

APOS Dashboard Migrator

Use Xcelsius components and dashboards in SAP BusinessObjects Design Studio dashboards

Migrate

- Adopt Design Studio, the new standard in dashboards, with confidence and at your own pace.
- Use Xcelsius to maintain dashboard features and service levels.

Manage

- Control your migration timeline.
- Control dashboard designer skill development and resource allocations.

Extend

- Leverage your investment in Xcelsius dashboard assets.
- Re-use third-party Xcelsius extensions in Design Studio.

Design Studio & Xcelsius - Experience the Best of Both Worlds

The **APOS Dashboard Migrator for SAP BusinessObjects Design Studio** lets dashboard designers include components or whole dashboards built in Xcelsius as elements in Design Studio dashboards. Dashboard Migrator delivers Xcelsius dashboards seamlessly within Design Studio, and parameter passing between components is enabled within the dashboards. The Xcelsius dashboards can connect to a UNX Universe, Query as a Web Service (QaaS), or any other standard or third party data connection method.

The APOS Dashboard Migrator also provides the ability to select Xcelsius dashboards or components on the fly according to the context within Design Studio. From a single Design Studio Dashboard, you can access multiple legacy Xcelsius dashboards, as determined by the parameters passed from Design Studio to Xcelsius.

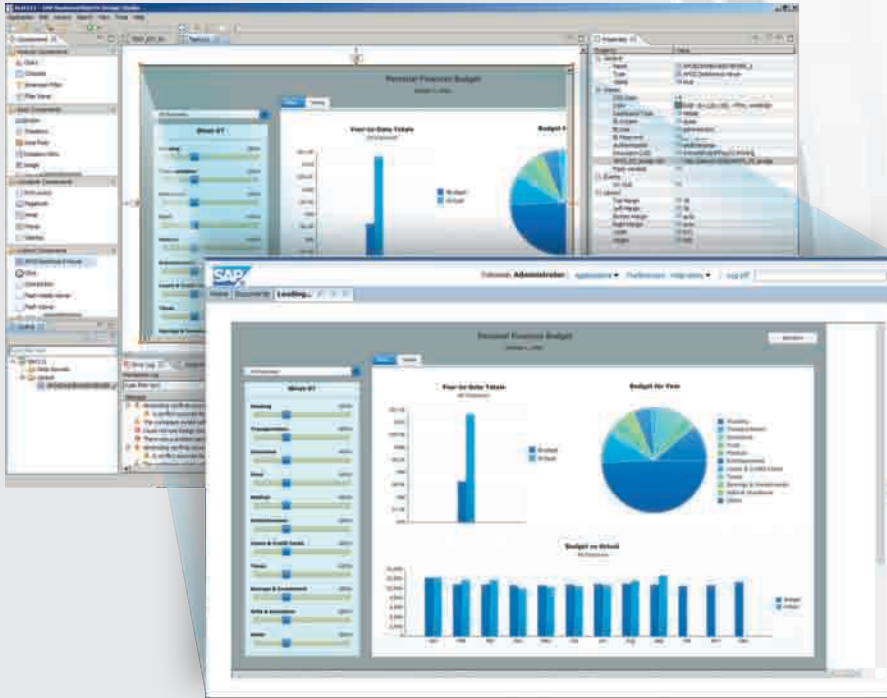

Well Managed BI

APOS Dashboard Migrator

Use Xcelsius components and dashboards in SAP BusinessObjects Design Studio dashboards

APOS Dashboard Migrator for SAP BusinessObjects Design Studio

SAP BusinessObjects platform managers, administrators and migration planners will appreciate how Dashboard Migrator helps them manage migration time and resources, and legacy data sources, as they make the transition from an Xcelsius to a Design Studio dashboard development environment.

Rebuilding your Xcelsius dashboards in Design Studio requires time and a specific set of skills. APOS Dashboard Migrator lets you:

- Include Xcelsius dashboards and components in Design Studio.
- Make the most of your Xcelsius investment while managing your migration timeline efficiently.
- Use Design Studio context to determine Xcelsius dashboard and content.
- Leverage your investment in Xcelsius dashboards and third-party add-ons.

Make APOS Dashboard Migrator part of your resource planning and migration strategy.

Formed in 1992, APOS Systems is a global provider of solutions which enable well managed business intelligence.

APOS solutions improve the return on your BI investment through enhanced BI platform management, providing: automated and simplified administration; detailed platform auditing and monitoring; robust archive, backup and restore capabilities; enhanced content publishing and distribution; detailed BI query awareness and controls; and targeted solutions to speed and streamline your platform migrations.

APOS solutions simplify, automate, complement and extend your BI platform management practices.
