

Expand, simplify and unify your data connectivity

Use virtualized data connectivity for SAP® Analytics Cloud and other SAP technologies to **connect live to a vast range of data sources.**

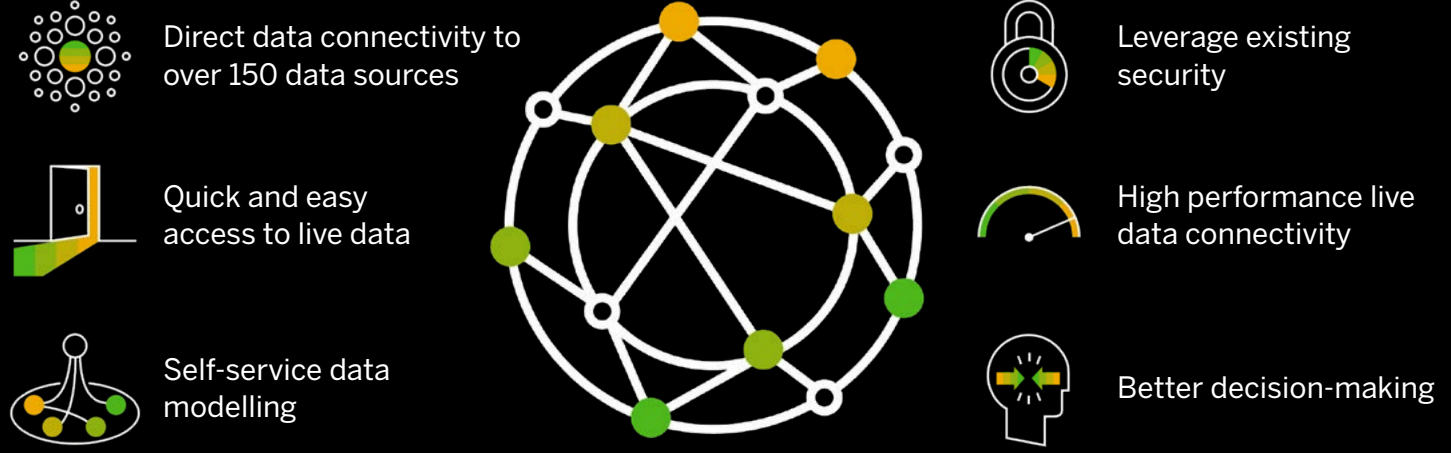

[Learn more](#)

CHALLENGES

SOLUTION

With **APOS Live Data Gateway**, access live virtualized, governed, self-service data connectivity to non-SAP data sources

BENEFITS

With **live data connection to SAP Analytics Cloud**:

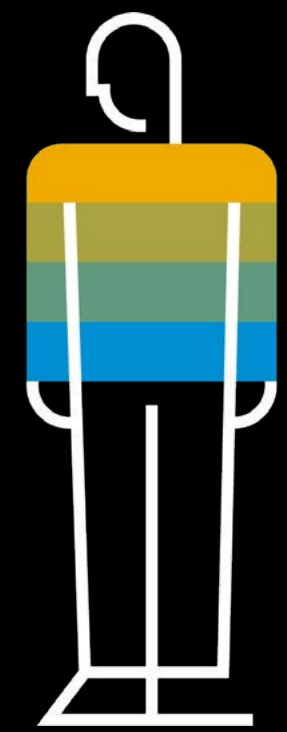

EVIDENCE

Making a difference by **making connections**

- 100%** reduction in recurring manual data manipulation processes³
- Live connectivity to **150+** data sources³
- Zero** data replication, user reliance on database administrator resources or coding required³

“ This APOS solution was extremely easy to deploy, simplifying the process of connecting to Google BigQuery and our other data sources. We were also pleased with live data connecting... because it kept all data within the corporate firewall for an added level of security. ”

Sunil Kumar, SAP Enterprise Architect, WR Grace
