

WEBINAR

# Automated Streamlining & Right-Sizing of SAP BusinessObjects Technical Deep Dive

# Today's Session

## *Key Topics*

### Technical Deep Dive

- Solution Technical Overview
- Rationalizing – Automated system analysis
- Reducing Technical Debt – Automating backup & clean-up
- Restructuring – Streamlining infrastructure and operations
- Q&A – see webinar console

## Today's Presenters:

**ALAN GOLDING**

Solution Consulting Manager  
APOS

**FRED WALTHER**

Senior Solution Consultant  
APOS

## Who is APOS?

- Formed in 1992
- Enabling BI platform management, administration, migration, governance and compliance
- Simplifying, automating, extending SAP Analytics Cloud, SAP BusinessObjects, and SAP data analytics
- Strategic SDK development and consulting
- Hundreds of customers globally

# Updated Statement of Direction – SAP BI & Analytics

PUBLIC

## **SAP ANALYTICS** Business Intelligence Statement of Direction

October 2023

# Regrouping for your SAP BusinessObjects Future

## Recommendations:

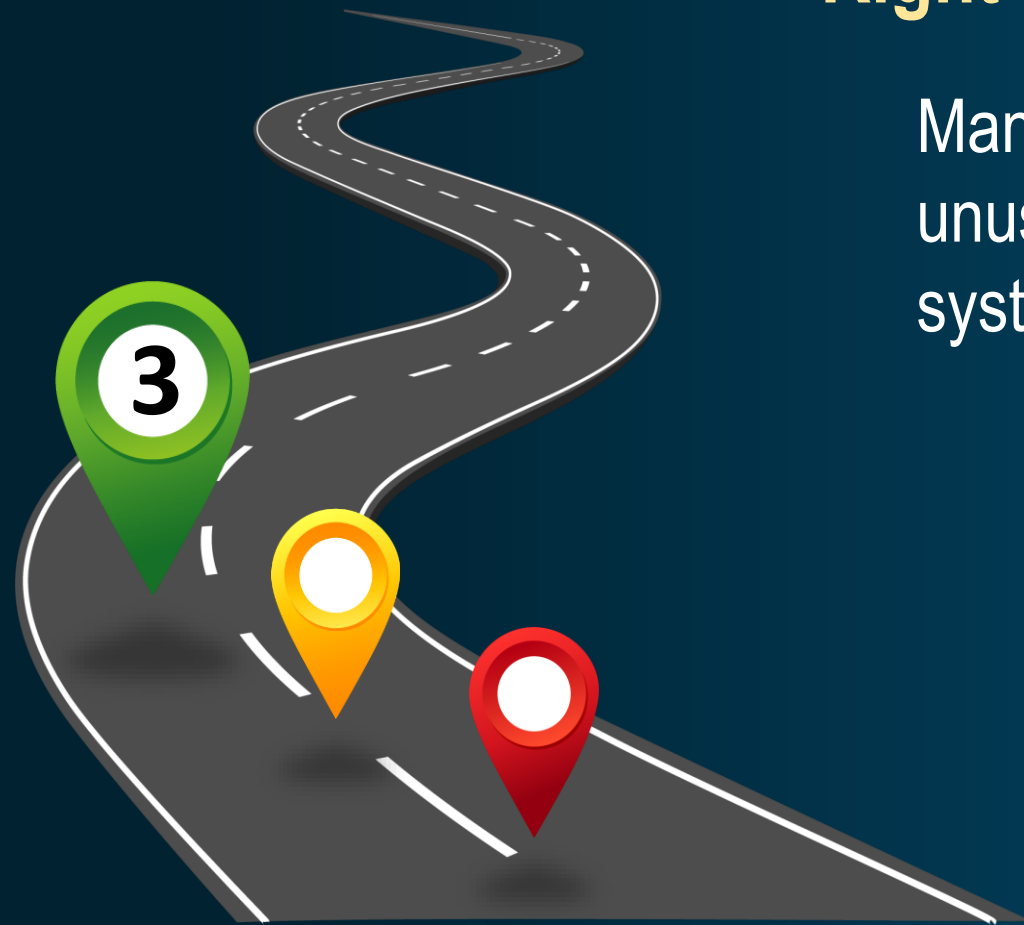

- Take stock of what you have
- Assess & action unsupported content
- Right-size your system content
- Upgrade platform to Version 4.3
- Upgrade Universes to UNX format
- Automate for efficient management

# Regrouping for your SAP BusinessObjects Future

## Right-size your system content

Many organizations have a significant amount of unused and unnecessary content residing in their system – excessive 'Technical Debt'

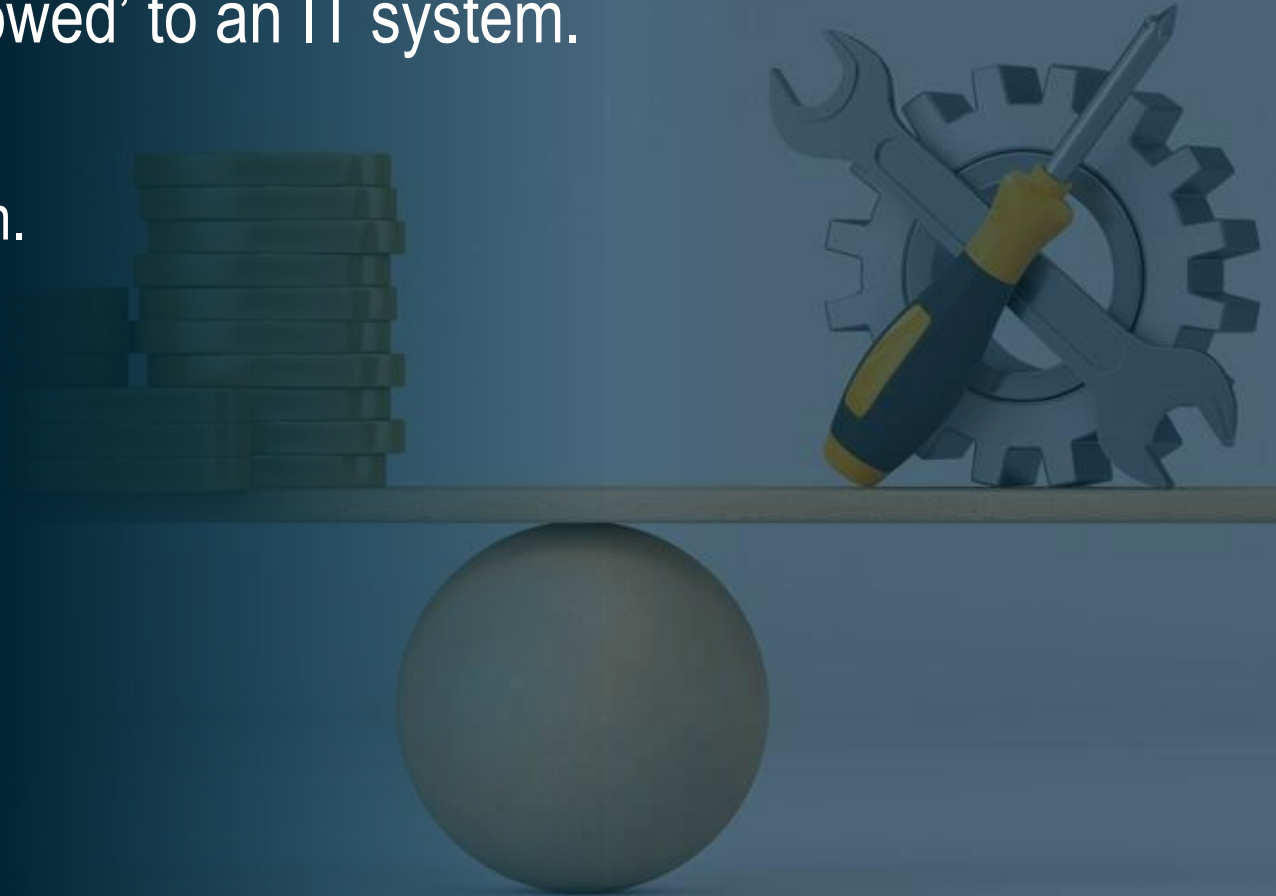

# What is Technical Debt

**Technical Debt** is accrued work that is 'owed' to an IT system.

- Technical debt can accrue when teams delay performing regular maintenance on the system.
- Eventually, technical debt can accrue into a critical mass where the software becomes unstable, and customers become dissatisfied.
- Delayed maintenance can also result in significantly higher support costs...

...as defined by **Gartner**

# Technical Debt in SAP BusinessObjects

All system content can be considered Technical Debt:

- Report Objects
  - Report Instances
  - Universes
  - Connections
  - Users
  - Groups
  - Security
  - Schedules
- What content is useful?
  - What content is not useful?
  - What debt can be eliminated?

# Symptoms of Too Much Technical Debt

- Challenging system management and maintenance
  - Content edits, updates, administration
  - Content lifecycle management and controls
  - User and usage changes; security management
- Complex system analysis
- Heavy upgrades/migrations
  - Content migration, content testing
  - Bloated migrations
- Reduced system performance
  - Skewed infrastructure planning
  - Stretched storage resources
- Difficult governance and audits

# Why Remove Unnecessary Technical Debt

- All system content is meaningful and utilized
- Streamlined management and maintenance
- Improved system analysis and audits
- Simplified upgrades/migrations
- Efficiently sized and utilized infrastructure
- Reduced burden on BI Team
- Improve business value of deployment

**What is your Technical Debt Ceiling?**

# Right-Size Your BI Environment – 3 Steps

- Rationalize
  - Reduce
    - Restructure

# Right-Size Your BI Environment

## Rationalize

Assessing what is necessary and what is unnecessary:

- Content
- Users
- Licenses
- Infrastructure

# Right-Size Your BI Environment

## Reduce

Find and remove unnecessary elements from system:

- Content
  - Reports, Universes, Instances
- Users

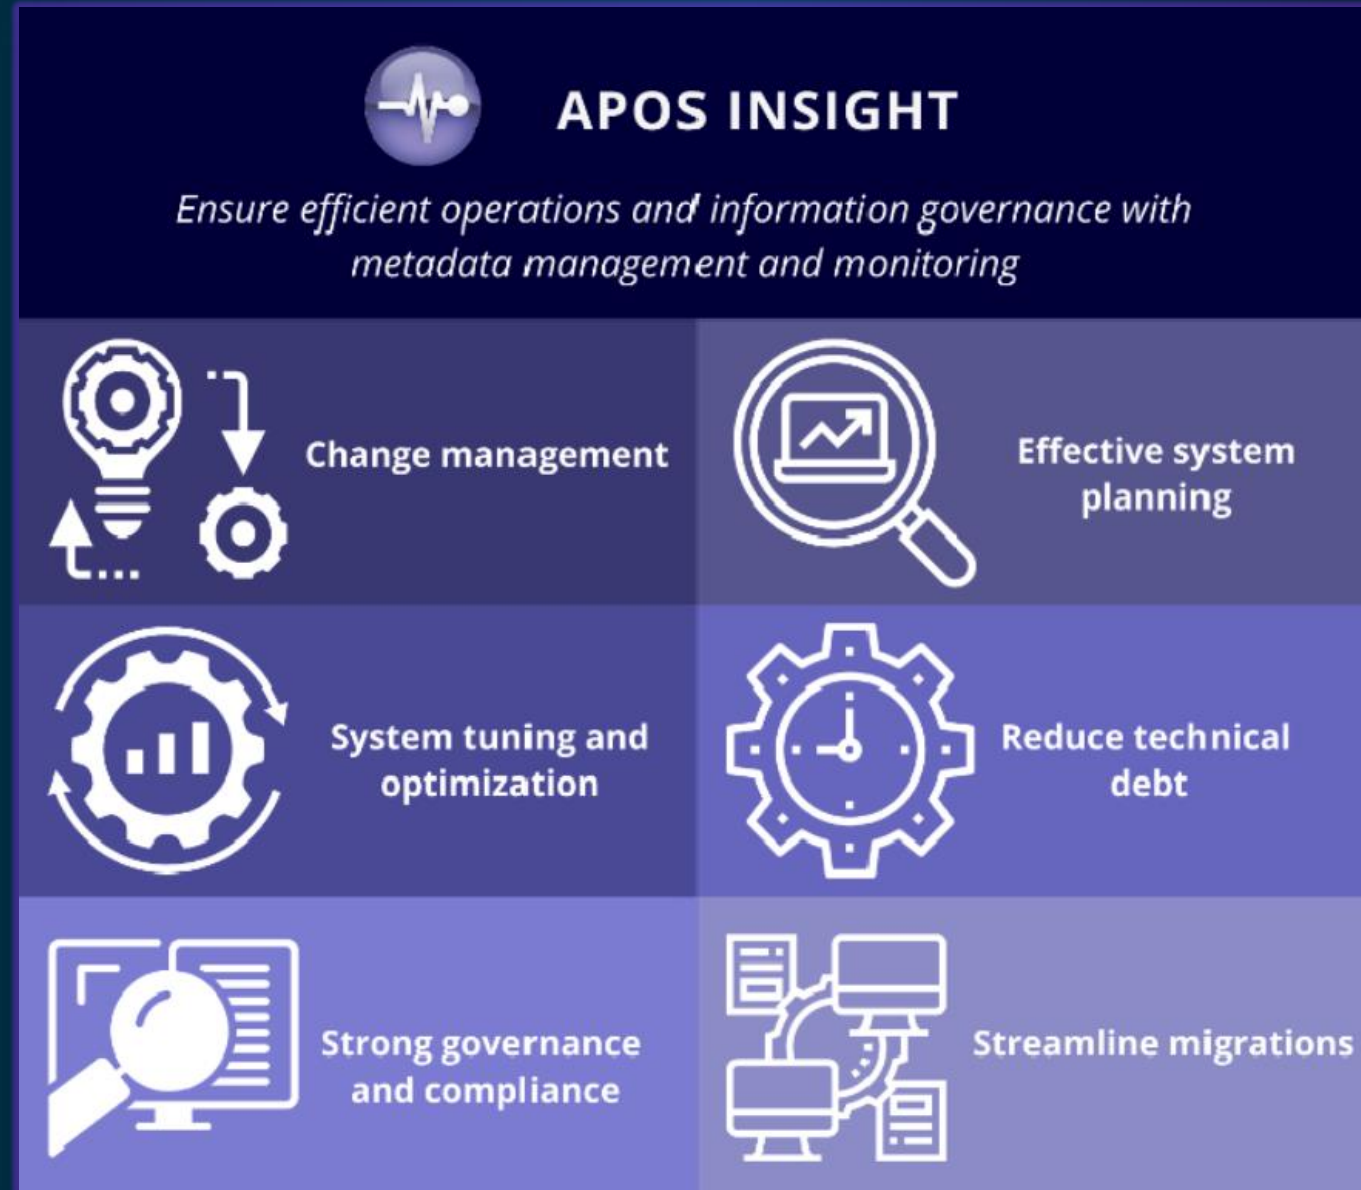

# Right-Size Your BI Environment

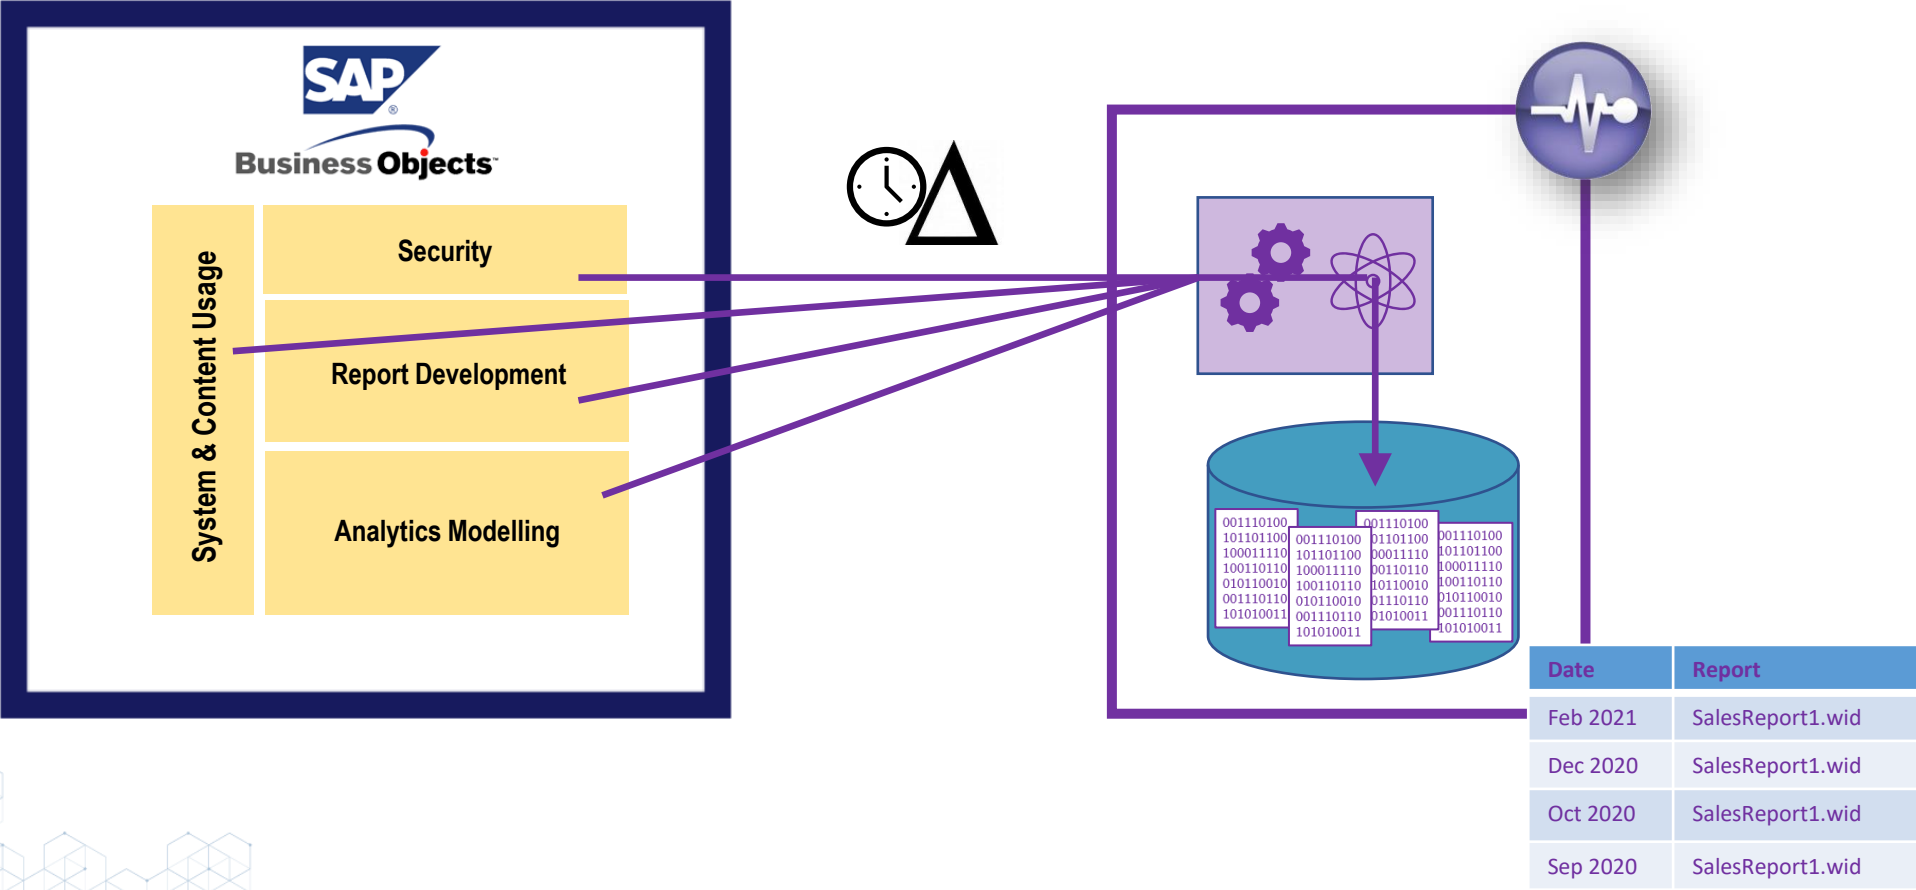

## Restructure

- Infrastructure
- Licenses

# Reduce - Content & Users

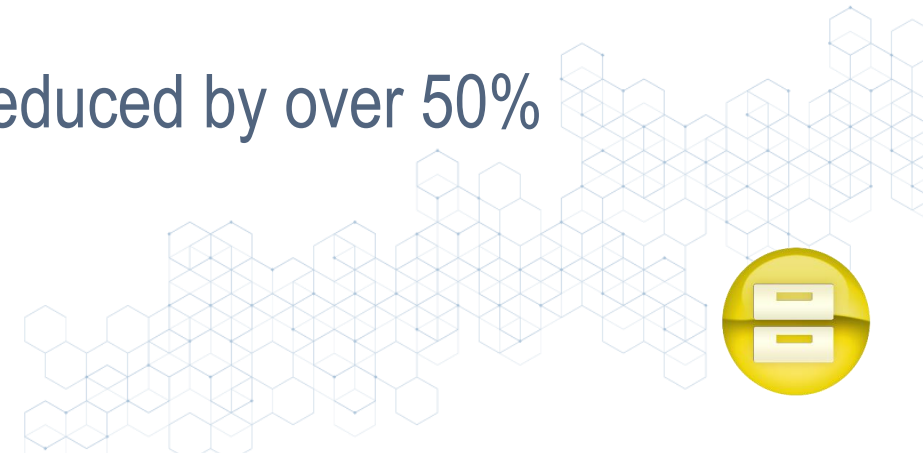

| Before                  | After |
|-------------------------|-------|
| Reports = 1200          |       |
| Instances = 150,000     |       |
| Universes = 45          |       |
| Users = 750             |       |
| Groups = 65             |       |
| Total Objects = 152,060 |       |

# Reduce - Content & Users

| Before                         | After                         |
|--------------------------------|-------------------------------|
| <b>Reports = 1200</b>          | <b>Reports = 350</b>          |
| <b>Instances = 150,000</b>     | <b>Instances = 73,550</b>     |
| <b>Universes = 45</b>          | <b>Universes = 20</b>         |
| <b>Users = 750</b>             | <b>Users = 500</b>            |
| <b>Groups = 65</b>             | <b>Groups = 30</b>            |
| <b>Total Objects = 152,060</b> | <b>Total Objects = 74,450</b> |

End Result : SAP BI content and user count reduced by over 50%

# Technical Deep Dive

## Restructure

Note: To see the demonstrations from this webinar,  
[view the webinar on demand.](#)

## Scale Down

Before Reduction

After Reduction

## Restructure – Infrastructure

- Scale down due to reduced users
- Scale down due to reduced content
- Scale down due to reduced usage from past consumption levels
- Scale down due to lower usage than original expectations

## Scale Up

Before Growth

After Growth

## Restructure – Infrastructure

- Scale up due to increased usage - servers maxing out
- Scale up due to increased users
- Scale up due to increased content
- Scale up due to old hardware
- Scale up with move to cloud deployment
- Scale up due to more scheduling
- Scale up due to revised licensing method

# APOS Solutions for SAP BusinessObjects

## APOS Insight

### BI System Auditing

- System Inventory
- Security Analysis
- System Usage Analysis
- Report Impact Analysis

### BI Report Testing

- Automated Report Testing
- Regression Testing
- Validation of Report Data
- Report Performance Testing

### BI System Monitoring

- Advanced System Monitoring
- Operating Environment Monitoring
- Database Monitoring
- Process Monitoring

### BI Query Surveillance

- Real-time BI Query Monitoring
- Query Performance Alerting & Auditing
- Query Intervention; Remote Cancelling
- Sensitive Data Audit

## APOS Administrator

### Object Management

- Bulk Security Management
- Bulk Settings Management
- System Objects Promotion
- Connections Maintenance

### Schedule Management

- High-volume schedule management
- Multiple schedule properties editing
- Grid scheduling interface
- Repeatable scheduling templates

### Instance Management

- Manage entire instance inventory
- Granular instance search
- Stop, pause, release, reschedule
- Rapid recovery to failed schedules

## APOS Storage Center

- System Backup
- Content Archiving
- Content Versioning
- Selective Restoration
- Automated System Clean Up

## APOS Publisher

- Systematic Content Delivery
- Advanced Document Bursting
- Enhanced Content Distribution
- Security and Encryption
- Statement Generation

## APOS Web Intelligence Migrator

- Bulk conversion of Universes from UNV to UNX
- High-Volume Repoint Web Intelligence reports
- Success validation
- Controlled, project-based workflow

# STREAMLINE YOUR MOVE TO UNIX UNIVERSE

**Freemium  
Upgrade  
Offer**

## APOS Web Intelligence Migrator

### INVENTORY SYSTEM CONTENT

Detailed view of universes and reports for effective project planning

### BULK CONVERSION OF UNIVERSES

High-volume conversion of universes from UNV to UNIX format

### HIGH VOLUME REPOINTING OF REPORTS

Scan and repoint Web Intelligence reports in bulk from old UNV to new UNIX

### VALIDATE UPGRADE SUCCESS

Automated testing of reports to validate successful and accurate migration

### STRONG PROCESS CONTROLS

Enterprise-grade controls to synchronize and scale your migration processes

## APOS Freemium Offer

Free Production deployment use of APOS Web Intelligence Migrator:

- Scan and inventory your SAP BI systems
- Bulk convert all UNV universes to UNIX
- Bulk repoint up to 200 WebI reports
- Validate migration success
- 100 days of free use
- Inventory multiple systems
- Guidance and support

# Upcoming Event

***MOVE IT OR LOSE IT!***

## **Automating Your Upgrade to UNX Universes**

**Guest Speaker: Patrick Sims, SAP BTP Global Center of Excellence**

Along with a mini-update from SAP's Patrick Sims for the latest BusinessObjects news, this session will focus on how APOS Web Intelligence Migrator can help you automate and accelerate your UNX conversion and Web Intelligence repointing.

**January 25 - 11am Eastern Time**

APOS has been serving the SAP BusinessObjects user community for 20 years, providing solutions for automating key functions in managing an SAP BI platform.

Whether you are upgrading your on-premise BI in preparation for SAP BusinessObjects 2024, moving to SAP BusinessObjects Private Cloud Edition, or migrating to SAP Analytics Cloud, migrations can be challenging, putting strains on resources, so streamlining and automating processes is needed. APOS solutions simplify and automate many key processes in a successful SAP BusinessObjects migration.

## SAP BusinessObjects Migration Kit

### Upgrade Readiness, Execution & Content Governance

Achieve a streamlined, efficient and effective deployment that is upgrade ready. APOS solutions help you run bulk upgrade operations, validate content, optimize security, and maintain your BI environment.
