APOS Publisher

Execute tightly controlled document production, publishing and distribution workflows

- **Advanced bursting engine**
- **Automated document production**
- **Workflow monitoring, alerts and auditing**
- **Interactive process control**
- **Assured delivery to external devices, auto recovery, partial burst reruns**
- **Enhanced distribution, encryption & integration**

APOS Publisher is a complete SAP BusinessObjects publishing solution, providing robust bursting management, post-processing distribution service, report package management, and assured delivery to extend SAP BusinessObjects capabilities. Publisher automates these tasks while providing personalized reporting to your information consumers.

SAP BusinessObjects platform managers and technologists value the flexibility and agility that Publisher's custom properties, flags and settings add to their scheduling, bursting and distribution efforts, and the ability to zip and encrypt reports.

CIOs use Publisher to leverage their BI investment as a replacement for legacy information delivery systems, improving both performance and ROI.

Enterprise Application Data

APOS Publisher
Execute tightly controlled document production, publishing and distribution workflows
- Advanced bursting engine
- Automated document production
- Workflow monitoring, alerts & auditing
- Interactive process control
- Assured delivery to external devices, auto recovery, partial burst reruns
- Enhanced distribution, encryption & integration

Enterprise Content Management

Advanced bursting engine
- Burst in queues or batches
- Operate multiple bursting queues in parallel
- Structure and control bursting jobs with request hierarchy within batches, collections, and projects

Automated document production
- Centralized document generation
- Create collection execution worflows
- Send to AFP printers

Workflow monitoring, alerts and auditing
- Monitor requests within batches, collections, and projects
- Receive alerts when errors occur, when batches, collections and projects are closed
- Trigger reports at the end of the bursting process to list full status of batches, collections and projects

Interactive process control
- Exercise complete control over document production workflows within SAP BusinessObjects.
- View queues, collections, batches, projects and requests as they execute
- Configure all burst settings via console

Assured delivery to external devices, auto recovery, partial burst reruns
- Guaranteed delivery to targeted SMTP server, or physically print to paper.
- Record errors, issue alerts
- Auto recovery, partial burst reruns

Enhanced distribution, encryption & integration
- Tight integration with enterprise content management systems (Open Text, Sharepoint, etc.)
- API for custom destination plug-in creation
- Extensive support for destination/distribution types (SSL FTP, secure FTP, secure shell FTP, encrypted files)

Since its beginning in 1992, APOS Systems has evolved from a custom business application development shop to a global provider of solutions promoting well managed business intelligence. APOS solutions improve your return on your BI investment through:

BI platform management – automating and simplifying the administration, auditing and monitoring of your BI platform, providing robust document instance and object archive and restore capabilities, enabling tightly controlled document production, publishing and distribution workflows, and promoting agile BI practices.

Location intelligence – full bi-directional integration between business intelligence and geospatial data, improving comprehension and communication, and enhancing decision-making workflows through advanced data visualization.

APOS solutions simplify, automate, complement, enhance and extend BI practices, and focus BI processes for greater agility in your organization's decision-making capabilities.
