

Streamline your move to UNX Universes

Automate UNX Adoption with APOS Web Intelligence Migrator

Reduce risk, reduce cost, and increase speed of UNX upgrades through rapid, high-volume conversion, bulk repointing, automated testing and strong process controls.

THE FUTURE OF UNV IS...UNX

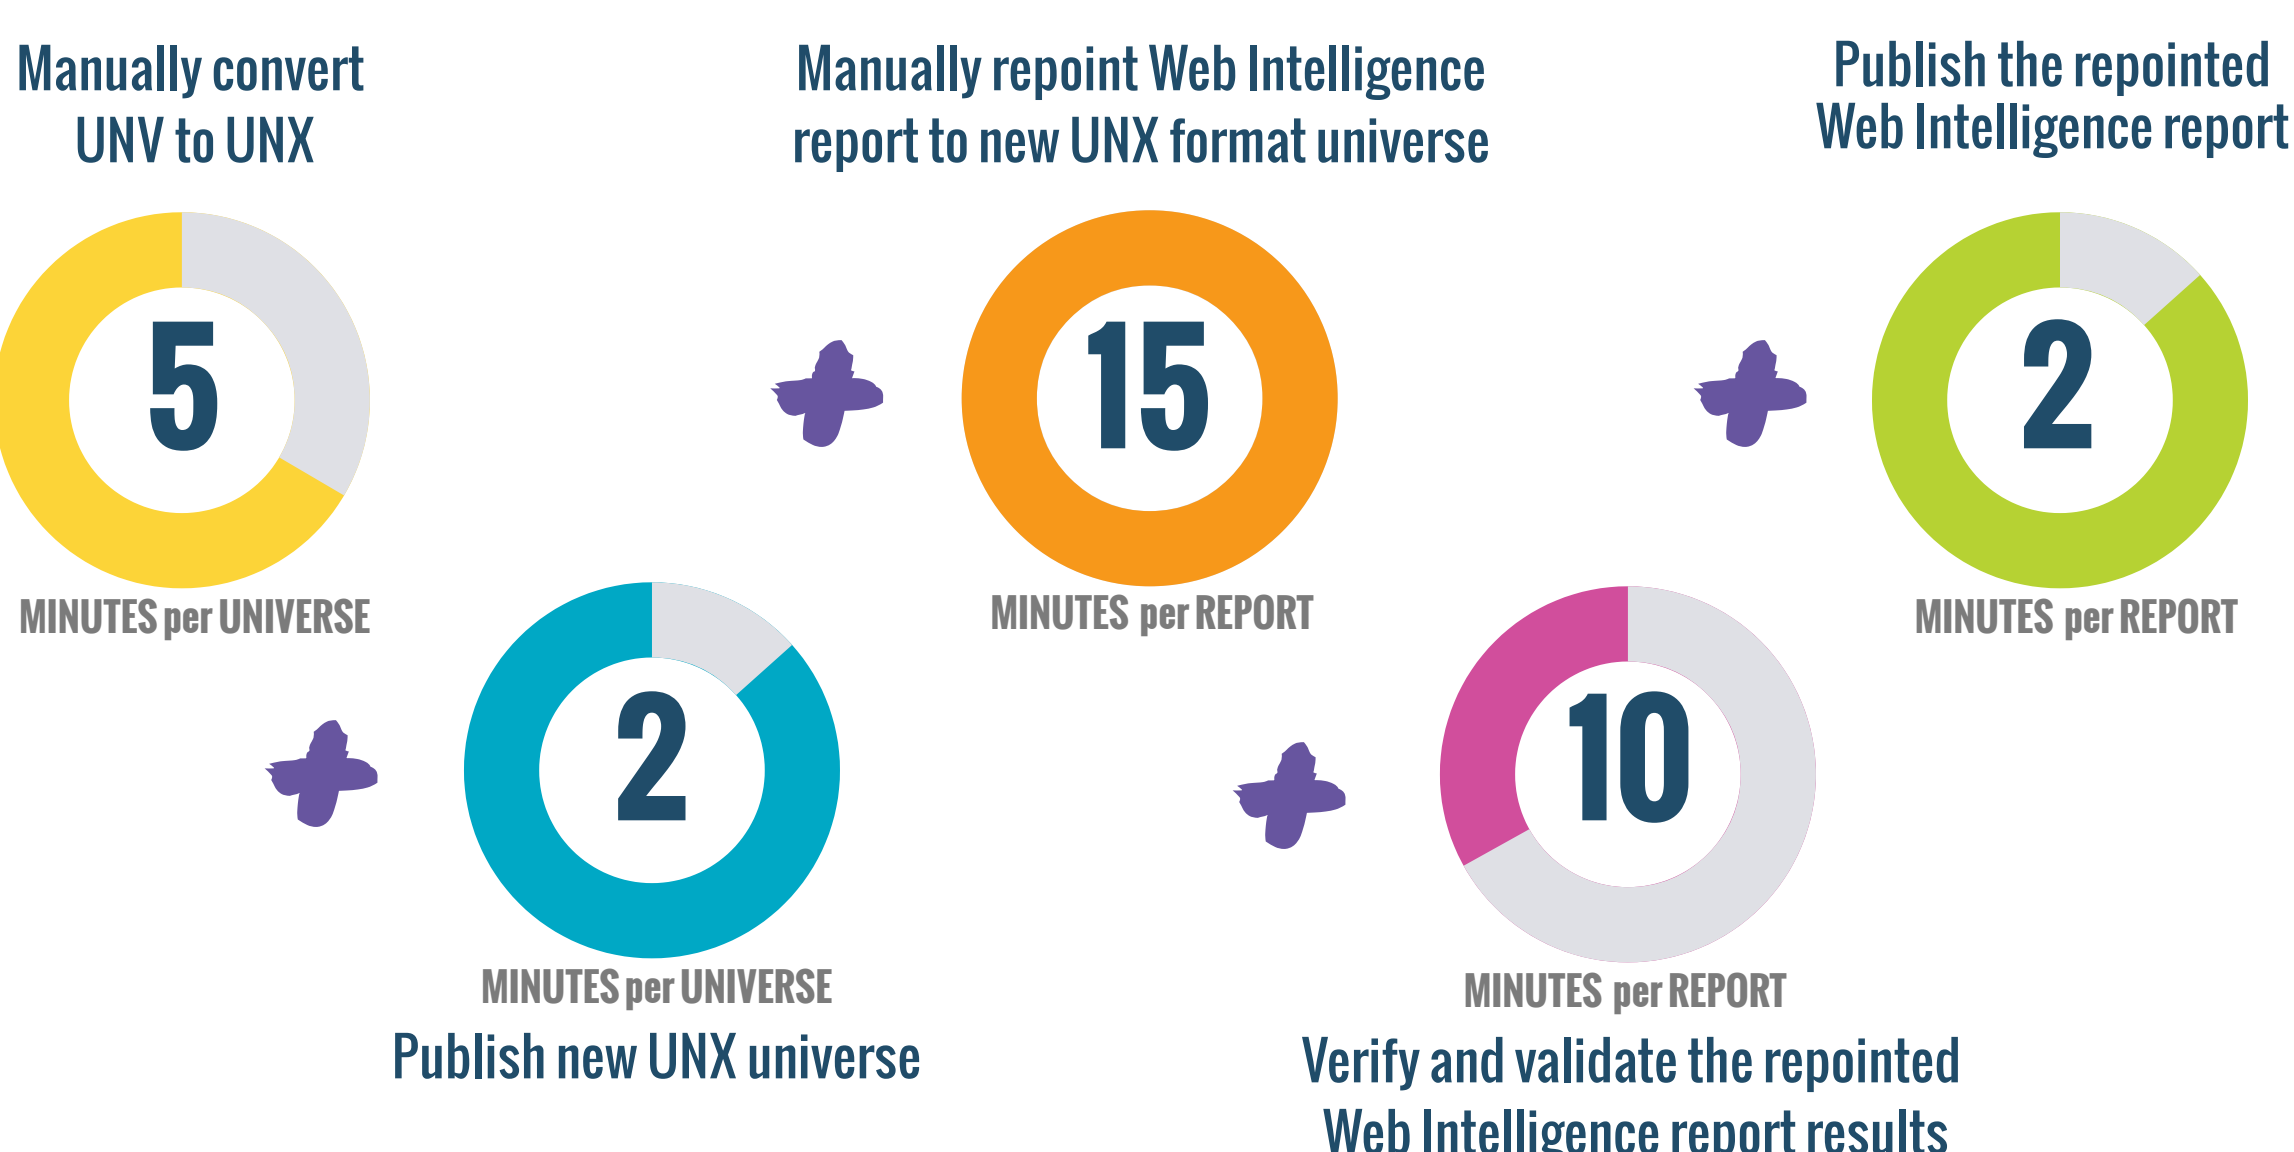

"With the end of UNV support in 2027, it becomes mandatory for those still using UNV to process this change in the coming years. The real challenge of the UNV/UNX conversion is about the Web Intelligence reports based on the UNVs, which need to be repointed to the converted UNX. **If you have many Web Intelligence reports, you may need to automate this bulk change source process.**"

Laura Vega,
Analytics Product Manager
SAP

WHAT IS THE SCOPE?

Converting UNV universes to UNX and repointing Web Intelligence is a large IT project for organizations with thousands, tens of thousands, or even hundreds of thousands of reports.

RESOURCE

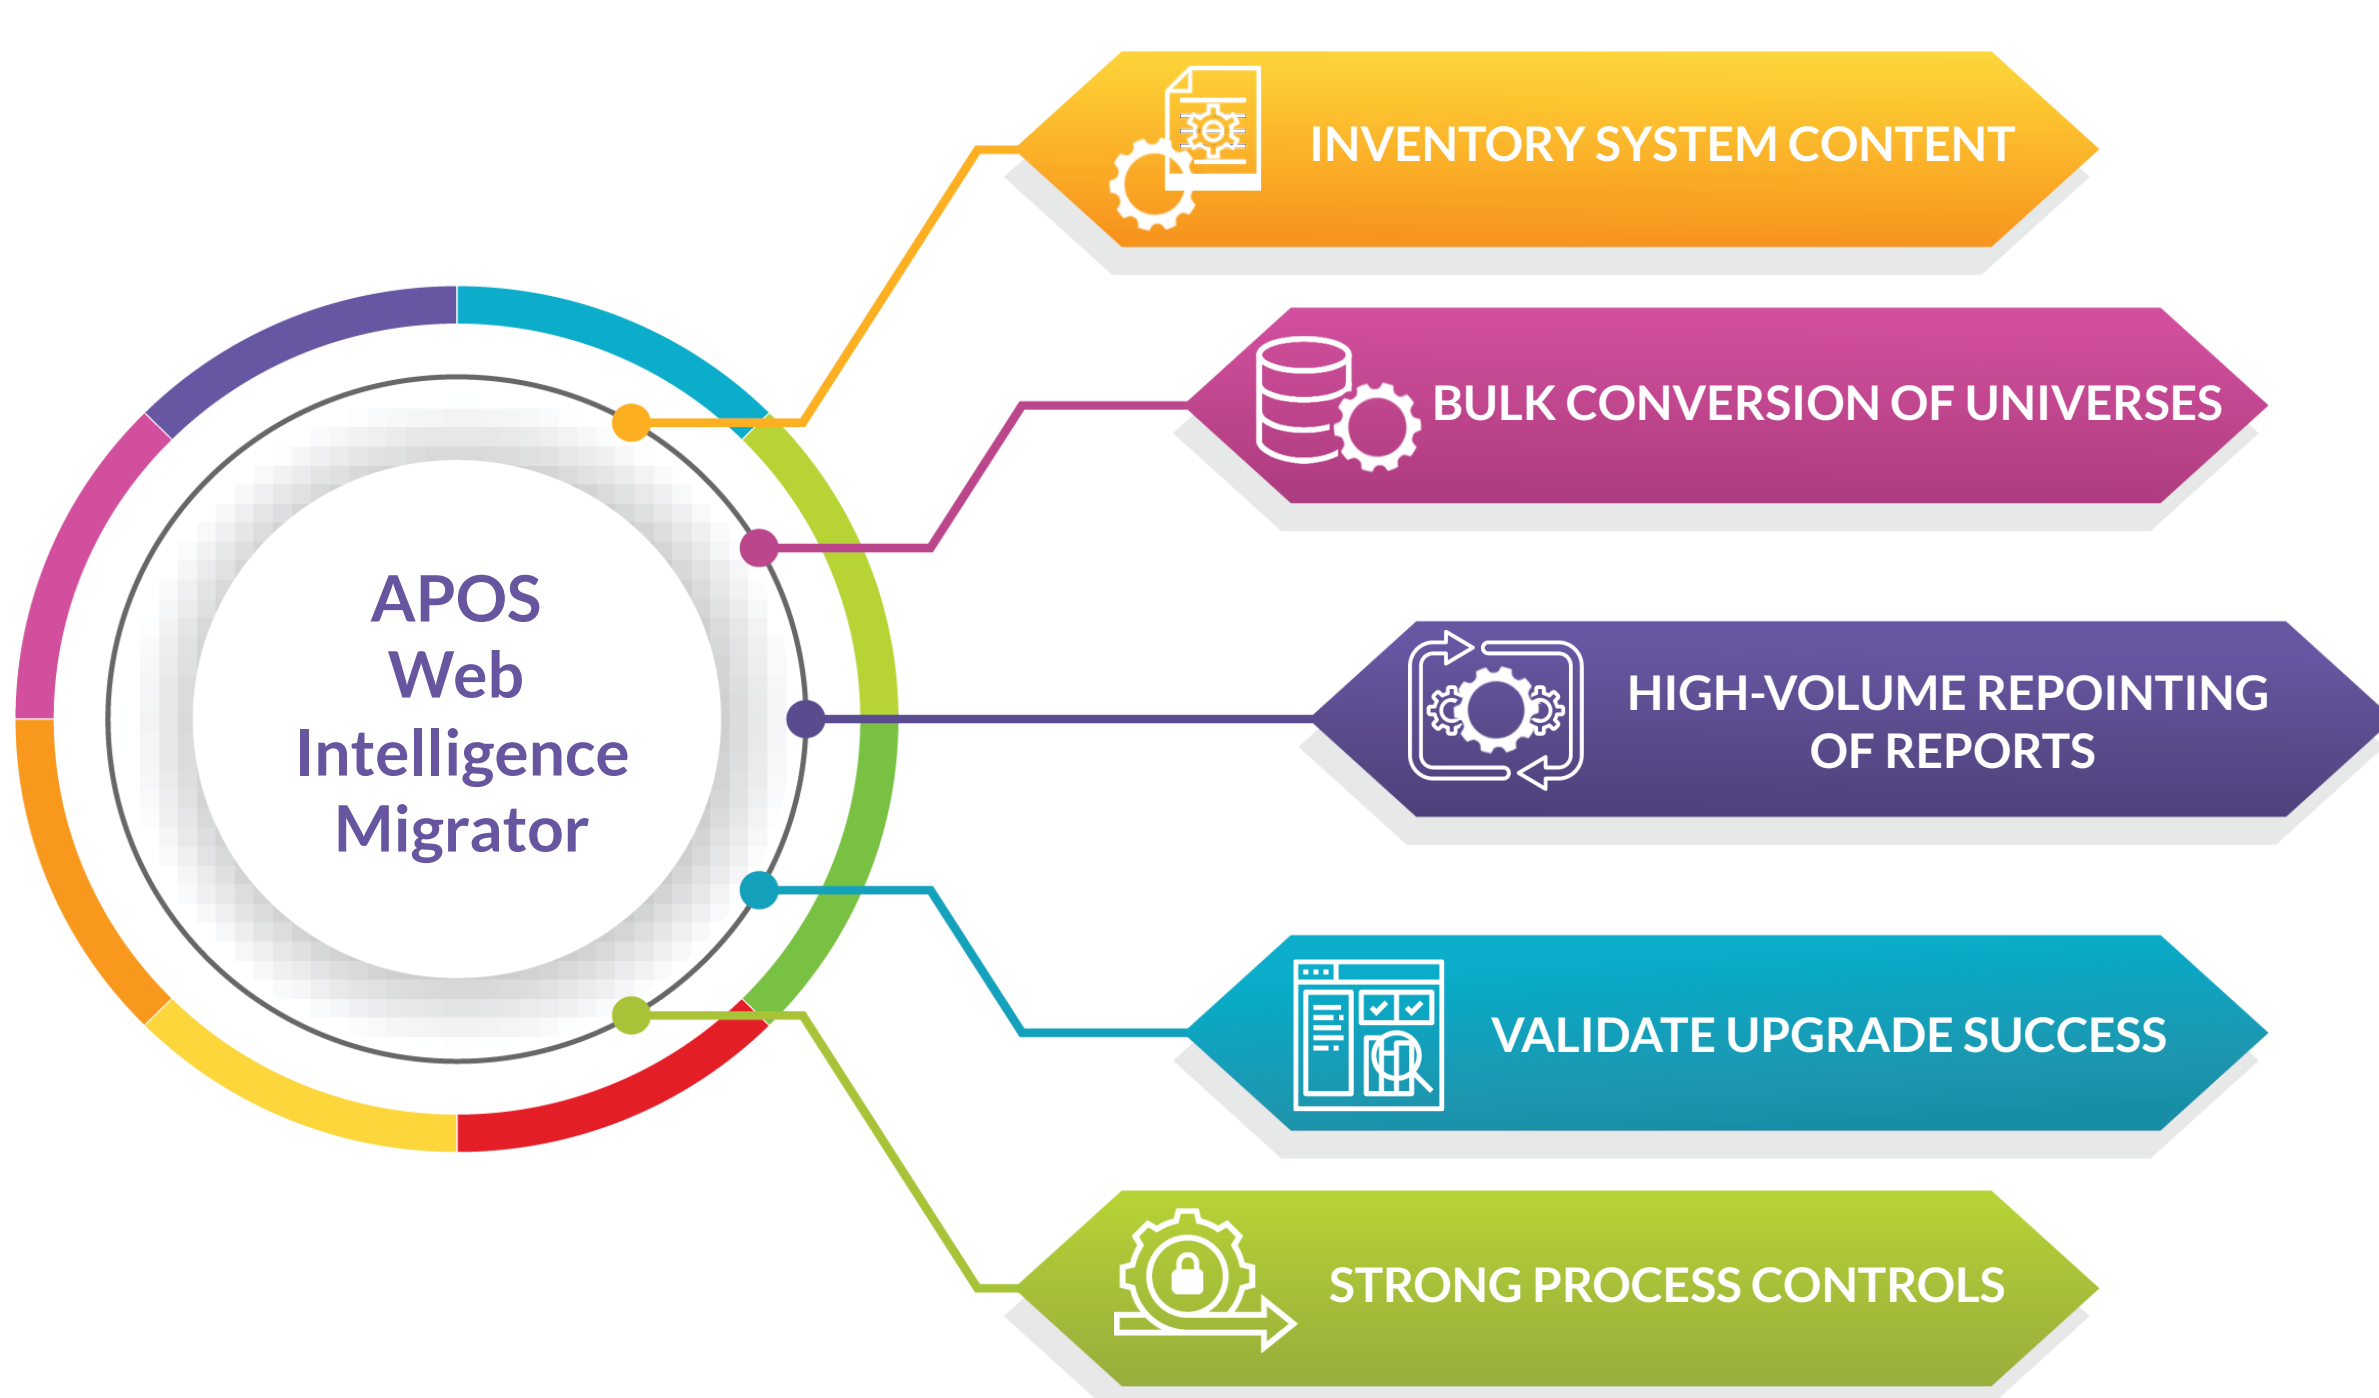

The **UNX Adoption Project Cost Estimator** shows you how much time and money will be required to convert your universes and migrate your Web Intelligence reports manually. Use this information to determine whether the automation of this process is right for your organization.
