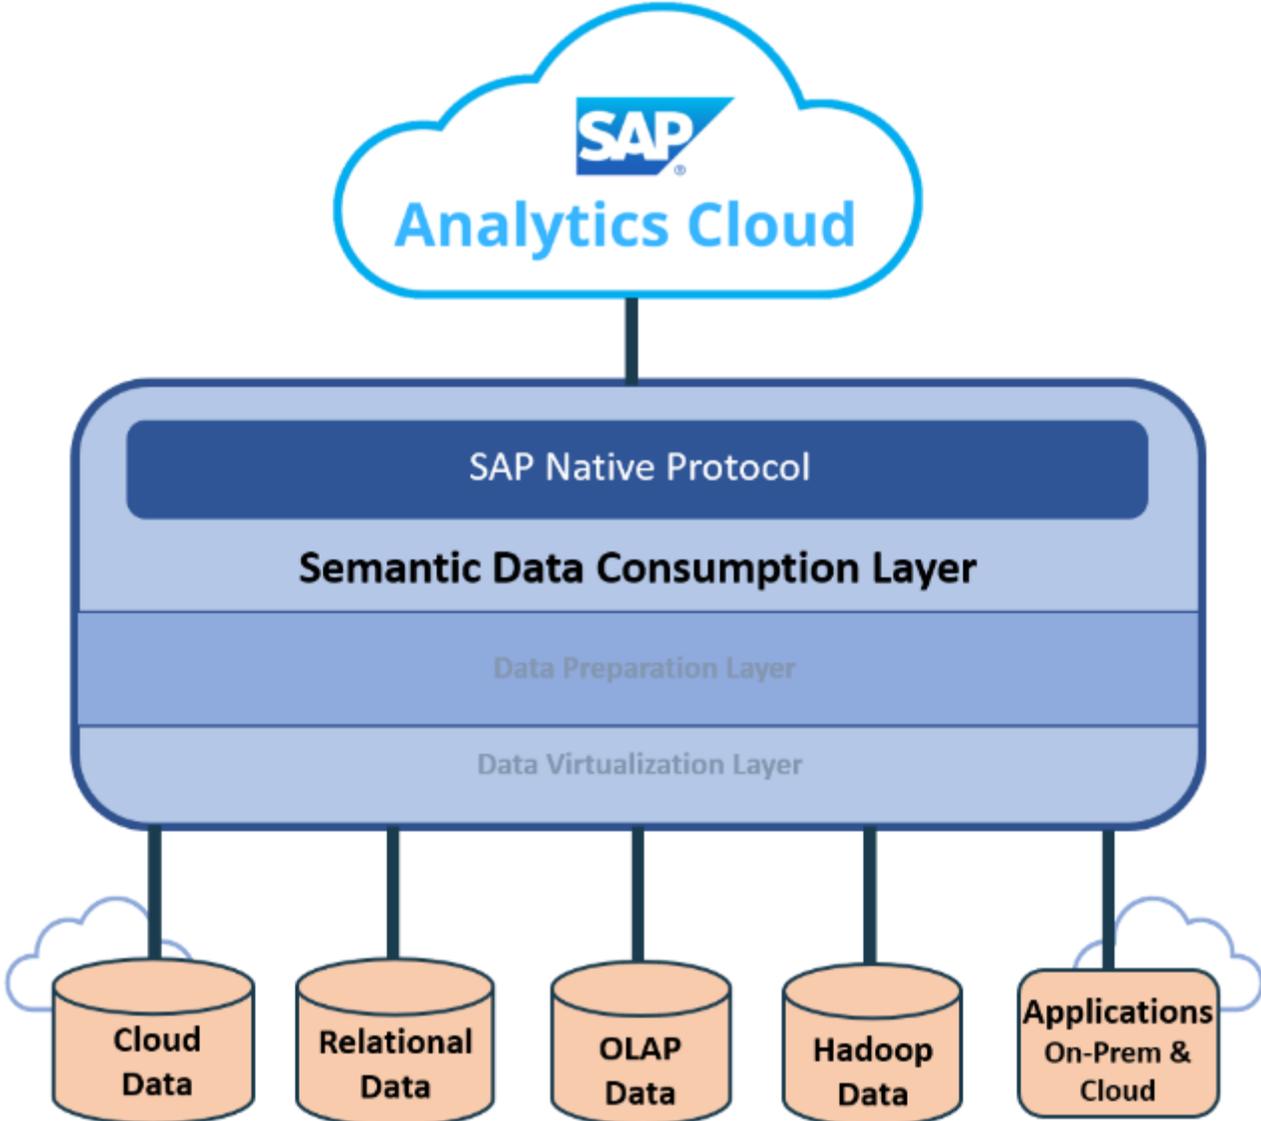

## Data Consumption Layer

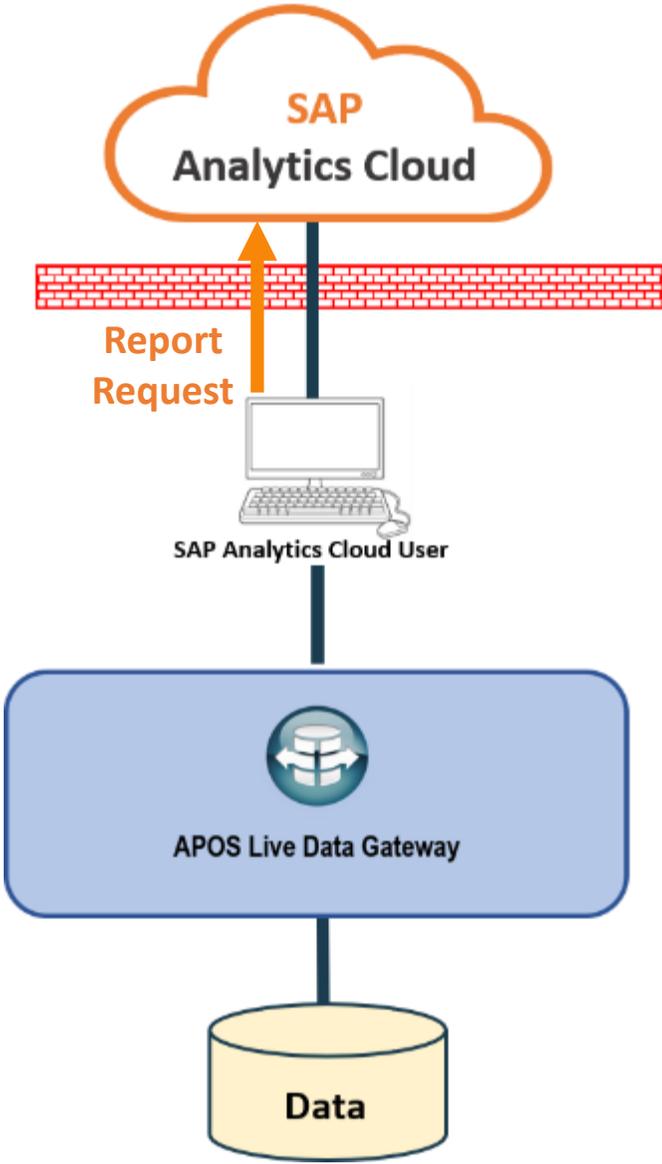

- Serve data to analytics consumer
  - Make needed translations for SAC consumption
  - Unified consumption layer for other consumers
- Secure communications

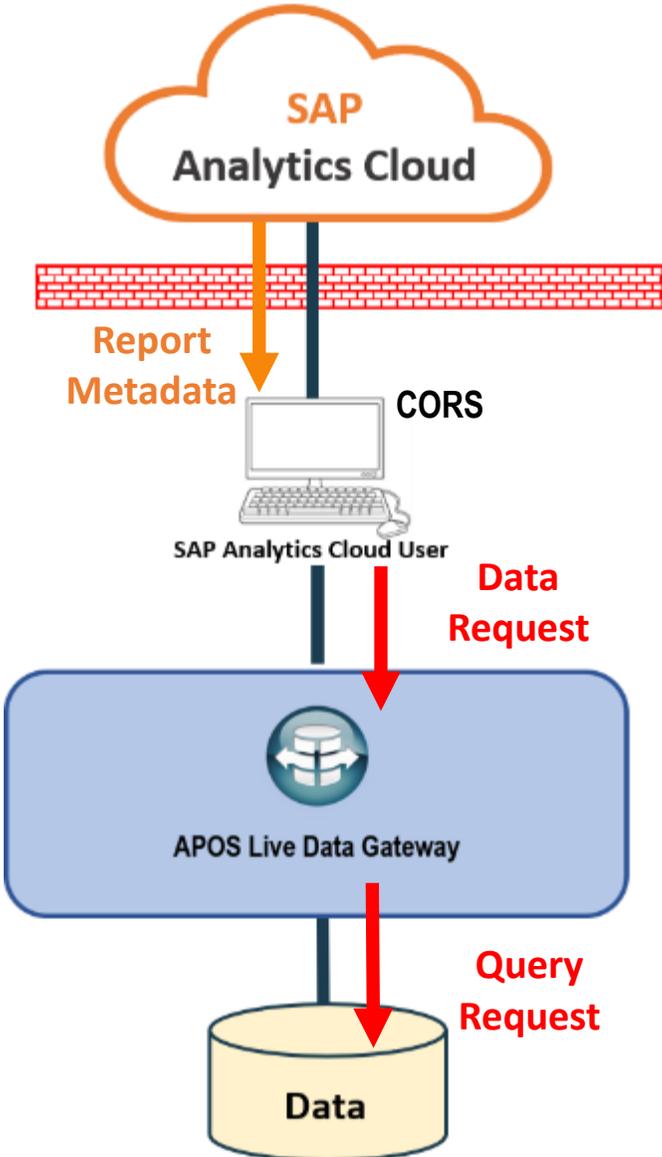

# Data Consumption Layer

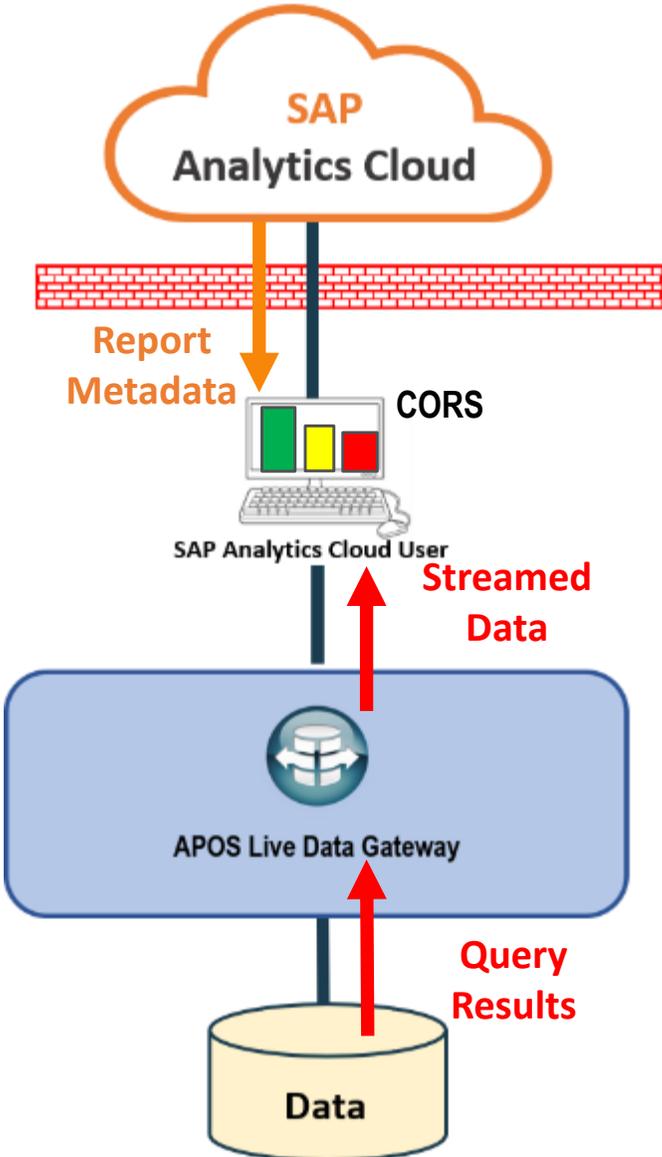

# Data Consumption Flow

# Data Consumption Flow

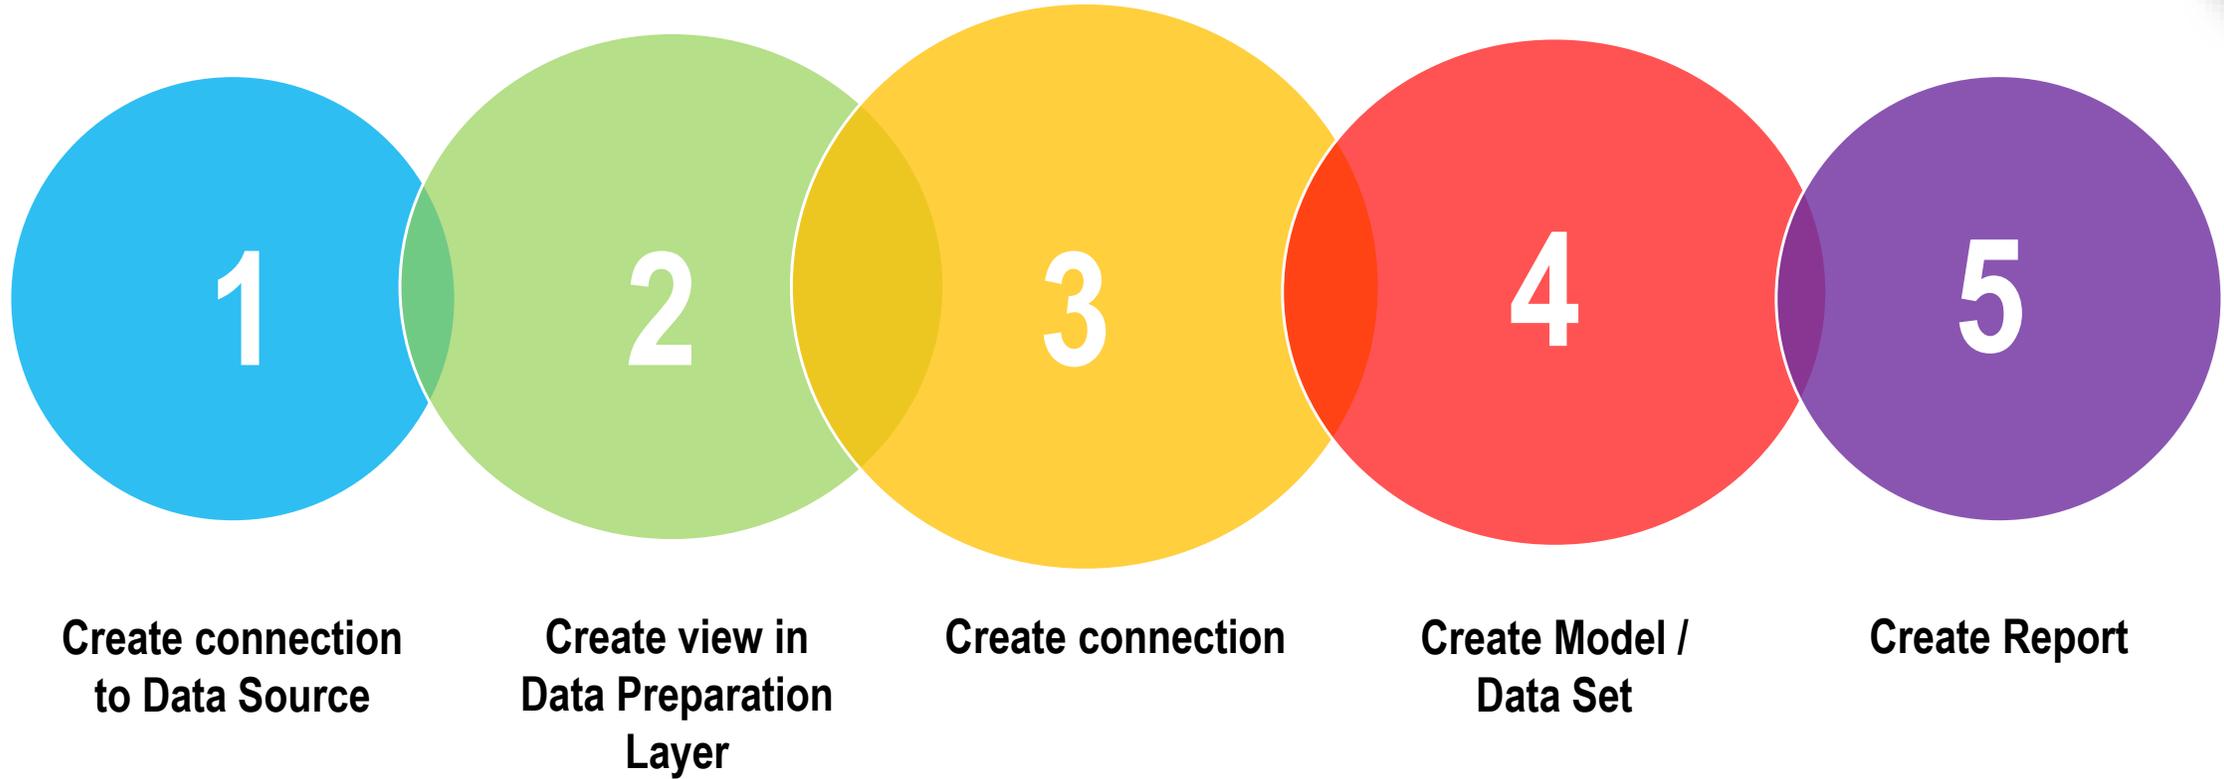

# Data Consumption Flow

# 5 Simple Steps to Live Connectivity

# Customer Success

Top-ranked global reinsurance organization utilizes Live Data Gateway to access Microsoft Analysis Services data and PostgreSQL data assets. Deployed as part of a finance transformation initiative, and complementing their S/4HANA system analytics.

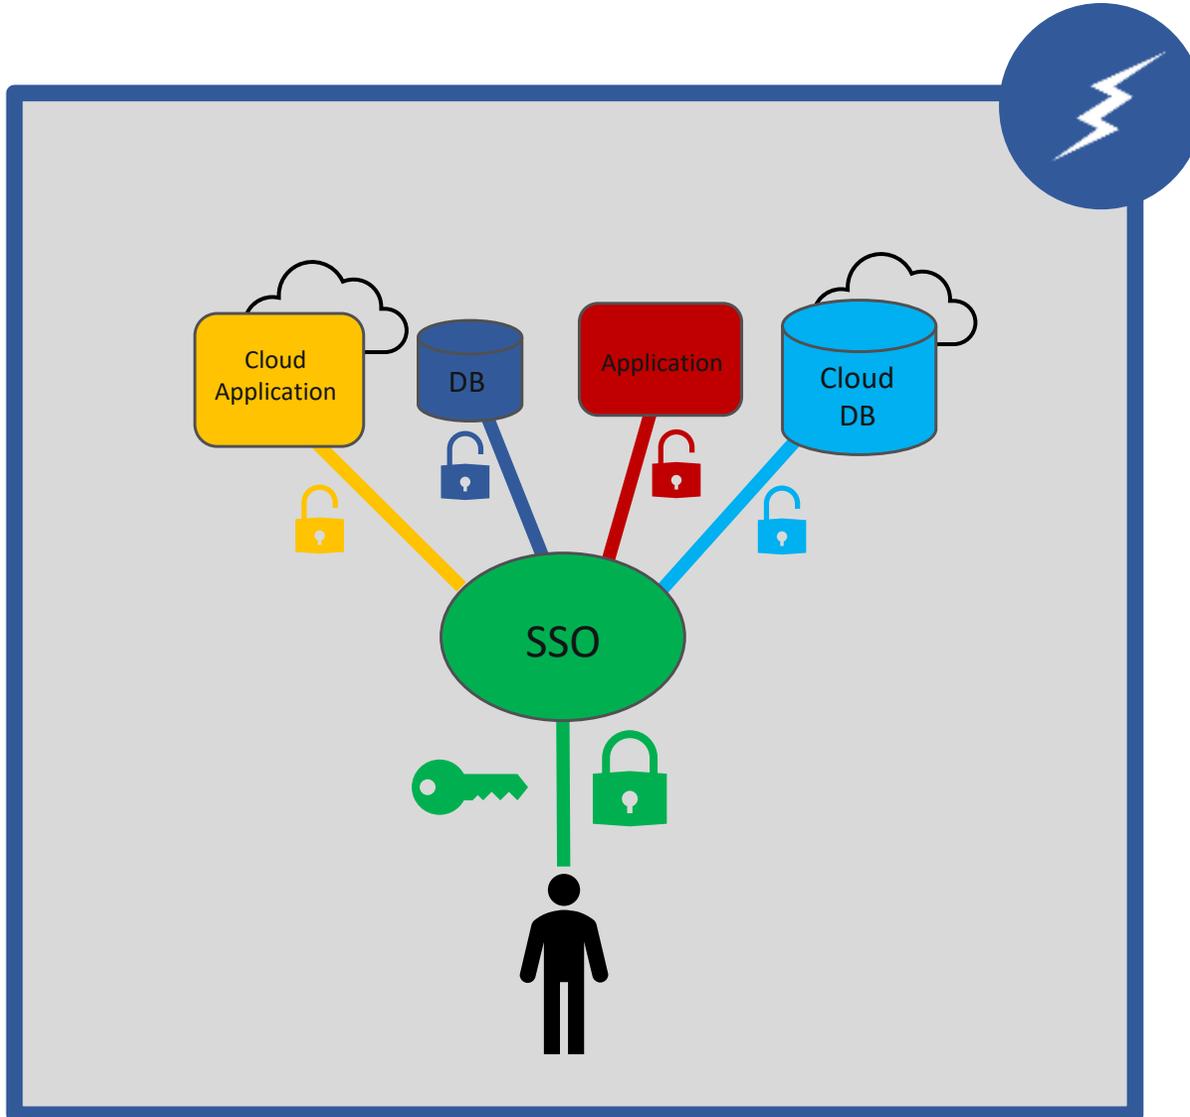

Large equipment manufacturer utilizes Live Data Gateway to enable reporting via live connectivity to Salesforce data and Google Analytics data.

European-based mining corporation utilizes Live Data Gateway for live connectivity to their AWS Redshift data assets.

International soft drink manufacturer utilizes Live Data Gateway to leverage data from their Snowflake deployment, alongside their SAP BW instance.

# APOS Live Data Gateway – Solution Update

## Expanded Functionality: **Single Sign On**

- Unified security authentication
  - Integrated to enforce data base security
  - Simplified User experience
- 
- Various SSO options supported
  - SSO Technologies we work with:
- |                    |                           |
|--------------------|---------------------------|
| • SAML             | • Kerberos with WinAD     |
| • Azure AD         | • Keypair Authentication  |
| • OKTA             | • User Impersonation      |
| • Google Cloud IDP | • Pre-Defined Cached User |
| • OAuth            |                           |

# APOS Live Data Gateway – Solution Update

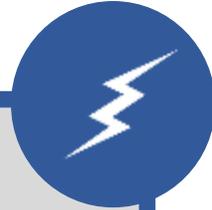

Expanded Functionality: **Single Sign On**

## Example

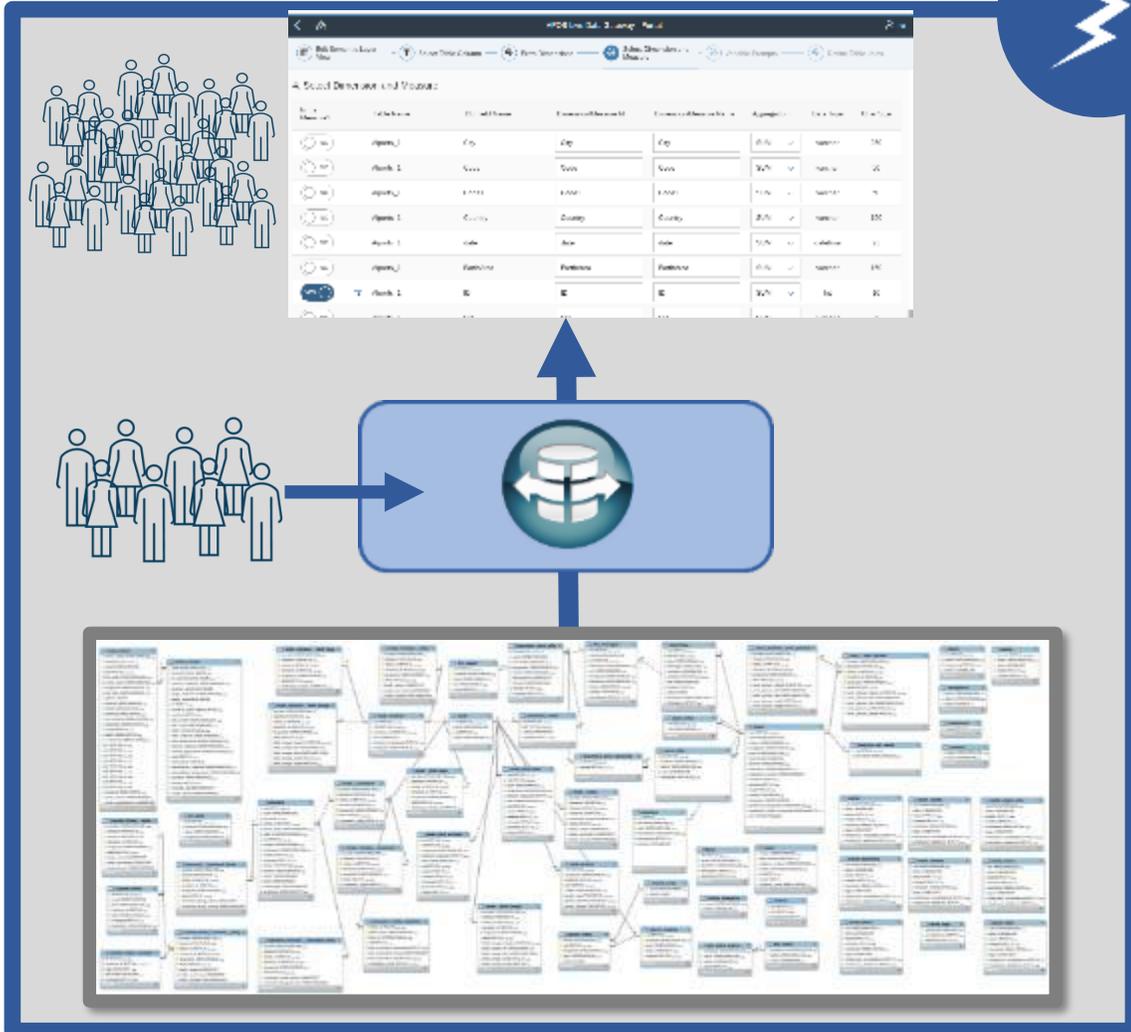

- End to End SSO with SAC and Snowflake
- Integrating SAML with oAuth and Azure AD

The screenshot shows the 'APOS Live Data Gateway Admin' web interface. The title bar includes the logo and the text 'APOS Live Data Gateway Admin'. Below the title bar is a 'File' menu. The main content area has four tabs: 'Connection', 'SSO Configuration', 'Date/Time and DB Functions', and 'Extra Properties'. The 'SSO Configuration' tab is active. Under the 'SSO' section, there is a 'Use SSO' checkbox which is checked. To its right is a 'SAC Authentication User Source' field with two radio buttons: 'NTLM' (selected) and 'SAML'. Below this are two dropdown menus: 'Authentication Type' set to 'IDENTITY PROVIDERS SSO' and 'Authentication Type Option' set to 'OAuth'. There is a 'User Can Self Add To The List' checkbox which is checked, and a button labeled 'Identity Providers SSO'. A section titled 'OAuth Information' contains four fields: 'OAuth Client ID' (masked with four asterisks), 'OAuth Secret' (masked with four asterisks), 'OAuth Scope' (containing the URL 'https://aposlivedatagateway.com/4d2a8c2b-a5f4-4b86-93ca-294185f4' and a blue circular icon), and 'OAuth Profile' (set to 'AzureAlan').

# APOS Live Data Gateway – Solution Update

## New Functionality: **Self-Service Data Modelling**

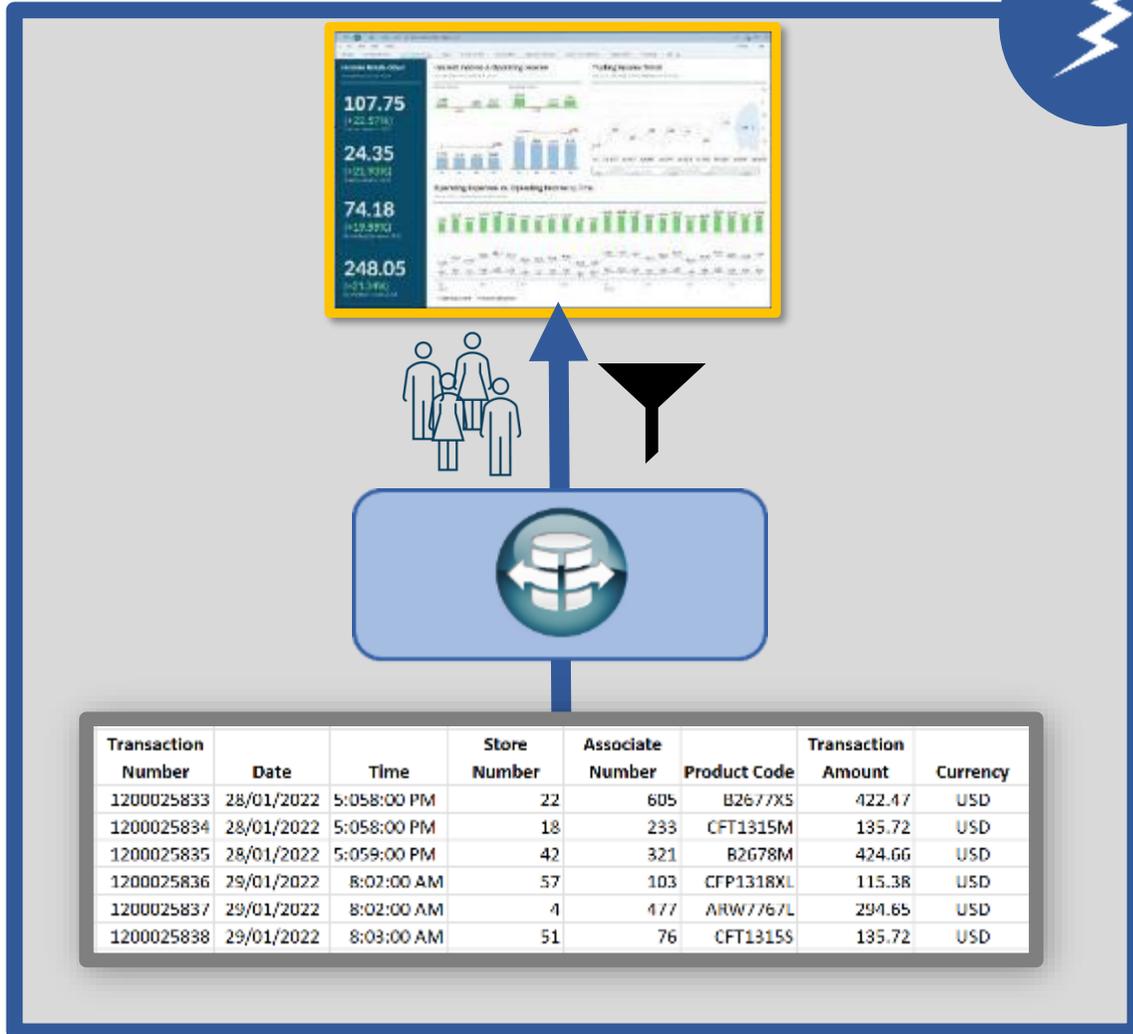

- Self Service creation of data modelling assets
- Expand from self-service analytics to self-service modelling
- Strengthen independence of Analytics team
- Reduce IT dependence
  
- Web-based modelling interface
- Controlled user access to modelling
- SSO enabled
- Multiple options for building views

# APOS Live Data Gateway – Solution Update

## New Functionality: **Variables Support**

- Powerful data filtering
- Simplified User experience
- Improved analysis
  
- Create Custom Variables
- Supported in both Client Tool and Web UI
- Utilize formulas
- Utilize full set of values or custom set of values

# APOS Live Data Gateway – Solution Update

## New Functionality: **Variables Support**

- Choose dimension
- Allow Multiple Values
- Set Defaults
- Utilize formulas
- Set full set of values, or query, or static values

# APOS Live Data Gateway – Solution Update

## New Functionality: Geospatial Data Support

- Supply data for representation on a map
- Highly visual analytics
- Improved analysis
  
- Geo Spatial Dimensions Support
- Multiple Projections supported
- Multiple Datasource Types Supported
- Configure Multiple Geo Dimensions

# APOS Live Data Gateway – Solution Update

## New Functionality: **Geospatial Data Support**

- Create GeoSpatial dimensions from WebUI with ease

The screenshot displays the 'Extra Dimensions' configuration step in the APOS Live Data Gateway web interface. The navigation bar at the top includes: Edit Semantic Layer View, Select Table Column, **Extra Dimensions** (active), Select Dimension and Measure, Variable Prompts, and Define Table Joins.

The main content area is titled '3. Extra Dimensions' and contains two options: '<> New Time Dimension' and '<> New Geospatial Dimension'. The 'New Geospatial Dimension' option is selected.

Below the options is a table with the following columns: View Name, Location Dimension Id, Location Dimension Name, Identifier for Mapping, Select Table, and Column Name - Latitude. The 'Select Table' and 'Column Name - Latitude' columns are highlighted in yellow.

<input type="checkbox"/>	View Name	Location Dimension Id	Location Dimension Name	Identifier for Mapping	Select Table	Column Name - Latitude
<input type="checkbox"/>	GeoSpatialDimension	GeoSpatialDimensionNa...	GeoSpatialDimensionNa...	GeoSpatialDimension	Aiports_1	Lat_3857

# APOS Live Data Gateway – Solution Update

## New Functionality: **Geospatial Data Support**

- Create Geo Maps on your stories in SAC

The screenshot displays the APOS Live Data Gateway interface. The main view is a geospatial map showing data points (red bubbles) distributed across South America and Africa. The interface includes a top toolbar with menus for Story, Data, File, Insert, Data, Format, Display, and More. A 'Designer' tab is active on the right, showing a 'Builder' panel with settings for 'Layer 1'. The settings include 'Data Source' (aaaGeoSpatial), 'Layer Type' (Bubble Layer), 'Location Dimension' (GeoSpatialDimensionName), 'Bubble Color' (+ Add Measure/Dimension), 'Bubble Size' (+ Add Measure), 'Filters' (+ Add Filters), and 'Cluster Properties'. A legend in the bottom left identifies the layer as 'GeoSpatialDimension...' with a red bubble icon. The map shows data points across South America and Africa, with labels for countries like Mexico, Colombia, Peru, and various African nations. A scale bar at the bottom indicates 2000km.

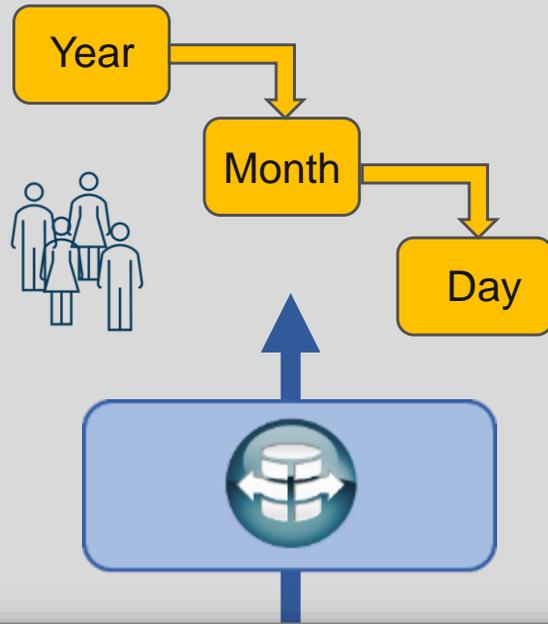

# APOS Live Data Gateway – Solution Update

New Functionality:

## Date Dimension Support

- Create date hierarchies on non-hierarchical data
- Simplified user navigation and experience
- Improved analysis
  
- Custom Date Dimensions Support
- Hierarchical Date Dimension Support
  - Drill Down
  - Time Series Charts
  - Variance Charts
- Hierarchies available as individual dimensions

Transaction Number	Date	Time	Store Number	Associate Number	Product Code	Transaction Amount	Currency
1200025833	28/01/2022	5:058:00 PM	22	605	B2677XS	422.47	USD
1200025834	28/01/2022	5:058:00 PM	18	233	CFT1315M	135.72	USD
1200025835	28/01/2022	5:059:00 PM	42	321	B2678M	424.66	USD
1200025836	29/01/2022	8:02:00 AM	57	103	CFP1318XL	115.38	USD
1200025837	29/01/2022	8:02:00 AM	4	477	ARW7767L	294.65	USD
1200025838	29/01/2022	8:03:00 AM	51	76	CFT1315S	135.72	USD

# APOS Live Data Gateway – Solution Update

## New Functionality: **Date Dimension Support**

- Select custom level of hierarchy needed
- Each level available as individual dimension also

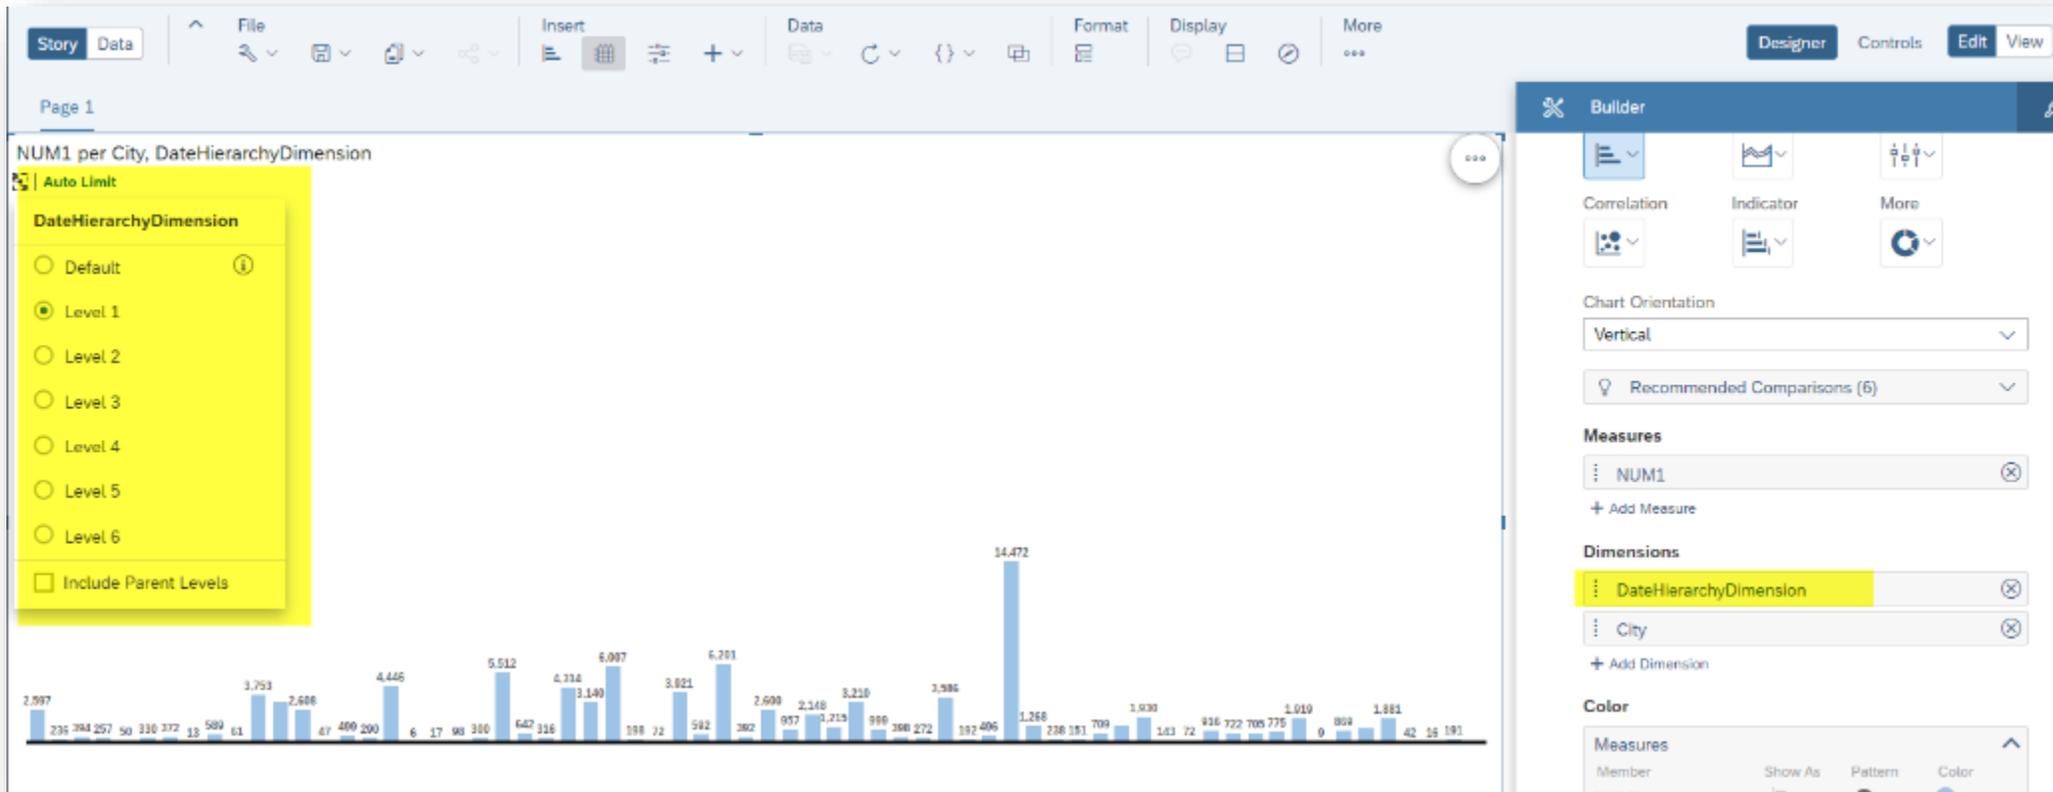

The screenshot displays the 'Extra Dimensions' configuration step in the APOS Live Data Gateway interface. The top navigation bar includes icons for 'Edit Semantic Layer View', 'Select Table Column', 'Extra Dimensions', 'Select Dimension and Measure', 'Variable Prompts', and 'Define Table Joins'. The main area is titled '3. Extra Dimensions' and contains a 'New Time Dimension' section. A table with the following columns is visible: 'Date/Time Field', 'Time Definition', 'Time Dimension ID', and 'Time Dimension Name'. The first row shows a 'date' field with a dropdown menu open, displaying a list of time hierarchy options: 'Year', 'Year, Quarter', 'Year, Quarter, Month, Day', 'Year, Quarter, Month, Week, Day', 'Year, Month, Day', 'Year, Week', and 'Year, Week, Day'. The 'Year' option is currently selected. Below this, a 'New Geospatial Dimension' section is partially visible, showing a table with columns for 'View Name', 'Location Name', 'Identifier for Mapping', 'Select Table', and 'Column Name - Latitude'. The '4. Select Dimension and Measure' section is also partially visible at the bottom.

# APOS Live Data Gateway – Solution Update

## New Functionality: **Date Dimension Support**

- Drill Down
- Time Series Charts
- Variance Charts

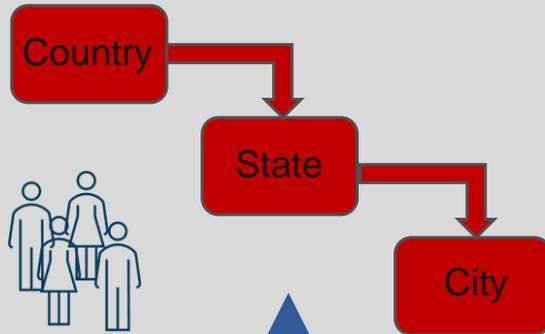

# APOS Live Data Gateway – Solution Update

New Functionality: (coming soon)

## Custom Dimension Support

- Create custom hierarchies on non-hierarchical data
- Simplified user navigation and experience
- Improved analysis
  
- Provide ability to create custom dimensions on non-hierarchical data
- Simplified User experience for building and consuming analytics
- Drill down functionality for non-date based dimensions
- Level Type Hierarchies will be supported

# APOS Live Data Gateway – Solution Update

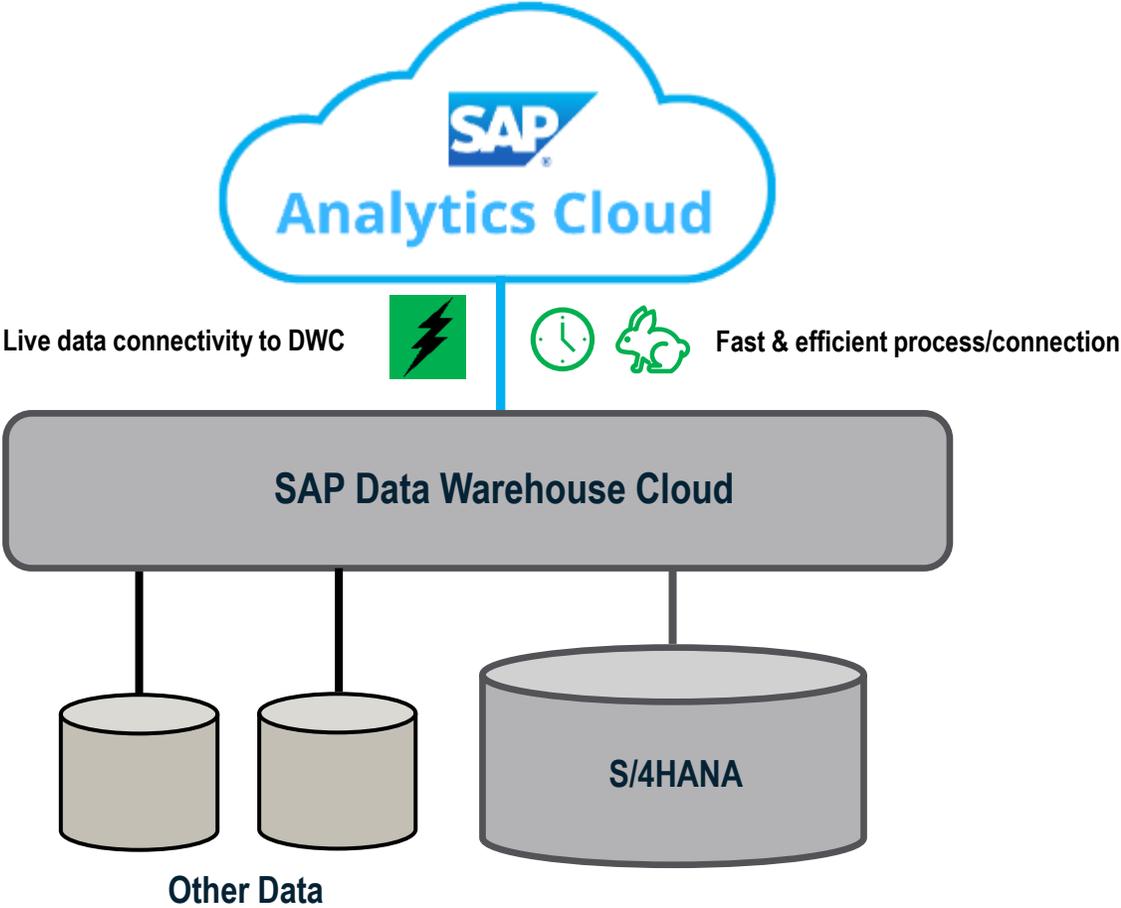

SAP Data Warehouse Cloud

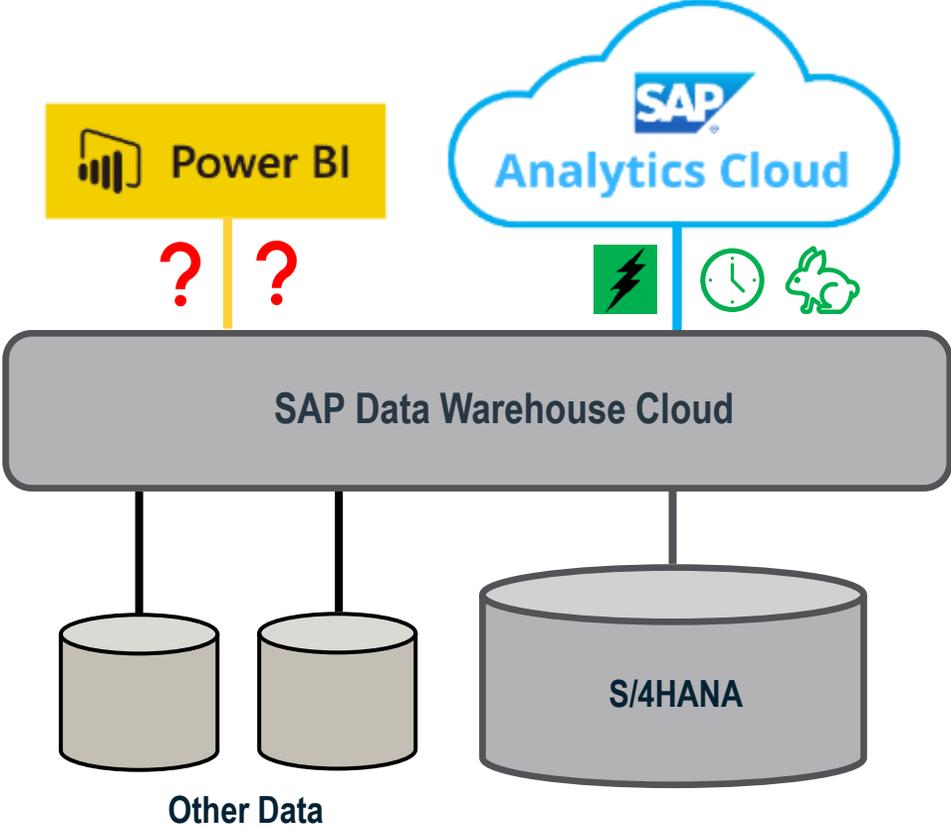

## New Functionality: **Power BI to SAP DWC Support**

- Connect Live from Power BI to SAP DWC (Data Warehouse Cloud)
- Expand how SAP DWC data can be leveraged
  
- Power BI DirectQuery connection support
- Quick access to SAP DWC data in Power BI
- No data load wait times
- No movement of data from SAP DWC
- Effective connectivity for large data sets

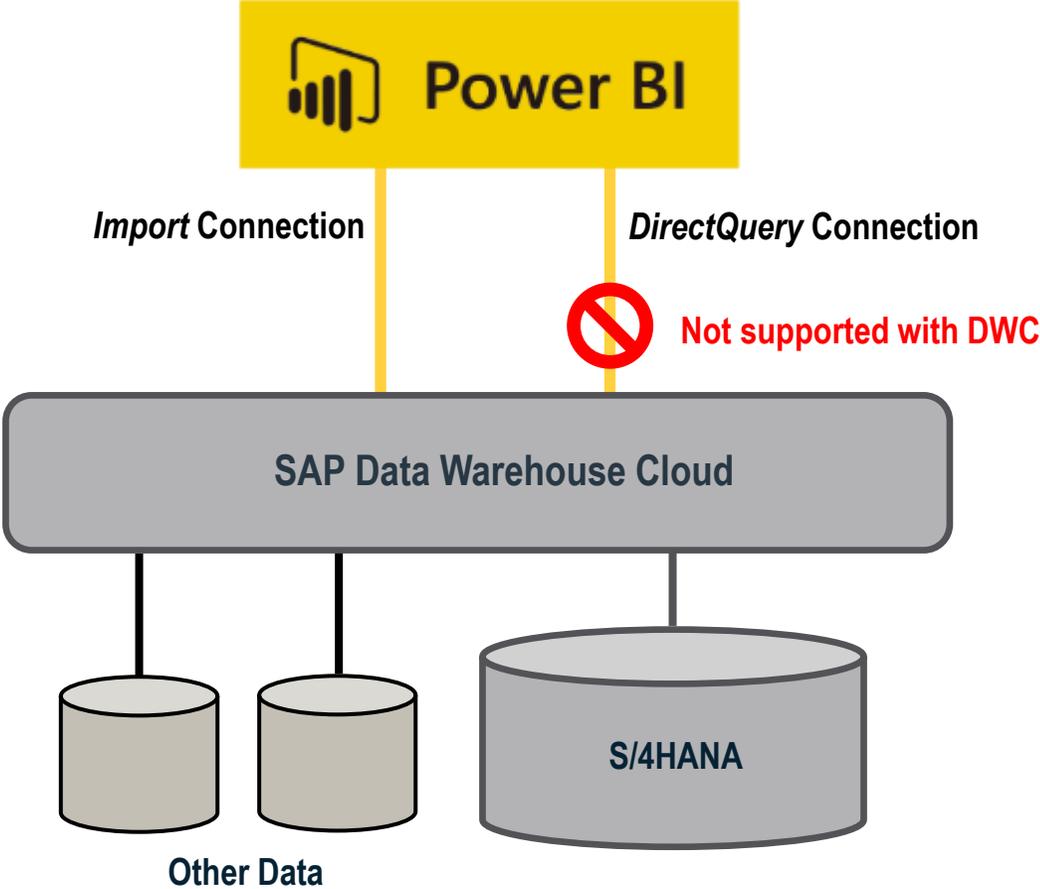

# Built-in Live Connectivity from SAC to DWC

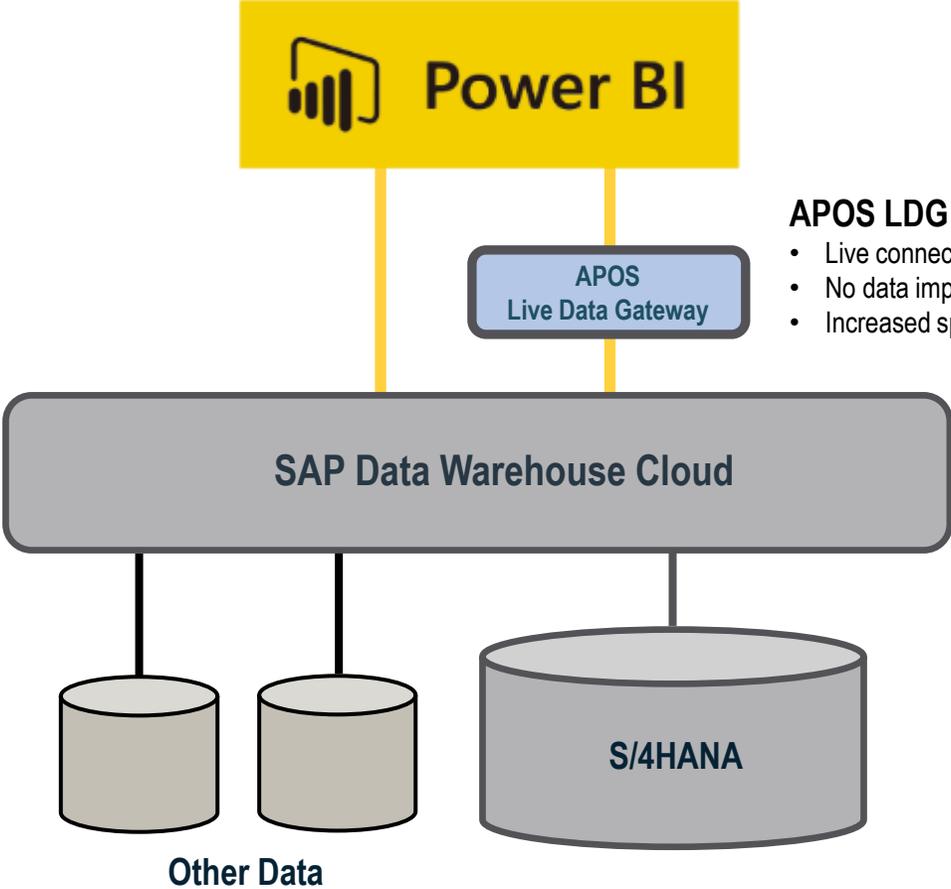

# Power BI Connectivity to DWC

# Power BI DirectQuery to DWC

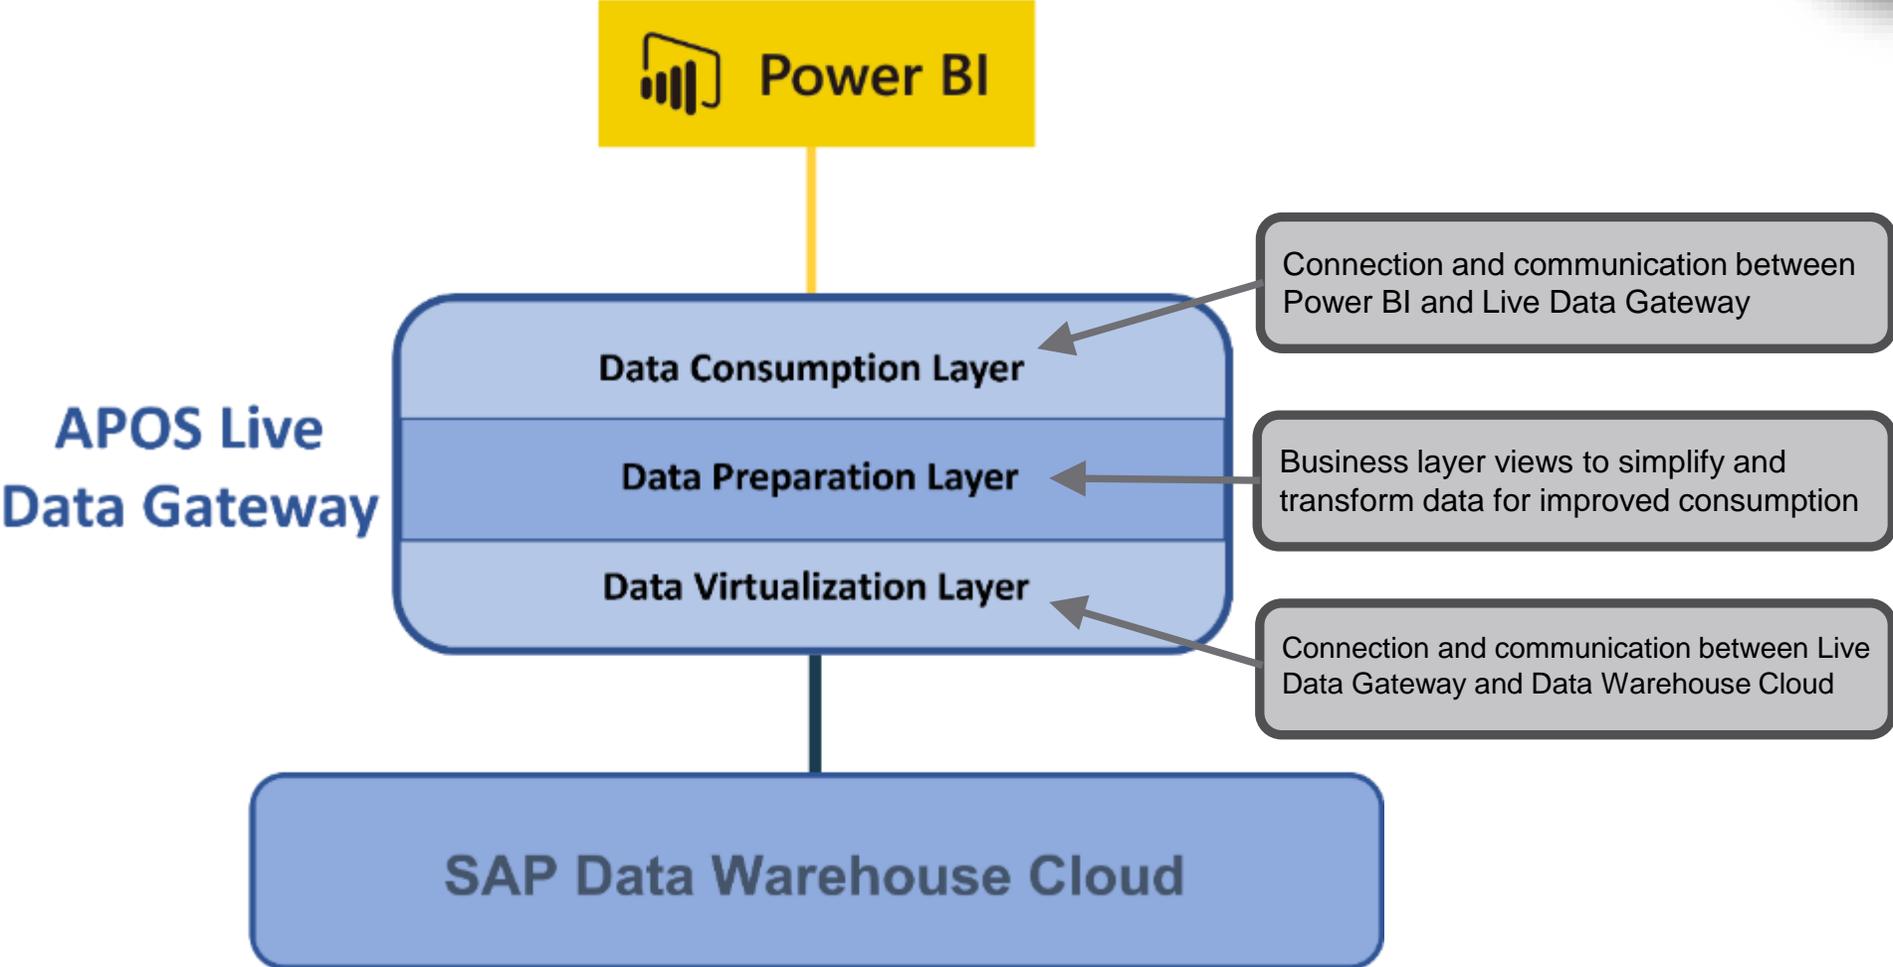

# DirectQuery to DWC with Live Data Gateway

### APOS LDG enables *DirectQuery* Connection

- Live connection to DWC with direct, targeted queries
- No data import into PBI = no data latency or analytics latency
- Increased speed & efficiency of data process

# Direct Query Connectivity with Live Data Gateway

# APOS Live Data Gateway – Solution Update

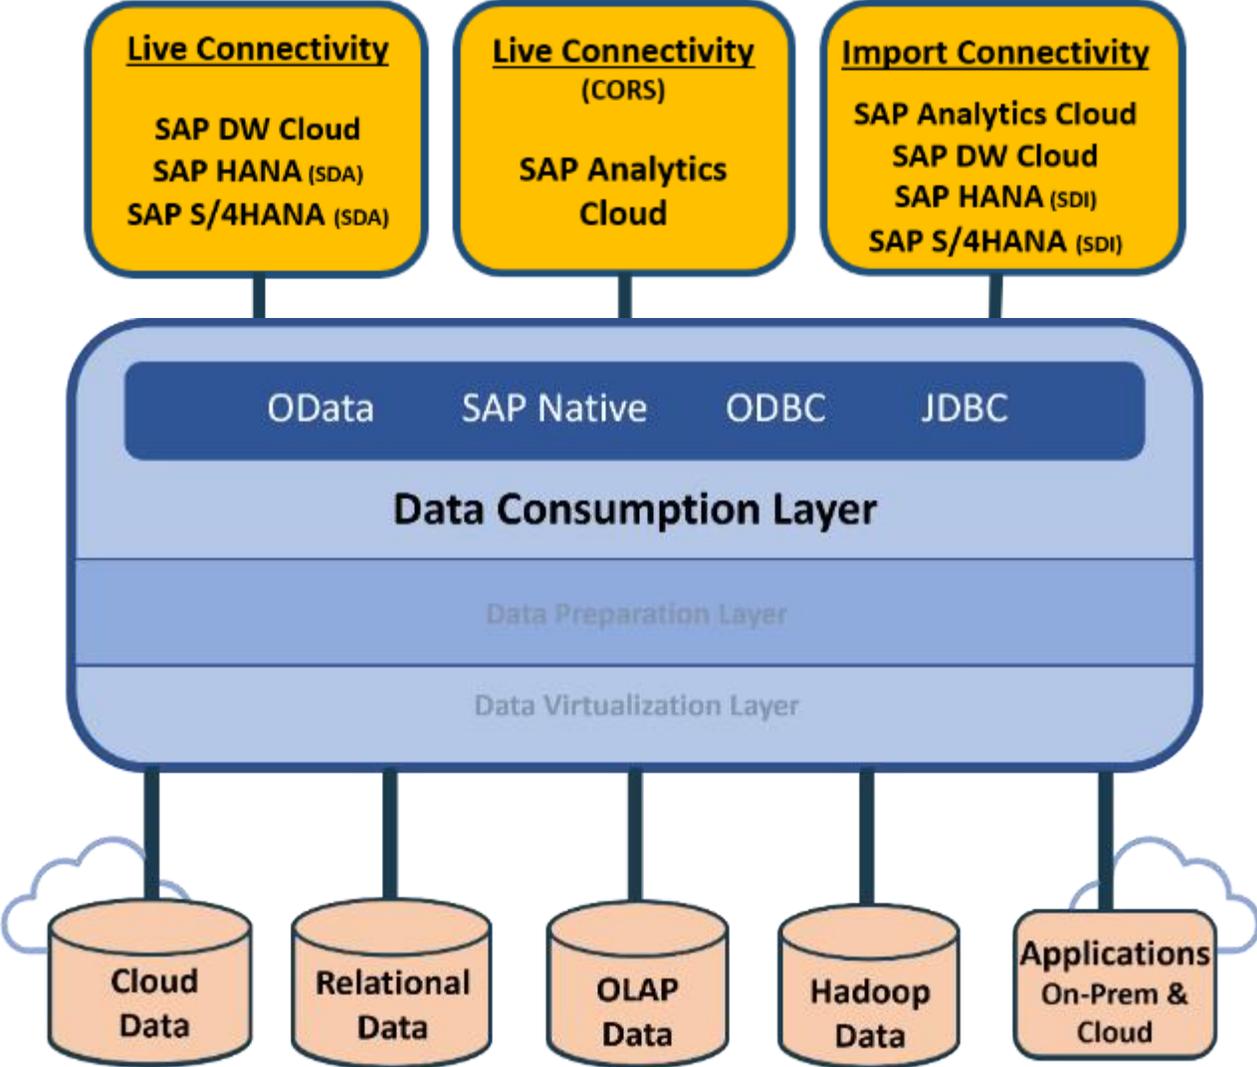

New Functionality:

## Expanded Consumption Protocols

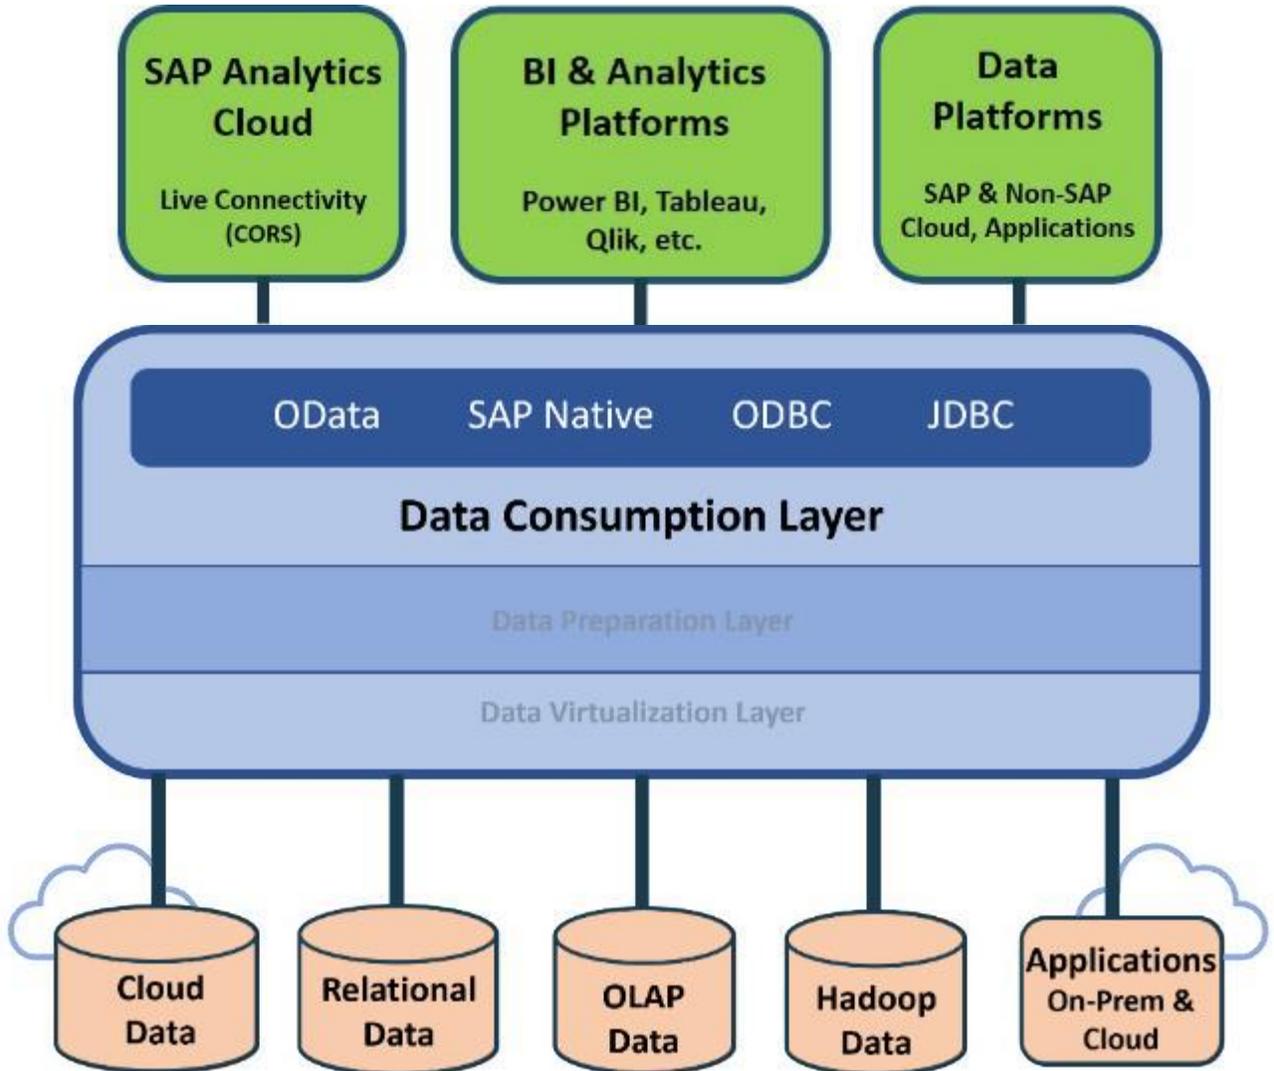

- Support for broader consumption of data from Live Data Gateway
- Additional data platforms and analytics platforms
- Unified semantic layer
  
- Support for consumption of data via:
  - OData
  - ODBC
  - JDBC
- Consistent data connection layer
- Consistent semantic layer

# APOS Live Data Gateway – SAP Landscape

# APOS Live Data Gateway – Unified Semantic Layer

# APOS Live Data Gateway – Session Summary

## Live Data Gateway Overview

- Live Data Connectivity from SAC to non-SAP Sources
  - Direct, Fast, Efficient
  - Data Virtualization Layer
  - Data Preparation Layer
  - Data Consumption Layer

## Feature Update

- SSO Options Support
- Self-Service Modelling
- Variables Support
- Geospatial Data Support
- Data Dimension Support
- Custom Dimension Support
- Power BI to SAP DWC Support
- Expanded Consumption Protocols

# APOS Solutions for SAP Analytics Cloud

## APOS Live Data Gateway

- High-performance live data connectivity
- Virtualized, governed, self-service connectivity
- Connect to Relational databases
- Connect to OLAP data sources
- Connect to Cloud data environments
- Connect to SAP Application data

## APOS Publisher for Cloud

- Automate secure information delivery
- Deliver timely information
- Create a flexible messaging environment
- Simplify administration
- Use multiple formats & destinations
- Burst stories with multiple filters
- Burst conditionally
- Collate stories
- Personalize PowerPoint bursting

## APOS Insight for Cloud

Monitor – tracking & alerting for:

- SAC story performance
- System response measures

Validation automated comparisons across SAC versions of:

- SAC story data
- SAC story performance
- SAC story structure

Impact analysis – granular auditing of SAC story structure metadata

## APOS Semantic Layer Migration

- Capture SAP BI Universe data connection and data modelling logic
- Project-based, wizard-driven interface
- Scan your SAP BI content for relevant data connections
- Harmonize SAP BI and HANA data modelling throughout Hybrid BI
- Translate SAP BusinessObjects modelling to SAP HANA Calculation Views
- Translate SAP BusinessObjects modelling to a unified semantic layer

# APOS Solutions for SAP BusinessObjects

## APOS Insight

### BI System Auditing

- System Inventory
- Security Analysis
- System Usage Analysis
- Report Impact Analysis

### BI Report Testing

- Automated Report Testing
- Regression Testing
- Validation of Report Data
- Report Performance Testing

### BI System Monitoring

- Advanced System Monitoring
- Operating Environment Monitoring
- Database Monitoring
- Process Monitoring

### BI Query Surveillance

- Real-time BI Query Monitoring
- Query Performance Alerting & Auditing
- Query Intervention; Remote Cancelling
- Sensitive Data Audit

## APOS Administrator

### Object Management

- Bulk Security Management
- Bulk Settings Management
- System Objects Promotion
- Connections Maintenance

### Schedule Management

- High-volume schedule management
- Multiple schedule properties editing
- Grid scheduling interface
- Repeatable scheduling templates

### Instance Management

- Manage entire instance inventory
- Granular instance search
- Stop, pause, release, reschedule
- Rapid recovery to failed schedules

### Web Intelligence Migration

- Bulk conversion of Universes from UNV to UNX
- High-Volume Repoint Web Intelligence reports
- Success validation
- Controlled, project-based workflow

## APOS Storage Center

- System Backup
- Content Archiving
- Content Versioning
- Selective Restoration
- Automated System Clean Up

## APOS Publisher

- Systematic Content Delivery
- Advanced Document Bursting
- Enhanced Content Distribution
- Security and Encryption
- Statement Generation

## Latest Updates and News on SAP Analysis for Office – Webinar

June 2<sup>nd</sup>, 2022 - 11am EDT

**Featured Speaker: Jeanne Bigonnet, Product Manager, Analytics, SAP**

SAP Analysis for Microsoft Office (Analysis Office) and its flexible analytical capabilities continues to be a very popular tool for self-service analytics with many organizations and users, but what's ahead for SAP Analysis Office users in this time of digital transformation? Many organizations are eager to address key questions to help them plan their analytics future. What are the latest SAP Analysis Office capabilities? What is the vision for SAP Analysis Office?

Join SAP's Jeanne Bigonnet and the APOS team to learn about:

- The latest SAP Analysis Office updates and the roadmap for its future
  - Assess the latest advancements for SAP Analysis Office
  - Understand SAP Analysis Office and its importance for you
  - Plan your next steps for SAP Analysis Office in your organization
- How APOS technology can help you expand your use of SAP Analysis Office with:
  - Scheduling and distribution
  - Expanded formats and destinations

...and more.

# Upcoming Events

## Impact Analysis for SAP BusinessObjects Flashes of Insight – Webinar

June 18<sup>th</sup> , 2022 - 11am EDT

Impact analysis is a critical need for BI teams as BI systems and system content evolve rapidly. As data structure changes are being planned or implemented, it is important to know what BI content will be or has been affected by those changes. This is a common concern that creates challenges whenever database or semantic layer changes are made. These may be internally driven changes, or may result from externally driven changes in a third-party application (healthcare EHR systems, for example). Such data source changes can also affect financial reporting internal controls.

Join us June 16 for a live webinar, focusing on measuring, analyzing and managing the impact on reports, universes, and dashboards.

### You will learn how to:

- Foresee and measure the impact of any data source changes with detailed metadata to record system content changes
- Which reports and universes will be affected by database schema changes?
- Which reports will be affected by modification of objects in universes
- Foresee and measure the impact of environmental changes
- Use impact analysis to achieve regulatory/internal control compliance and to accelerate EHR upgrades

... and more
